

Designation: C706 – 13

Standard Specification for Limestone for Animal Feed Use¹

This standard is issued under the fixed designation C706; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification covers limestone supplied for use as a mineral supplement in animal feeds.

NOTE 1—The calcium needed for animal nutrition is customarily supplied by limestone. Such limestone must be sufficiently fine to blend with mixed feeds and yet be free from excessive dusting.

1.2 The values stated in SI units are to be regarded as standard. No other units of measurement are included in this standard, except for sieve frames which are given in inch-pound units in accordance with Specification E11.

1.3 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

3. Terminology

3.1 Definitions of terms applying to this specification appear in Terminology C51.

4. General Requirements

4.1 The product must be suitable for animal feeding.

5. Chemical Requirements

5.1 Limestone, as identified on feed labels, shall conform to the chemical requirements given in Table 1.

6. Physical Requirements

6.1 Sieve analysis and other physical requirements shall be specified by the purchaser.

7. Test Methods

7.1 *Chemical Analysis*—Unless otherwise agreed upon between the purchaser and the manufacturer, the chemical analysis of the limestone shall be conducted in accordance with Test Methods C25, C1271, or C1301.

7.2 *Particle Size*—Unless otherwise agreed upon between the purchaser and the manufacturer, the sieve analysis of the material shall be determined in accordance with Test Methods C110.

7.2.1 *Procedure*—If the entire sample is not to be dried, obtain lesser portions by riffing or quartering. Dry at between 115 to 120 °C to a constant mass and cool to room temperature. Obtain a 90 to 120-g dry sample by riffing or quartering. If the material tends to cake, break up the agglomerates with a soft rubber pestle. Quantitatively transfer the weighed sample to an 8-in. diameter standard sieve or set of sieves [for example, 2.00 mm, 850 μ m, 425 μ m, 250 μ m, 180 μ m, and 150 μ m (Nos. 10, 20, 40, 60, 80, and 100)] or other appropriate combination conforming to Specification E11). Conduct the sieve analysis in accordance with Test Methods C110.

8. Sampling, Inspection, etc.

8.1 The sampling, inspection, rejection, retesting, packaging, and marking shall be conducted in accordance with Methods C50.

9. Keywords

9.1 animal; feed; limestone; mineral; supplement
