

Designation: ~~B237 – 01 (Reapproved 2010)~~ B237 – 01 (Reapproved 2014)

Standard Specification for Refined Antimony¹

This standard is issued under the fixed designation B237; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification covers refined antimony in ingot, pig, or cake form.

1.2 The values stated in inch-pound units are to be regarded as standard. The values given in parentheses are mathematical conversions to SI units that are provided for information only and are not considered standard.

1.3 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to become familiar with all hazards including those identified in the appropriate Material Safety Data Sheet (MSDS) for this product/material as provided by the manufacturer, to establish appropriate safety and health practices, and determine the applicability of regulatory limitations prior to use.*

2. Referenced Documents

2.1 The following documents of the issue in effect on the date of material purchase form a part of this specification to the extent referenced herein.

2.2 *ASTM Standards:*²

[E29 Practice for Using Significant Digits in Test Data to Determine Conformance with Specifications](#)

[E88 Practice for Sampling Nonferrous Metals and Alloys in Cast Form for Determination of Chemical Composition](#)

3. Terminology

3.1 *Definitions of Terms Specific to This Standard:*

3.1.1 *cake, n*—the term *cake* as used in this specification is defined as a coalesced mass of antimony powder.

4. Ordering Information

4.1 Orders for refined antimony under this specification shall include the following information:

4.1.1 ASTM designation and year of issue,

4.1.2 Quantity (weight),

4.1.3 Name of material (Refined Antimony),

4.1.4 Size and shape (Section 7),

4.1.5 Grade (Table 1), and

4.1.6 Certification or test report, if specified (Section 14).

5. Materials and Manufacture

5.1 Refined antimony shall be supplied in commercial standard forms (for example, ingots, pigs, or cakes) in the following grades:

5.1.1 Grade A.

5.1.2 Grade B.

5.2 The grades of refined antimony shall be produced by any smelting and refining process from ore or recycled materials to meet the chemical requirements of this specification.

¹ This specification is under the jurisdiction of ASTM Committee B02 on Nonferrous Metals and Alloys and is the direct responsibility of Subcommittee B02.02 on Refined Lead, Tin, Antimony, and Their Alloys.

Current edition approved April 1, 2014. Published April 2014. Originally approved in 1995. Last previous edition approved in 2006 as B237 – 01 (2006) (2010). DOI: 10.1520/B0237-01R14; 10.1520/B0237-01R14.
