

Designation: E2995 – 15a

## Standard Specification for ASTM Thermohydrometers with Integral Low-Hazard Thermometers<sup>1</sup>

This standard is issued under the fixed designation E2995; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon ( $\varepsilon$ ) indicates an editorial change since the last revision or reapproval.

#### 1. Scope

1.1 This specification covers glass thermohydrometers of various scale graduation systems, intended for use in a variety of ASTM Test Methods.

1.2 The thermohydrometers presented in this standard are not exact replacements for the thermohydrometers in Specification E100; the thermometers have larger maximum permissible scale errors than do their Hg-filled counterparts. The user should decide if these thermohydrometers are appropriate for use in his or her application.

1.3 This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

#### 2. Referenced Documents

2.1 ASTM Standards:<sup>2</sup>

- D287 Test Method for API Gravity of Crude Petroleum and Petroleum Products (Hydrometer Method)
- D1250 Guide for Use of the Petroleum Measurement Tables
- D3290 Specification for Bond and Ledger Papers for Permanent Records (Withdrawn 2010)<sup>3</sup>
- E77 Test Method for Inspection and Verification of Thermometers

E100 Specification for ASTM Hydrometers

- E126 Test Method for Inspection, Calibration, and Verification of ASTM Hydrometers
- E344 Terminology Relating to Thermometry and Hydrometry

#### 2.2 ISO Standards

ISO 1768:1975 Glass Hydrometers—Conventional Value for the Thermal Cubic Expansion Coefficient (for Use in the Preparation of Measurement Tables for Liquids)

#### 3. Terminology

3.1 *Definitions*—The definitions given in Terminology E344 apply.

3.2 Definitions of Terms Specific to This Standard:

3.2.1 *ledger paper*, *n*—a paper characterized by strength, high tearing resistance, eraseability, water resistance, ink receptivity, uniformity of surface, and smoothness.

3.2.1.1 *Discussion*—Originally, ledger paper was used especially for pen and ink records. Most ledger papers are surface sized, frequently subjected to appreciable wear, and must have a high degree of permanence and durability.

3.2.2 *length of the scale, n*—length of the nominal range in the stem, not including graduations extending above and below the nominal limits.

3.2.3 *thermohydrometer*, *n*—glass hydrometer having an integral thermometer.

3.2.4 top of the thermohydrometer, n-top of the finished instrument.

3.2.5 *total length*, *n*—overall length of the finished instrument.

#### 4. Specifications

4.1 Thermohydrometers shall conform to the detailed specifications in Table 1 and to the general requirements specified in Sections 5 - 15.

4.2 Thermohydrometers shall conform to the inspection criteria found in Section 16 and the calibration and verification criteria found in Section 14.

4.3 Thermohydrometers manufactured to previous revisions of this specification shall retain the same ASTM status as those meeting current specifications.

4.4 At time of purchase, scale errors shall not exceed the maximum permissible scale error found in Table 1.

Note 1—Caution—Users should be aware that both temperature and density indications of thermohydrometers may change with rough

<sup>&</sup>lt;sup>1</sup>This specification is under the jurisdiction of ASTM Committee E20 on Temperature Measurement and is the direct responsibility of Subcommittee E20.05 on Liquid-in-Glass Thermometers and Hydrometers.

Current edition approved Nov. 1, 2015. Published November 2015. Originally approved in 1910. Last previous edition approved in 2015 as E2995 – 15. DOI: 10.1520/E2995-15A
