EUROPEAN STANDARD  
NORME EUROPÉENNE  
EUROPÄISCHE NORM

EN ISO 19902

December 2007

ICS 75.180.10

English Version

Petroleum and natural gas industries - Fixed steel offshore structures (ISO 19902:2007)

Industries du pétrole et du gaz naturel - Structures en mer fixes en acier (ISO 19902:2007)

Erdöl- und Erdgasindustrie - Gegründete Stahlplattformen (ISO 19902:2007)

This European Standard was approved by CEN on 3 November 2007.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

iTeh STANDARD PREVIEW

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

SIST EN ISO 19902:2008  
<https://standards.iteh.ai/catalog/standards/sist/3251fe86-98c9-4a3e-969a-4fc54a5a63c9/sist-en-iso-19902-2008>

## Foreword

This document (EN ISO 19902:2007) has been prepared by Technical Committee ISO/TC 67 "Materials, equipment and offshore structures for petroleum and natural gas industries" in collaboration with Technical Committee CEN/TC 12 "Materials, equipment and offshore structures for petroleum, petrochemical and natural gas industries" the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2008, and conflicting national standards shall be withdrawn at the latest by June 2008.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

## iTeh STANDARD PREVIEW Endorsement notice (standards.iteh.ai)

The text of ISO 19902:2007 has been approved by CEN as a EN ISO 19902:2007 without any modification.

A.16.2	General requirements .....	414
A.16.3	Description of the long-term wave environment .....	414
A.16.4	Performing the global stress analyses .....	420
A.16.5	Characterization of the stress range data governing fatigue .....	422
A.16.6	The long-term local stress range history .....	423
A.16.7	Determining the long-term stress range distribution by spectral analysis .....	423
A.16.8	Determining the long-term stress range distribution by deterministic analysis .....	430
A.16.9	Determining the long-term stress range distribution by approximate methods .....	432
A.16.10	Geometrical stress ranges .....	436
A.16.11	Fatigue resistance of the material .....	462
A.16.12	Fatigue assessment .....	464
A.16.13	Other causes of fatigue damage than wave action .....	466
A.16.14	Further design considerations .....	467
A.16.15	Fracture mechanics methods .....	468
A.16.16	Fatigue performance improvement of existing components .....	470
A.17	<b>Foundation design</b> .....	472
A.17.1	General .....	472
A.17.2	Pile foundations .....	472
A.17.3	General requirements for pile design .....	473
A.17.4	Pile capacity for axial compression .....	473
A.17.5	Pile capacity for axial tension .....	487
A.17.6	Axial pile performance .....	487
A.17.7	Soil reaction for piles under axial compression .....	490
A.17.8	Soil reaction for piles under lateral actions .....	491
A.17.9	Pile group behaviour .....	493
A.17.10	Pile wall thickness .....	493
A.17.11	Length of pile sections .....	494
A.17.12	Shallow foundations .....	494
A.18	Corrosion control .....	494
A.19	Materials .....	494
A.19.1	General .....	494
A.19.2	Design philosophy .....	495
A.19.3	Strength groups .....	497
A.19.4	Toughness classes .....	499
A.19.5	Applicable steels .....	499
A.19.6	Cement grout for pile-to-sleeve connections and grouted repairs .....	499
A.20	Welding, fabrication and weld inspection .....	500
A.20.1	General .....	500
A.20.2	Welding .....	500
A.20.3	Inspection .....	506
A.20.4	Fabrication .....	506
A.21	Quality assurance, quality control and documentation .....	507
A.21.1	General .....	507
A.21.2	Quality management system .....	507
A.21.3	Quality control plan .....	507
A.21.4	Inspection of installation aids and appurtenances .....	508

A.21.5	Inspection of loadout, sea-fastening and transportation .....	509
A.21.6	Installation inspection .....	509
A.21.7	Documentation .....	509
A.21.8	Drawings and specifications .....	510
A.22	Loadout, transportation and installation .....	513
A.22.1	General .....	513
A.22.2	Loadout and transportation .....	513
A.22.3	Transfer of the structure from the transport barge into the water .....	513
A.22.4	Placement on the sea floor and assembly of the structure .....	513
A.22.5	Pile installation .....	513
A.22.6	Installation of conductors .....	515
A.22.7	Topsides installation .....	515
A.22.8	Grounding of installation welding equipment .....	515
A.23	In-service inspection and structural integrity management .....	515
A.23.1	General .....	515
A.23.2	Data collection and update .....	518
A.23.3	Evaluation .....	519
A.23.4	Inspection strategy .....	525
A.23.5	Inspection programme .....	530
A.23.6	Inspection requirements .....	530
A.23.7	Default periodic inspection requirements .....	532
A.23.8	Personnel qualifications .....	533
A.24	Assessment of existing structures .....	534
A.24.1	General .....	534
A.24.2	Assessment process .....	534
A.24.3	Data collection .....	534
A.24.4	Structure assessment initiators .....	535
A.24.5	Acceptance criteria .....	535
A.24.6	Structure condition assessment .....	536
A.24.7	Actions assessment .....	538
A.24.8	Screening assessment .....	542
A.24.9	Resistance assessment .....	542
A.24.10	Prevention and mitigation .....	545
A.25	Structure reuse .....	545
A.25.1	General .....	545
A.25.2	Fatigue considerations for reused structures .....	545
A.25.3	Steel in reused structures .....	545
A.25.4	Inspection of structures to be reused .....	545
A.25.5	Removal and reinstallation .....	547
A.25.6	In-service inspection and structural integrity management .....	547
<b>Annex B</b>	(informative) CTOD testing procedures .....	548
B.1	Testing procedure requirements .....	548
B.2	Test-assembly welding .....	548
B.3	Number and location of CTOD specimens .....	548
B.4	Specimen preparation .....	549
B.5	Pre-compression .....	549
B.6	Sectioning .....	549
<b>Annex C</b>	(informative) Material category approach .....	553
C.1	Selection of material category (MC) .....	553
C.2	Selection of toughness class .....	553
C.3	Specific steel selection .....	553
<b>Annex D</b>	(informative) Design class approach .....	558
D.1	General .....	558
D.2	Specific steel selection .....	559
D.3	Welding and non-destructive inspection categories .....	565
