

# ETSI TS 101 376-4-14 v3.3.1 (2012-12)

**GEO-Mobile Radio Interface Specifications (Release 3);  
Third Generation Satellite Packet Radio Service;  
Part 4: Radio interface protocol specifications;  
Sub-part 14: Mobile Earth Station (MES) -  
Base Station System (BSS) interface;  
Radio Link Control/Medium  
Access Control (RLC/MAC) protocol;  
lu Mode;  
GMR-1 3G 44.160**

| 4.2.1 RLC function.....                                           | 17 |
| 4.2.2 MAC layer function.....                                     | 17 |
| 4.3 Service primitives.....                                       | 18 |
| 4.3.1 MAC to Physical Layer Primitives.....                       | 18 |
| 4.3.2 PDCP to RLC Primitives .....                                | 19 |
| 4.3.2.1 Primitives .....                                          | 19 |
| 4.3.2.2 Primitive parameters .....                                | 19 |
| 4.3.3 RRC to RLC Primitives .....                                 | 20 |
| 4.3.3.1 Primitives .....                                          | 20 |
| 4.3.3.2 Primitive parameters .....                                | 21 |
| 4.3.4 RRC to MAC Primitives.....                                  | 21 |
| 4.3.4.1 Primitives .....                                          | 21 |
| 4.3.4.2 Primitive Parameters .....                                | 22 |
| 4.4 Services required from lower layers.....                      | 23 |
| 5 Introduction to the Medium Access Control (MAC) procedures..... | 24 |
| 5.1 General .....                                                 | 24 |
| 5.2 Multiplexing principles .....                                 | 24 |
| 5.2.1 Temporary Block Flow .....                                  | 24 |
| 5.2.2 Temporary Flow Identity .....                               | 24 |
| 5.2.2.1 Temporary Flow Identity for PDCH .....                    | 24 |
| 5.2.2.2 Temporary Flow Identity for DCH .....                     | 24 |
| 5.2.3 Uplink State Flag .....                                     | 25 |
| 5.2.4 Medium Access modes .....                                   | 25 |
| 5.2.4.1 Medium Access modes for PDCH .....                        | 25 |
| 5.2.4.2 Medium Access modes for DCH .....                         | 25 |
| 5.2.5 Multiplexing of GPRS and future mobile earth stations ..... | 25 |
| 5.3 MAC States .....                                              | 25 |
| 5.3.1 MAC-Idle state .....                                        | 25 |
| 5.3.1.1 General .....                                             | 25 |
| 5.3.1.2 Establishment of a PDCH .....                             | 25 |
| 5.3.1.3 Establishment of a DCH.....                               | 25 |
| 5.3.2 MAC-Shared state .....                                      | 26 |
| 5.3.2.1 General .....                                             | 26 |

|           |                                                                       |    |
|-----------|-----------------------------------------------------------------------|----|
| 5.3.2.2   | Release of all PDCHs .....                                            | 26 |
| 5.3.2.3   | Establishment of a DCH .....                                          | 26 |
| 5.3.2.4   | Radio bearer reconfiguration .....                                    | 26 |
| 5.3.3     | MAC-DTM state .....                                                   | 26 |
| 5.3.3.1   | General .....                                                         | 26 |
| 5.3.3.2   | Release of all PDCHs .....                                            | 26 |
| 5.3.3.3   | Release of all DCHs .....                                             | 26 |
| 5.3.3.4   | Release of all PDCHs and DCHs .....                                   | 26 |
| 5.3.4     | MAC-Dedicated state .....                                             | 27 |
| 5.3.4.1   | General .....                                                         | 27 |
| 5.3.4.2   | Release of all DCHs .....                                             | 27 |
| 5.3.4.3   | Radio bearer reconfiguration .....                                    | 27 |
| 5.3.4.4   | Establishment of a PDCH .....                                         | 27 |
| 5.3.4.5   | Establishment of DCH .....                                            | 27 |
| 5.3.5     | MAC state machine .....                                               | 27 |
| 5.4       | General MAC procedures in MAC-Idle state and MAC-Shared state .....   | 28 |
| 5.4.1     | Mobile station side .....                                             | 28 |
| 5.4.1.1   | General .....                                                         | 28 |
| 5.4.1.2   | Cell (Spotbeam) reselection .....                                     | 28 |
| 5.4.1.3   | Network Assisted Cell Change .....                                    | 29 |
| 5.4.1.4   | Release of DCHs .....                                                 | 29 |
| 5.4.1.4.1 | General .....                                                         | 29 |
| 5.4.1.4.2 | Continuation of PBCCH information .....                               | 29 |
| 5.4.1.4.3 | Receipt of PSI14 message in MAC-DTM state .....                       | 29 |
| 5.4.1.5   | System information on PBCCH .....                                     | 29 |
| 5.4.1.6   | System information on BCCH .....                                      | 29 |
| 5.4.1.6.1 | General .....                                                         | 29 |
| 5.4.1.6.2 | Establishment of PBCCH .....                                          | 29 |
| 5.4.1.6.3 | Void .....                                                            | 29 |
| 5.4.1.7   | Void .....                                                            | 29 |
| 5.4.1.8   | Discontinuous reception (DRX) .....                                   | 29 |
| 5.4.1.9   | Page mode procedures on PCCCH .....                                   | 30 |
| 5.4.1.10  | Frequency Parameters .....                                            | 30 |
| 5.4.1.11  | G-RNTI Management .....                                               | 30 |
| 5.4.2     | Network side .....                                                    | 30 |
| 5.4.2.1   | System Information broadcasting .....                                 | 30 |
| 5.4.2.1.1 | System information on PBCCH .....                                     | 30 |
| 5.4.2.1.2 | System information on BCCH .....                                      | 30 |
| 5.4.2.1.3 | System information on PACCH (and other logical channels) .....        | 30 |
| 5.4.2.1.4 | Consistent sets of system information messages .....                  | 30 |
| 5.4.2.2   | Paging .....                                                          | 30 |
| 5.4.2.3   | Network Assisted Cell Change .....                                    | 30 |
| 5.5       | Measurement reports .....                                             | 30 |
| 5.5.1     | General .....                                                         | 30 |
| 5.5.2     | Network Control (NC) measurement reporting .....                      | 31 |
| 5.5.3     | Void .....                                                            | 31 |
| 5.5.4     | Additional measurement and reporting parameters .....                 | 31 |
| 5.6       | Mapping of Signalling Radio Bearers (SRB) onto logical channels ..... | 31 |
| 5.6.1     | Downlink .....                                                        | 31 |
| 5.6.2     | Uplink .....                                                          | 31 |
| 5.6.2.1   | MAC-Dedicated State .....                                             | 31 |
| 5.6.2.2   | MAC-Shared State .....                                                | 31 |
| 5.6.2.3   | MAC-DTM State .....                                                   | 32 |
| 5.7       | Multiplexing principles with Flexible Layer One .....                 | 32 |
| 5.7.1     | General .....                                                         | 32 |
| 5.7.2     | Multiplexing between user-plane and control-plane .....               | 32 |
| 6         | Paging procedures .....                                               | 32 |
| 6.1       | General .....                                                         | 32 |
| 6.2       | Paging initiation in MAC-Idle state .....                             | 33 |
| 6.3       | Paging initiation in MAC-Shared state .....                           | 33 |
| 6.4       | Reception of PACKET PAGING REQUEST by an MS .....                     | 33 |

|           |                                                                                         |    |
|-----------|-----------------------------------------------------------------------------------------|----|
| 7         | Medium Access Control (MAC) procedures on PCCCH.....                                    | 33 |
| 7.1       | General .....                                                                           | 33 |
| 7.2       | TBF establishment initiated by the mobile earth station on PCCCH .....                  | 34 |
| 7.2.1     | General.....                                                                            | 34 |
| 7.2.2     | Permission to access the network .....                                                  | 34 |
| 7.2.3     | Initiation of a TBF establishment .....                                                 | 34 |
| 7.2.3.1   | Initiation of the packet access procedure .....                                         | 34 |
| 7.2.3.1.1 | General .....                                                                           | 34 |
| 7.2.3.1.2 | Access persistence control on PRACH.....                                                | 35 |
| 7.2.3.2   | Packet assignment procedure .....                                                       | 35 |
| 7.2.3.2.1 | On receipt of a PACKET CHANNEL REQUEST or PACKET CHANNEL REQUEST<br>TYPE 2 message..... | 35 |
| 7.2.3.3   | Contention resolution at one phase access .....                                         | 36 |
| 7.2.3.4   | RLC/MAC procedures during contention resolution .....                                   | 36 |
| 7.2.3.4.1 | RLC/MAC procedures during contention resolution on PDCHs.....                           | 36 |
| 7.2.3.4.2 | RLC/MAC procedures during contention resolution on DCHs.....                            | 37 |
| 7.2.3.5   | One phase packet access completion.....                                                 | 37 |
| 7.2.3.5.1 | One phase packet access completion on PDCHs.....                                        | 37 |
| 7.2.3.5.2 | One phase packet access completion on DCHs .....                                        | 37 |
| 7.2.3.6   | Timing Advance.....                                                                     | 37 |
| 7.2.3.6.1 | Timing advance on PDCHs .....                                                           | 37 |
| 7.2.3.6.2 | Timing advance on DCHs .....                                                            | 37 |
| 7.2.4     | TBF establishment using two phase access .....                                          | 37 |
| 7.2.5     | Abnormal cases.....                                                                     | 37 |
| 7.3       | TBF establishment initiated by the network on CCCH .....                                | 38 |
| 7.4       | Procedure for measurement report sending in MAC-Idle state .....                        | 38 |
| 7.5       | Cell Change Order procedures in MAC-Idle state .....                                    | 38 |
| 8         | Medium Access Control (MAC) procedures on PDCH.....                                     | 39 |
| 8.1       | General .....                                                                           | 39 |
| 8.2       | Transfer of RLC data blocks .....                                                       | 39 |
| 8.2.1     | Medium access mode.....                                                                 | 39 |
| 8.2.2     | Uplink RLC data block transfer.....                                                     | 39 |
| 8.2.2.0   | General .....                                                                           | 39 |
| 8.2.2.0.1 | General .....                                                                           | 39 |
| 8.2.2.0.2 | Establishment of additional uplink TBF(s).....                                          | 39 |
| 8.2.2.0.3 | Uplink resource reallocation/reconfiguration .....                                      | 40 |
| 8.2.2.0.4 | Establishment of downlink TBF(s).....                                                   | 40 |
| 8.2.2.0.5 | Network initiated Establishment of Uplink TBF .....                                     | 40 |
| 8.2.2.1   | Dynamic Allocation uplink RLC data block transfer.....                                  | 40 |
| 8.2.2.1.1 | PACCH operation.....                                                                    | 40 |
| 8.2.2.1.2 | Resource Allocation/Reallocation for Uplink.....                                        | 40 |
| 8.2.2.1.3 | Establishment of downlink TBF.....                                                      | 42 |
| 8.2.2.2   | Extended Dynamic Allocation uplink RLC data block transfer .....                        | 44 |
| 8.2.2.3   | Exclusive Allocation uplink RLC data block transfer .....                               | 44 |
| 8.2.2.4   | Network initiated release of uplink TBF .....                                           | 44 |
| 8.2.2.5   | Abnormal cases .....                                                                    | 44 |
| 8.2.3     | Downlink RLC data block transfer .....                                                  | 44 |
| 8.2.3.1   | General .....                                                                           | 44 |
| 8.2.3.1.0 | General .....                                                                           | 44 |
| 8.2.3.1.1 | Downlink resource reallocation.....                                                     | 45 |
| 8.2.3.1.2 | Void.....                                                                               | 45 |
| 8.2.3.2   | Downlink RLC data block transfer procedure .....                                        | 45 |
| 8.2.3.2.0 | General .....                                                                           | 45 |
| 8.2.3.2.1 | Abnormal cases .....                                                                    | 46 |
| 8.2.3.3   | Polling for Packet Downlink Ack/Nack.....                                               | 47 |
| 8.2.3.4   | Resource Reassignment for downlink.....                                                 | 47 |
| 8.2.3.5   | Establishment of uplink TBF .....                                                       | 47 |
| 8.2.3.5.0 | General .....                                                                           | 47 |
| 8.2.3.5.1 | Abnormal cases .....                                                                    | 47 |
