## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see <a href="https://www.iso.org/directives">www.iso.org/directives</a>).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <a href="https://www.iso.org/patents">www.iso.org/patents</a>. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 145, *Graphical symbols*, Subcommittee SC 2, *Safety identification, signs, shapes, symbols and colours*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at <u>www.iso.org/members.html</u>.

# Graphical symbols — Safety colours and safety signs — Registered safety signs

## **AMENDMENT 7**

IMPORTANT — The colours represented in the electronic file of this document can be neither viewed on screen nor printed as true representations. For the purposes of colour matching see ISO 3864-4, which provides colorimetric and photometric properties together with, as a guideline, references from colour order systems.

Add the following safety signs:

- P075: Do not stare at light source,
- W079: Warning; Hot content,
- W080: Warning; Hot steam.

All safety signs are available on the ISO Online browsing platform at <u>https://www.iso.org/obp/ui</u>.

## (standards.iteh.ai)

<u>ISO 7010:2019/Amd 7:2023</u> https://standards.iteh.ai/catalog/standards/sist/4da4a79f-6903-41c3-bcb0-6687b9ced7c8/iso-7010-2019-amd-7-2023

	Reference No.
_	ISO 7010-P075
	Referent
	Do not stare at light source
	Function
	To prohibit staring at a light source
	Image content
	Human eye and light bulb (small square and circle) with seven radiating straight lines
Hazard	
Injury to eyes after exposure to optical radiation	

## Safety sign P075: Do not stare at light source

Human behaviour that is intended to be caused after understanding the safety sign's meaning

Not staring at the light source

### ISO 7010:2019/Amd 7:2023

Additional information and ards.iteh.ai/catalog/standards/sist/4da4a79f-6903-41c3-bcb0-

The graphical symbol is standardized and registered as IEC 60417-6159-1 "Do not stare at light source".

Test data obtained according to ISO 9186-1 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.

	Reference No.
	ISO 7010-W079
	Referent
	Warning; Hot content
	Function
	To warn of hot content
	Image content
	Three parallel, vertical, s-shaped lines in a circle
Hazard	
Burn or scald if the contents are released for evan	anle in an accident or during maintenance

#### Safety sign W079: Warning; Hot content

Burn or scald if the contents are released, for example in an accident or during maintenance

#### Human behaviour that is intended to be caused after understanding the safety sign's meaning

Being aware of the high temperature of the content (e.g. liquid, gas or other media) and taking care to avoid contact if the content is released (e.g. from a pipe or container)

https://standards.iteh.ai/catalog/standards/sist/4da4a79f-6903-41c3-bc

Additional information 6687b9ced7c8/iso-7010-2019-amd-7-2023

Test data obtained according to ISO 9186-1 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.

If necessary, a supplementary sign shall be used to indicate the type of content and its temperature.

	D.C. N	
	Reference No.	
	ISO 7010-W080	
	Referent	
	Warning; Hot steam	
	Function	
	FUICTION	
	To warn of the emission of hot steam	
	Image content	
	Image content	
	Plume of steam, horizontal line	
—		
Hazard		
Emission of hot steam		
iTeh STANDARD PREVIEW		

## Safety sign W080: Warning; Hot steam

**Human behaviour that is intended to be caused after understanding the safety sign's meaning** Taking care to avoid being scalded by the emission of steam during normal operation

### ISO 7010:2019/Amd 7:2023

Additional information and ards.iteh.ai/catalog/standards/sist/4da4a79f-6903-41c3-bcb0-

The graphical symbol is standardized and registered as IEC 60417-5597 "Steam, low jet".

Test data obtained according to ISO 9186-1 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.
