

Designation: A895 – 89 (Reapproved 2017)

## Standard Specification for Free-Machining Stainless Steel Plate, Sheet, and Strip<sup>1</sup>

This standard is issued under the fixed designation A895; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon ( $\epsilon$ ) indicates an editorial change since the last revision or reapproval.

### 1. Scope

1.1 This specification covers hot-finished or cold-finished plate, sheet, and strip in the more commonly used types of stainless free machining steels designed especially for optimum machinability and for general corrosion and high temperature service. Stainless and heat-resisting plate, sheet, and strip, other than free-machining types, are covered in separate specifications.

1.2 The values stated in inch-pound units are to be regarded as standard. The values given in parentheses are mathematical conversions to SI units that are provided for information only and are not considered standard.

1.3 *This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.*

### 3. Terminology

#### 3.1 Definitions of Terms Specific to This Standard:

3.1.1 *plate*—material  $\frac{3}{16}$  in. (4.8 mm) and over in thickness and over 10 in. (250 mm) in width.

3.1.2 *sheet*—material under  $\frac{3}{16}$  in. (5.0 mm) in thickness and 24 in. (600 mm) and over in width.

3.1.3 *strip*—material under  $\frac{3}{16}$  in. (5.0 mm) in thickness and under 24 in. (600 mm) in width.

### 4. Process

4.1 The steel shall be made by one or more of the following processes: electric-arc, electric-induction, or other suitable commercial processes.

4.2 Plate, sheet, and strip may be furnished in one of the conditions listed in [Table 1](#).

### 5. Ordering Information

5.1 Orders for material under this specification should include the following information:

5.1.1 Quantity (weight or number of pieces),

5.1.2 Type or UNS designation ([Table 2](#)),

5.1.3 Form (plate, sheet, or strip),

5.1.4 Condition ([Table 2](#)),

5.1.5 Finish ([9.2](#)),

5.1.6 Dimensions (thickness, width, and length),

5.1.7 Edge, strip only (see Specification [A480/A480M](#)),

5.1.8 ASTM designation and date of issue,

5.1.9 Additions to specification or special requirements,

5.1.10 Preparation for delivery, and

5.1.11 Marking requirements.

### 6. Chemical Composition

6.1 The chemical composition shall conform to the requirements specified in [Table 2](#).

6.2 Methods and practices relating to chemical analysis required by this specification shall be in accordance with Test Methods, Practices, and Terminology [A751](#).

### 7. Hardness Requirement

7.1 The material shall conform to the hardness requirements as specified in [Table 3](#).
