Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	4
5 Requirements and types of LEDDBS	4
5.1 Rated voltage	4
5.2 Size of LEDDB display area	4
5.3 Types and requirements of LEDDBS controllers	5
5.4 Other requirements for controllers	5
5.5 Performance requirements	5
5.6 Classification of functional status	6
6 Construction	6
7 Requirements (Tests) of LEDDBS	6
7.1 General	6
7.2 Classification of tests	6
7.2.1 Type tests	6
7.2.2 Samples	7
7.2.3 Acceptance tests	8
7.3 Visual examination	8
7.4 Dimensions	8
7.5 Functional test	8
7.6 Performance test	8
7.7 Minimum visibility distance test	8
7.8 Flicker test	9
7.9 Colour test	9
7.10 Insulation resistance test	9
7.11 EMI/EMC test	9
7.12 Electrostatic discharge test	9
7.13 Endurance test	10
7.14 Vibration test	10
7.15 High temperature test	10
7.16 Cold test	10
7.17 Damp heat test	11
7.18 Ingress Test	11
7.19 Corrosion resistance test	11
7.20 Tests for wiring harness	11
7.20.1 General	11
7.20.2 Flammability test	11
7.20.3 Electrical properties	11
7.20.4 Flammability of corrugated sleeves	11
7.21 Reverse polarity test	11
7.22 High voltage test	11
7.23 Transient test on controllers	12
8 Marking	12
Annex A (normative) Additional functional requirement of LEDDBS	13
Annex B (normative) Test for corrosion resistance	16
Bibliography	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 204, *Intelligent transport systems*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
