

Designation: E2279 - 09 E2279 - 15

Standard Practice for Establishing the Guiding Principles of Property <u>Asset</u> Management¹

This standard is issued under the fixed designation E2279; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (\$\epsilon\$) indicates an editorial change since the last revision or reapproval.

1. Scope

- 1.1 This practice covers the creation of a set of guiding principles to be applied to the practice of property management. These principles will enunciate the objectives and intent of the property (also known as "asset") management community, stress simplified procedures, promote less rather than more, judgment rather than "by-the-book" decisions, and encourage the adoption of "best practices."
- 1.2 The acceptance of these guiding principles has the potential to foster a problem-solving mentality within the property management community, encourage the use of innovative and cost-effective practices, create greater commonality between government and industry practices, and increase the ability of organizations to respond to changing needs and business conditions.
- 1.3 The potential economic and practical benefits of operating in a manner consistent with a set of guidelines outweigh concerns about the loss of predictability, uniformity, and consistency.
- 1.4 The intent of this practice is to provide property management guidance for tangible personal property; however, many of the principles appropriately apply to other types of property.

- 3.1.1 acquisition cost, n—purchase price paid for property and any appropriate subsequent improvements to it. Includes cash paid or fair value received and material amounts of preparation cost such as inspection, testing, and installation.
 - 3.1.2 agency, n—government organization, regardless of level (federal, state, or local).
 - 3.1.3 *best value, n*—expected outcome of an action, in the entity's estimation, which provides the greatest overall benefit. **Federal Acquisition Regulations**⁶
- 3.1.4 care and handling, n—includes the costs of completing, repairing, converting, rehabilitating, operating, preserving, protecting, insuring, packing, storing, conserving, and transporting of property, and—in the case of property that is dangerous to public health, safety, and security—destroying or rendering the property useless for its original purpose.
 - 3.1.5 *company*, *n*—a for-profit organization.
 - 3.1.6 *entity, n*—an agency, institution, or organization, or any component thereof.
 - 3.1.7 excess property—property no longer required by the owning entity.
- 3.1.8 *expendable property, n*—items that may be expended, used up in service, also items that may be more easily, safely, and economically replaced than applying significant efforts and resources to rescue, salvage, maintain, control, or protect.
- ⁶ The definition of the term *best value* is adapted from Federal Acquisition Regulations, Part 2.1: Definitions of Words and Terms, available online from http://farsite.hill.af.mil, 1-August 2009:13 November 2014.

3.1.8.1 Discussion—

The timing and level of control is circumstantial. Examples in a production environment may include drill bits and grinding wheels. As an adjective, able to be sacrificed to achieve an objective, especially a military one.

3.1.9 *institution*, *n*—a not-for-profit, nongovernmental organization.

Federal Acquisition Regulations

3.1.10 *impairment or impairments*, *n*—is a condition that exists when the carrying amount of a long-lived asset (asset group) exceeds its fair value. **FASB 144**

3.1.10.1 Discussion—

An impairment loss shall be recognized only if the carrying amount of a long-lived asset (asset group) is not recoverable and exceeds its fair value. An impairment loss shall be measured as the amount by which the carrying amount of a long-lived asset (asset group) exceeds it fair value.

3.1.11 *materiality, n*—magnitude of an omission or misstatement of accounting data that misleads financial statement readers or decision makers; materiality is judged both by relative amount and by the nature of the item.

3.1.11.1 Discussion—

For example, even a small theft by the president of a company is material. If an item is material, it should be disclosed in the body of the financial statements or footnotes (Securities and Exchange Commission Staff Accounting Bulletin). In determining whether items or amounts of cost are material or immaterial, the following quantitative and qualitative criteria should be considered where appropriate but no one criterion is necessarily determinative: (1) the absolute dollar amount involved, (2) the relationship between a cost item/occurrence and a cost objective, (3) the criticality of an item in terms of importance or use, (4) the cumulative impact of individually immaterial items, and (5) the cost of administrative processing (Federal Acquisition Regulations).

- 3.1.12 *personal property*—property owned or subject to ownership other than real estate, includes items determined to be non-real estate moveable property.
- 3.1.13 property management—monitoring and control function charged with assuring that organizational processes related to the lifecycle management of property support organization objectives represent sound business practice and are compliant with applicable regulations, contract requirements, standards, and policies.
- 3.1.14 property management system, n—subset of existing organizational processes related to the lifecycle management of property.

3.1.14.1 Discussion—

These processes represent sound practice and are compliant with applicable standards, policies, regulations, and contractual requirements.
