

Standard Specification for 6 mm Projectiles Used with Airsoft Guns¹

This standard is issued under the fixed designation F2679; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

^{ε1} NOTE—Editorially corrected 4.1 in September 2015.

1. Scope

1.1 This specification establishes requirements and characteristics of airsoft gun projectiles which help define whether an airsoft gun is suitable for use in the sport commonly called airsoft, air soft, or soft air. Furthermore, the specification establishes minimum warning and package labeling to help ensure that the low energy airgun projectiles are used in a safe manner and that the risk of injury is reduced.

1.2 *Limitations*—This specification does not cover the following categories of projectiles: Projectiles covered by Consumer Safety Specification F590 (non-powder guns projectiles), Specification F1979 (paintballs), Specification F2573, and Specification F2574; liquid filled or metallic projectiles, toy products, and non-recreational projectiles such as those used by law enforcement, scientific, or military agencies.

1.3 The values stated in SI units are to be regarded as the standard. The values given in parentheses are for information only.

1.4 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

2. Referenced Documents

2.1 *ASTM Standards*:²

F590 Consumer Safety Specification for Non-Powder Gun Projectiles and Propellants

F1979 Specification for Paintballs Used in the Sport of Paintball

F2573 Specification for Low Velocity Resilient Material Projectile

F2574 Specification for Low Velocity Projectile Marker

F2654 Specification for Airsoft Gun Warnings

F2748 Specification for Airsoft Guns

3. Terminology

3.1 *Definitions of Terms Specific to This Standard*:

3.1.1 *airsoft gun*—commonly referred to as airsoft gun, air soft gun, or soft air gun, or any combination thereof, or a low energy air gun (LEAG), refers to a device specifically designed to expel a projectile as described in this standard, by the release of energy by compressed air, compressed gas, mechanical springs, battery, or a combination thereof, that complies with Specification F2654 and Specification F2748.

3.1.2 *airsoft gun projectile*—is spherical, of 6 mm (.24 cal) diameter, non-metallic and non-liquid filled projectile to be used in an airsoft gun.

3.1.2.1 *Discussion*—These are also referred to as airsoft BB's.

4. General Requirements

4.1 *Size (Diameter of Airsoft Gun Projectile)*—The diameter of the airsoft gun projectile labeled 6 mm shall measure between 5.8 mm (0.228 in.) and 6.0 mm (0.236 in.), as measured at two perpendicular axes.

4.2 *Weight*—The airsoft gun projectiles shall weigh within +5 % and –10 % of the indicated weight. Example the projectile labeled 0.12 g shall weigh between 0.108 and 0.126 g.

5. Product Packaging

5.1 *General Instructions*—The size of the print for warnings, instructions and manufacturer's information shall be of a type size of at least 8 points. The letters in the word "WARNING" shall be at least 50 % larger than the letters in the other words in the cautionary statement.

5.2 *Warning Information*—A cautionary statement on packaging of all airsoft gun projectiles shall convey the following information or its equivalent at a minimum:

5.2.1 A signal word "WARNING",

¹ This specification is under the jurisdiction of ASTM Committee F08 on Sports Equipment, Playing Surfaces, and Facilities and is the direct responsibility of Subcommittee F08.27 on Airsoft.

Current edition approved April 1, 2015. Published April 2015. Originally approved in 2007. Last previous edition approved in 2013 as F2679 – 13. DOI: 10.1520/F2679-15E01.
