Textile machinery and accessories — Cylindrical tubes —

Part 4: Tubes for textured yarns

*Matériel pour l'industrie textile — Tubes cylindriques —
Partie 4: Tubes pour fils texturés (stretch)*

Reference number
ISO 3914-4 : 1989 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 3914-4 was prepared by Technical Committee ISO/TC 72, *Textile machinery and allied machinery and accessories*.

ISO 3914 will consist of the following parts, under the general title *Textile machinery and accessories — Cylindrical tubes* :

- *Part 1: Recommended values of inner diameters and lengths*
- *Part 2: Tubes for open-end spinning machines*
- *Part 3: Tubes for tape yarns*
- *Part 4: Tubes for textured yarns*
- *Part 5: Tubes for flat drawn filament yarns*
- *Part 6: Tubes for cross-winding and twisting*
