

FINAL DRAFT International Standard

ISO/FDIS 16650

Bead wire

Fil d'acier pour tringle

ISO/TC 17/SC 17

Secretariat: **SAC**

Voting begins on:
2025-05-30

Voting terminates on:
2025-07-25

<https://standards.iteh.ai/catalog/standards/iso/fla6f1e6-31d1-48f6-9347-8dd27bae1685/iso-fdis-16650>

RECIPIENTS OF THIS DRAFT ARE INVITED TO SUBMIT, WITH THEIR COMMENTS, NOTIFICATION OF ANY RELEVANT PATENT RIGHTS OF WHICH THEY ARE AWARE AND TO PROVIDE SUPPORTING DOCUMENTATION.

IN ADDITION TO THEIR EVALUATION AS BEING ACCEPTABLE FOR INDUSTRIAL, TECHNOLOGICAL, COMMERCIAL AND USER PURPOSES, DRAFT INTERNATIONAL STANDARDS MAY ON OCCASION HAVE TO BE CONSIDERED IN THE LIGHT OF THEIR POTENTIAL TO BECOME STANDARDS TO WHICH REFERENCE MAY BE MADE IN NATIONAL REGULATIONS.

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Classification	2
5 Designation and ordering	2
5.1 Designation	2
5.2 Information to be supplied by the purchaser	2
6 Requirements	3
6.1 Chemical composition of steel	3
6.2 Metallic coating	3
6.3 Cumar weight	3
6.4 Mechanical properties	3
6.4.1 General	3
6.4.2 Tensile test results	3
6.4.3 Torsion test	5
6.5 Surface quality	5
6.5.1 General	5
6.5.2 Coating thickness	5
6.6 Delivery conditions	5
6.6.1 Unit package	5
6.6.2 Welds	5
6.6.3 Wire straightness	6
6.6.4 Residual torsion	6
6.7 Dimensions and tolerances	6
6.7.1 Size tolerances	6
6.7.2 Requirements for adhesion	6
7 Testing and inspection	6
7.1 Tests and inspection documents	6
7.2 Programme for specific inspection	6
7.3 Test procedures	6
7.3.1 Chemical composition	6
7.3.2 Tensile test	7
7.3.3 Torsion test	7
7.3.4 Diameter and out-of-roundness	7
7.3.5 Straightness	7
7.3.6 Residual torsions	7
7.3.7 Adhesion test	7
7.4 Retests	7
8 Marking, labelling, packaging and shelf life	7
Annex A (informative) Adhesion testing	9
Annex B (informative) Pulling out test clamp	12
Annex C (informative) Spool	13
Bibliography	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 17, *Steel*, Subcommittee SC 17, *Steel wire rod and wire products*.

This second edition cancels and replaces the first edition (ISO 16650:2004), which has been technically revised.

The main changes are as follows:

- the terms and definitions clause ([Clause 3](#)) has been revised;
- super tensile strength has been added in [Clause 4](#);
- the table of chemical composition (former Table 1) of steel has been deleted and subsequent tables have been renumbered;
- metallic coating ([6.2](#)) has been revised;
- cumar weight ([6.3](#)) has been added;
- the mechanical properties ([6.4](#)) has been revised;
- surface quality ([6.5](#)) has been revised;
- delivery conditions ([6.6](#)) has been revised;
- torsion test ([6.4.3](#)) has been revised;
- adhesion testing ([Annex A](#)) has been revised.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
