Standard Guide for Forms Used for Search and Rescue¹

This standard is issued under the fixed designation F1767; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

INTRODUCTION

Many organizations have been working in the Search and Rescue (SAR) community using the Incident Command System (ICS) framework. In doing so, these organizations have adapted the existing ICS forms to fit their needs. They have also found that some new forms needed to be developed in order to address problems or areas not considered in the fire-oriented forms. Some of these organizations have developed their own standard packet of forms that will address the typical needs of that organization. By addressing the appropriate actions called for by the average mission, these forms can focus the team members' activities into a standard operating procedure. This guide will show examples of form packets used by some SAR organizations.

1. Scope

1.1 This guide gives examples of forms used in the SAR community.

1.2 It is not the intent of this guide to recommend one form over another, but to make the user aware of the many different types of forms used. This guide does not purport to contain every form used in SAR, only a few examples of forms in each category.

1.3 These forms cover a great variety of the many aspects involved in SAR. This guide will attempt to give a few versions of forms used for each aspect identified. The user may choose which form best fits his particular need.

1.4 This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

2. Referenced Documents

2.1 The forms in this guide have been submitted by members of various organizations who are presently using them. In some cases the organization logo will identify the source of the submitted form. Use of logos on forms in this guide does not constitute an endorsement by either ASTM or the contributing SAR organization. Use of these displays are for the convenience and information of the user. 2.2 ICS National Training Curriculum—ICS Forms Catalog²

3. Significance and Use

3.1 This guide will give SAR personnel options in choosing a form that will fit their specific need. These forms will assist in the organization, management, and documentation of a search or rescue incident.

3.2 Additional forms will be categorized by topics such as management, investigation, training documentation, equipment maintenance, and reports. This guide will compare the original ICS forms with samples of those developed to parallel them for SAR.

3.3 Once categorized, an explanation will be given for each type of form. Some examples of these forms will be shown. Some contributors have included detailed instruction for the use of their forms.

3.4 This guide may serve as the basis for new forms to be created using some information found here.

4. Summary of Guide

4.1 This guide has been arranged so that the user can locate an example of a form by identifying the way that it is used, or where it fits within the Incident Command System.

8. Additional Forms for SAR Investigation

8.1 Search investigation very often plays an important role in the planning and the operations of an incident. This is quite different than a fire. The investigation may deal with the subjects' history or with current events such as possible sightings. Some organizations have developed forms to assist them that have no connection to the ICS.

8.2 Forms Used to Aid in the Investigation:

8.2.1 Subject Profile Forms—These are forms that are used to gather information about the person or persons that is (are) the subject of the search. Some groups use short forms that only compile basic information used in the initial phases of the search, and get more detail later. Other groups have very detailed forms that serve as the foundation of their investigation.

8.2.1.1 Examples found in Appendix X3:

(1) Lost Person Questionnaire (Fig. X3.1).

(2) Search and Rescue Circumstance (Fig. X3.2).

(3) Incident Missing Person Questionnaire (Fig. X3.3).

(4) Lost Person Worksheet (Fig. X3.4).

(5) ML Quick Sheet (Fig. X3.5).

(6) Notification of Search and/or Rescue (Fig. X3.6).

8.2.2 *Information Compiling Forms*—These forms will assist the investigators in gathering and compiling information. They cover everything from the documentation of the initial source of the clue (whether it is physical or verbal) to the sorting and logging of the clue.

8.2.2.1 Examples found in Appendix X3:

(1) Urban Interview Log (Fig. X3.7).

- (2) Daily Clue Log (Fig. X3.8).
- (3) ELT-DF Reports (Fig. X3.9).

10.1.1 Examples found in Appendix X3.

(1) PMI Usage and History (Fig. X3.15).

11. Additional Forms for SAR Reports and Critiques

11.1 These are forms used to report an incident. Some are formal reports used as a permanent record, while others are a general summary of information. Forms used in critiques are included here.

11.1.1 Examples found in Appendix X3:

- (1) Mission Debriefing Form (Fig. X3.16).

- 12.1.1.5 Structure Triage (Fig. X3.25).
- 12.1.1.6 Urban Interview Log (Fig. X3.7).

13. Miscellaneous SAR Forms

13.1 It is recommended that SAR organizations develop a packet of forms that fits their particular needs. They should analyze how they respond to their typical incident. A preplan

and a packet of forms could be made up to help guide them through the entire incident.

13.2 Examples found in Appendix X4:

(1) Public Information Summary—Incident Status (Fig. X4.1).

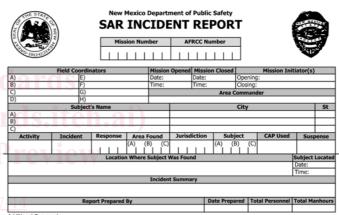

- (2) Intra-Agency Registration Firm (Fig. X4.2).
- (3) Call-out List (Fig. X4.3).

14. Form Packets

14.1 Included here is a form packet being used by the state of New Mexico. This packet is shown here to give an example of how an agency has developed a form packet to fit their specific needs. It is not the intention of this document to make this form packet a national standard. The purpose is to encourage SAR organizations to use the forms in this guide, or ones similar, to create their own form packet which will help to organize their SAR response more efficiently.

15. Alphabetical Index to Forms

To figure relevancy of clue (ROC) you must subjectively select a number (0 - 100) that indicates your best guess as to how relevant the clue is to the mission at the time the clue is found. Information such as age of the clue, possibility of the clue belonging to victim, confidence in resource who found the clue etc., should be considered.

ROC %

To figure relevancy of clue (ROC) you must subjectively select a number (1% to 99%) that indicates your best guess as to how relevant that clue is to the mission. To adequately do this, you must use as much information about the circumstances surrounding the clue as possible. Such as; age of the clue, the possibility that the clue was left by the subject, confidence in the SAR resource which found the clue, etc.
