Important notice

The present document can be downloaded from the
[ETSI Search & Browse Standards](#) application.

The present document may be made available in electronic versions and/or in print. The content of any electronic and/or print versions of the present document shall not be modified without the prior written authorization of ETSI. In case of any existing or perceived difference in contents between such versions and/or in print, the prevailing version of an ETSI deliverable is the one made publicly available in PDF format on [ETSI deliver](#) repository.

Users should be aware that the present document may be revised or have its status changed, this information is available in the [Milestones listing](#).

If you find errors in the present document, please send your comments to the relevant service listed under [Committee Support Staff](#).

If you find a security vulnerability in the present document, please report it through our [Coordinated Vulnerability Disclosure \(CVD\)](#) program.

Notice of disclaimer & limitation of liability

The information provided in the present deliverable is directed solely to professionals who have the appropriate degree of experience to understand and interpret its content in accordance with generally accepted engineering or other professional standard and applicable regulations.

No recommendation as to products and services or vendors is made or should be implied.

No representation or warranty is made that this deliverable is technically accurate or sufficient or conforms to any law and/or governmental rule and/or regulation and further, no representation or warranty is made of merchantability or fitness for any particular purpose or against infringement of intellectual property rights.

In no event shall ETSI be held liable for loss of profits or any other incidental or consequential damages.

Any software contained in this deliverable is provided "AS IS" with no warranties, express or implied, including but not limited to, the warranties of merchantability, fitness for a particular purpose and non-infringement of intellectual property rights and ETSI shall not be held liable in any event for any damages whatsoever (including, without limitation, damages for loss of profits, business interruption, loss of information, or any other pecuniary loss) arising out of or related to the use of or inability to use the software.

Copyright Notification

Contents

Intellectual Property Rights	6
Foreword.....	6
Modal verbs terminology.....	6
1 Scope	7
2 References	7
2.1 Normative references	7
2.2 Informative references.....	7
3 Definition of terms, symbols and abbreviations.....	8
3.1 Terms.....	8
3.2 Symbols.....	9
3.3 Abbreviations	9
4 Telecom Network Identity Solution Overview	10
4.1 General Information	10
4.2 Identity Solutions in the Previous Generations of Telecom Networks.....	10
4.3 Recent Trends.....	11
5 Key Issues of current Telecom Network Identity Systems	11
5.1 General Information	11
5.2 Key Issue#1: Lack of identity attribute extension	11
5.3 Key Issue#2: Lack of cross-domain authentication.....	11
5.4 Key Issue#3: Derived identity challenges	12
5.5 Key Issue#4: Difficulty achieving attribute-based service authorization	12
5.6 Key Issue#5: Identity roaming	12
5.7 Key Issue#6: Dynamic/On-demand network access and service onboarding	12
5.8 Summary	13
6 User-Centric Identity (UCDID) for Telecom Networks	13
6.1 Overview	13
6.2 UCDID Design.....	13
6.2.1 UCDID structure.....	13
6.2.1.1 Introduction.....	13
6.2.1.2 Identifier.....	14
6.2.1.3 Profile.....	14
6.2.1.3.1 General information.....	14
6.2.1.3.2 Document	14
6.2.1.3.3 Verifiable Credential	15
6.2.1.4 UCDID composition	16
6.3 Telecom-Native UCDID System.....	17
6.3.1 The concept of multi-domain trust.....	17
6.3.2 UCDID PDL service in telecom networks.....	17
6.3.3 Proposed Telecom-native UCDID service architecture	18
6.3.3.1 General Information	18
6.3.3.1.1 IDM (Identity Credential Management function).....	18
6.3.3.1.2 dSPR (decentralized Shared Profile Repository).....	18
6.3.3.2 Single domain UCDID service architecture	18
6.3.3.2.1 Diagram	18
6.3.3.2.2 UE context.....	19
6.3.3.2.3 NF context	19
6.3.3.3 Multi-domain UCDID service architecture	20
7 UCDID-based Service Procedures	21
7.1 UCDID Management	21
7.1.1 UCDID profile publication	21
7.1.2 UCDID profile publication with additional UE credential authentication.....	21
7.1.3 UCDID cross-domain synchronization.....	22

7.2	Credentials Management	23
7.2.1	Key credential application	23
7.2.1.1	General information	23
7.2.1.2	Application of asymmetric key credential.....	23
7.2.1.3	Application of symmetric key credential	25
7.2.2	Application of attribute credential	25
7.3	Authentication	26
7.3.1	General introduction	26
7.3.2	UE authentication procedure.....	27
7.3.3	Decentralized identifier-based authentication for network service Onboarding	28
7.4	UE Authorization	30
7.5	Credential Circulation	31
7.5.1	Global Issuer List.....	31
7.5.2	UCDID Migration among different dSPR regions.....	32
8	Security Aspect	34
9	Conclusion.....	34
Annex A (informative):	W3C Decentralized Identity (DID).....	35
Annex B (informative):	Comparison of telecom UCDID and W3C DID	36
Annex C (informative):	European Blockchain Services Infrastructure (EBSI)	38
History		39

List of Tables

Table 1: Attributes in the document element of a UCDID	15
Table 2: Data fields of a verifiable credential for telecom-native UCDID.....	15
Table 3: Symmetric key fields.....	25
Table B.1: Field attributes defining UCDID	36

List of Figures

Figure 1: A general structure of UCDID for telecom networks	14
Figure 2: Service architecture supporting telecom-native UCDID in a single domain	18
Figure 3: Service architecture supporting telecom-native UCDID in multiple domain	20
Figure 4: UCDID publishing procedure	21
Figure 5: UCDID publishing with authentication procedure	21
Figure 6: Synchronization procedure between two dSPRs.....	22
Figure 7: Key credential generation procedure	24
Figure 8: Symmetric key generation procedure	25
Figure 9: Attribute credential application procedure.....	26
Figure 10: UE registration and authentication procedure with UCDID	27
Figure 11: On-demand/dynamic network service access based on Decentralized Identifier authentication	29
Figure 12: Attribute-Based Authorization (ABA).....	30
Figure 13: Attribute-based authorization procedure.....	31
Figure 14: Global issuer list on dSPRs in two different regions	31
Figure 15: UCDID migration procedure	32
