Important notice

The present document can be downloaded from the
[ETSI Search & Browse Standards](#) application.

The present document may be made available in electronic versions and/or in print. The content of any electronic and/or print versions of the present document shall not be modified without the prior written authorization of ETSI. In case of any existing or perceived difference in contents between such versions and/or in print, the prevailing version of an ETSI deliverable is the one made publicly available in PDF format on [ETSI deliver](#) repository.

Users should be aware that the present document may be revised or have its status changed, this information is available in the [Milestones listing](#).

If you find errors in the present document, please send your comments to the relevant service listed under [Committee Support Staff](#).

If you find a security vulnerability in the present document, please report it through our [Coordinated Vulnerability Disclosure \(CVD\)](#) program.

Notice of disclaimer & limitation of liability

The information provided in the present deliverable is directed solely to professionals who have the appropriate degree of experience to understand and interpret its content in accordance with generally accepted engineering or other professional standard and applicable regulations.

No recommendation as to products and services or vendors is made or should be implied.

No representation or warranty is made that this deliverable is technically accurate or sufficient or conforms to any law and/or governmental rule and/or regulation and further, no representation or warranty is made of merchantability or fitness for any particular purpose or against infringement of intellectual property rights.

In no event shall ETSI be held liable for loss of profits or any other incidental or consequential damages.

Any software contained in this deliverable is provided "AS IS" with no warranties, express or implied, including but not limited to, the warranties of merchantability, fitness for a particular purpose and non-infringement of intellectual property rights and ETSI shall not be held liable in any event for any damages whatsoever (including, without limitation, damages for loss of profits, business interruption, loss of information, or any other pecuniary loss) arising out of or related to the use of or inability to use the software.

Contents

Intellectual Property Rights	5
Foreword.....	5
Modal verbs terminology.....	5
1 Scope	6
2 References	6
2.1 Normative references	6
2.2 Informative references.....	6
3 Definition of terms, symbols and abbreviations.....	7
3.1 Terms.....	7
3.2 Symbols.....	7
3.3 Abbreviations	7
4 Fine-grained EC metering in mixed deployment environments.....	9
4.1 EC measurement in 6G networks	9
4.1.1 Importance of fine-grained EC measurement	9
4.1.2 Key features of fine-grained EC measurement	9
4.1.3 Techniques and approaches enabling fine-grained EC metering	10
4.1.4 Service types impacting EC	12
4.2 Use cases and metrics.....	13
4.2.1 Use cases of EC measurement.....	13
4.2.1.1 Use case on media streaming carbon footprint transparency	13
4.2.1.2 Use case on digital sobriety.....	13
4.2.1.3 Use case on economic incentives for digital sobriety.....	13
4.2.1.4 Use case on behavioural incentives for digital sobriety.....	13
4.2.1.5 Use case on watch TV over 5G.....	13
4.2.1.6 Use case on any Service provider	13
4.2.1.7 Use case on carbon certificate as a service.....	13
4.2.1.8 Use case on energy profiling on network nodes.....	14
4.2.2 Key Metrics for EC measurement.....	14
4.2.2.1 Metric of EC of a single user end-to-end session.....	14
4.2.2.2 Metric of EC of a HW component/device.....	14
4.2.2.3 Metric of EC measurement of a software component	14
4.2.2.4 Metric of EC measurement of a software processes	15
4.2.2.5 Metric of EC measurement of a complete service.....	15
4.2.2.6 Metric of EC of virtualized environment	15
4.2.2.7 Metric of residual EC of a service.....	16
4.2.2.8 Metric of residual EC of a user session.....	16
4.2.2.9 Metric of energy production of local green sources.....	16
4.3 Deployment of EC measurement techniques.....	17
4.3.1 Measurement points in the network.....	17
4.3.2 Data reporting and feedback requirements	18
5 Architecture enhancement with PDL service capability for supporting End-to-End (E2E) EC data collection	18
5.1 Background	18
5.2 PDL Overview.....	19
5.3 Architecture enhancement with PDL service capability.....	19
5.3.1 Overview of existing telecom network architecture (5G).....	19
5.3.2 Architecture enhancement to telecom networks	20
5.3.2.1 General architecture	20
5.3.2.2 Reference point representation.....	20
5.3.2.2.1 Option#1: EIF directly interfacing with cUPFs	20
5.3.2.2.2 Option#2: EIF indirectly interfacing with cUPFs via network domain CP NFs.....	21
5.3.2.3 Additional functionalities.....	22
5.3.2.3.1 Access control	22
5.3.2.3.2 Policy enforcement with smart contracts.....	22

5.3.2.3.3	Zero-Knowledge Proof (ZKP).....	22
5.3.2.3.4	On-Chain/Off-Chain Data Storage	22
5.4	Summary	23
6	Distributed consensus mechanisms for EC metering data post-verification and service enforcement with smart contracts.....	23
6.1	Post-verification of EC Metering Data	23
6.1.1	General introduction	23
6.1.2	EC data distributed verification	24
6.1.2.1	Single-domain EC data aggregation.....	24
6.1.2.2	Cross-domain EC data verification	25
6.1.3	Real-time auditability and monitoring	25
6.1.4	Robustness through multi-tool attestation.....	26
6.2	Smart contracts for service enforcement	26
6.2.1	Smart Contract Design.....	26
6.2.2	Usage Scenarios and Invocation Mechanisms	27
6.2.3	Deployment and Governance.....	27
7	Conclusion.....	27
	History	28
