

Designation: D4363 – 17

# Standard Specification for Thermoplastic Chlorinated Polyethylene (CM) Jacket for Wire and Cable<sup>1</sup>

This standard is issued under the fixed designation D4363; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reappraisal. A superscript epsilon ( $\epsilon$ ) indicates an editorial change since the last revision or reappraisal.

## 1. Scope\*

1.1 This specification covers thermoplastic chlorinated polyethylene (CM) compounds suitable for use as an outer covering or jacket on electrical cables.

1.2 These jacket materials are suitable for use on cables which will be installed at temperatures above  $-35^{\circ}\text{C}$ .

1.3 The values stated in inch-pound units are regarded as standard. The values given in parentheses are mathematical conversions to SI units that are provided for information only and are not considered standard.

1.4 *This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.*

## 3. Terminology

3.1 *Definitions:* For definitions of terms used in this specification refer to Terminology [D1711](#).

3.2 *Definitions of Terms Specific to This Standard:*

3.2.1 *aging, (act of), n*—exposure of materials to air at a temperature of  $121^{\circ}\text{C}$  for 168 h and oil at  $100^{\circ}\text{C}$  for 18 h.

## 4. Physical Properties

4.1 Thermoplastic jackets shall conform to the requirements for physical properties specified in [Table 1](#).

4.2 When used on single-conductor non-shielded cable rated 2001 to 5000 V phase to phase, the jacket shall also conform to the requirements for surface resistivity and U-bend discharge prescribed in [Table 2](#).

## 5. Sunlight and Weather Resistance Requirements

5.1 If sunlight and weather resistance are required of the jackets, the jackets shall conform to the requirements specified in [Table 3](#).

## 6. Sampling

6.1 Sample the jacket in accordance with Methods [D2633](#).

## 7. Test Methods

7.1 Test the jacket in accordance with Methods [D2633](#). If the sunlight and weather resistance test is required, perform it in accordance with Practice [D1499](#) and Practice [G153](#).

## 8. Keywords

8.1 chlorinated polyethylene; heat distortion; oil immersion; sunlight resistance; tensile strength; tensile stress; thermoplastic; weather resistance
