

Designation: F2755 – 14

Standard Safety Specification for Cautionary Labeling of Inflatable Air Mattresses¹

This standard is issued under the fixed designation F2755; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

INTRODUCTION

Since 2002 (until Jan. 1, 2008), the Consumer Product Safety Commission (CPSC) has received reports of 16 tragic deaths, mostly infants younger than 8 months of age, who were placed to sleep on air mattresses. Eleven suffocated in a facedown position on an air mattress, and five died as a result of suffocation after falling into gaps between the mattress and bed frame or mattress and adjacent furniture or wall.

1. Scope

1.1 This safety specification covers safety requirements aimed at providing cautionary labeling information for safer use of inflatable air mattresses (also known as “air beds,” collectively referred to herein as “inflatable air mattresses”). The intent of this safety specification is to reduce child (infant) injuries and fatalities caused by suffocation on inflatable air mattresses.

1.2 This safety specification covers all size inflatable air mattresses—including but not limited to full, queen, king, and twin sizes.

1.3 This safety specification does not cover inflatable air mattresses designed specifically for use in Durable Infant Products.

1.4 This safety specification is intended to reduce entrapment hazards to children and risk of suffocation to infants up to and including age 15 months.

1.5 This safety specification includes inflatable air mattresses intended for recreational, camping, and other indoor and outdoor uses.

1.6 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

¹ This specification is under the jurisdiction of ASTM Committee F15 on Consumer Products and is the direct responsibility of Subcommittee F15.63 on Inflatable Air Mattresses.

Current edition approved March 1, 2014. Published March 2014. DOI: 10.1520/F2755-14.

2. Referenced Documents

2.1 *ANSI Standards:*²

ANSI Z535.4 Standard for Product Safety Signs and Labels
ANSI Z535.6 Product Safety Information in Product Manuals, Instructions, and Other Collateral Materials

3. Safety Requirements

3.1 Soft and hard outer retail packaging or storage container, or both, of the product shall, on the principal display panel, include all of the cautionary information in accordance with 5.2. Each mattress shall have a permanent label or sewed-on tag located in a conspicuous location stating all of the cautionary information in accordance with 5.2.

3.2 On product labels with cautionary information shall be in contrasting color(s) to the background, permanent, and conspicuous.

3.3 On product labels shall use ANSI Z535.4 as a guide with respect to legibility, type of lettering, color, and symbol. A sample label is shown in Fig. 1.

3.4 The cautionary information may also be enhanced by different text or graphics.

4. Safety Instructions

4.1 ANSI Z535.6 shall be used as a guide with respect to the format and location of this information.

4.2 Instruction manuals provided with each inflatable air mattress shall include all of the following cautionary information:
