

Designation: ~~D5211~~–~~12~~ D5211 – 16

## Standard Specification for Xylenes for *p*-Xylene Feedstock<sup>1</sup>

This standard is issued under the fixed designation D5211; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon ( $\epsilon$ ) indicates an editorial change since the last revision or reapproval.

### 1. Scope\*

- 1.1 This specification covers xylenes for *p*-xylene feedstock. These xylenes typically are extracted from reformat.
- 1.2 The following applies to all specified limits in this specification: for purposes of determining conformance with this specification, an observed value or calculated value shall be rounded off “to the nearest unit” in the last right hand digit used in expressing the specification limit, in accordance with the rounding-off method of Practice [E29](#).
- 1.3 The values stated in SI units are to be regarded as standard. The values given in parentheses are for information only.
- 1.4 Consult current OSHA regulations, ~~suppliers’~~ Material suppliers’ Safety Data Sheets (~~MSDS~~), (SDS), and local regulations for all materials used in this specification.
