Foreword

This Technical Specification (TS) has been produced by ETSI Technical Committee Satellite Earth Stations and Systems (SES).

The contents of the present document are subject to continuing work within TC-SES and may change following formal TC-SES approval. Should TC-SES modify the contents of the present document it will then be republished by ETSI with an identifying change of release date and an increase in version number as follows:

Version 3.m.n

where:

- the third digit (n) is incremented when editorial only changes have been incorporated in the specification;
- the second digit (m) is incremented for all other types of changes, i.e. technical enhancements, corrections, updates, etc.

The present document is part 3, sub-part 22 of a multi-part deliverable covering the GEO-Mobile Radio Interface Specifications (Release 3); Third Generation Satellite Packet Radio Service, as identified below:

Part 1: "General specifications";

Part 2: "Service specifications";

Part 3: "Network specifications":

- Sub-part 1: "Network Functions";
- Sub-part 2: "Network Architecture";
- Sub-part 3: "Numbering, addressing and identification";
- Sub-part 4: "Organization of Subscriber Data";
- Sub-part 5: "Technical realization of Supplementary Services";
- Sub-part 6: "Location Registration and Position Identification Procedures";
- Sub-part 7: "Discontinuous Reception (DRX)";
- Sub-part 8: "Support of Dual-Tone Multifrequency Signalling (DTMF)";
- Sub-part 9: "Security related Network Functions";
- Sub-part 10: "Functions related to Mobile Earth Station (MES) in idle mode";
- Sub-part 11: "Technical realization of the Short Message Service (SMS) Point-to-Point (PP)";
- Sub-part 12: "Technical realization of the Short Message Service Cell Broadcast (SMSCB)";
