

ETSI TS 123 003 V19.6.0 (2026-03)

TECHNICAL SPECIFICATION

**Digital cellular telecommunications system (Phase 2+) (GSM);
Universal Mobile Telecommunications System (UMTS);
LTE;
5G;
Numbering, addressing and identification
(3GPP TS 23.003 version 19.6.0 Release 19)**

Reference

RTS/TSGC-0423003vj60

Keywords

Important notice

The present document can be downloaded from the
[ETSI Search & Browse Standards](#) application.

The present document may be made available in electronic versions and/or in print. The content of any electronic and/or print versions of the present document shall not be modified without the prior written authorization of ETSI. In case of any existing or perceived difference in contents between such versions and/or in print, the prevailing version of an ETSI deliverable is the one made publicly available in PDF format on [ETSI deliver](#) repository.

Users should be aware that the present document may be revised or have its status changed, this information is available in the [Milestones listing](#).

If you find errors in the present document, please send your comments to the relevant service listed under [Committee Support Staff](#).

If you find a security vulnerability in the present document, please report it through our [Coordinated Vulnerability Disclosure \(CVD\)](#) program.

Notice of disclaimer & limitation of liability

The information provided in the present deliverable is directed solely to professionals who have the appropriate degree of experience to understand and interpret its content in accordance with generally accepted engineering or other professional standard and applicable regulations.

No recommendation as to products and services or vendors is made or should be implied.

No representation or warranty is made that this deliverable is technically accurate or sufficient or conforms to any law and/or governmental rule and/or regulation and further, no representation or warranty is made of merchantability or fitness for any particular purpose or against infringement of intellectual property rights.

In no event shall ETSI be held liable for loss of profits or any other incidental or consequential damages.

Any software contained in this deliverable is provided "AS IS" with no warranties, express or implied, including but not limited to, the warranties of merchantability, fitness for a particular purpose and non-infringement of intellectual property rights and ETSI shall not be held liable in any event for any damages whatsoever (including, without limitation, damages for loss of profits, business interruption, loss of information, or any other pecuniary loss) arising out of or related to the use of or inability to use the software.

Copyright Notification

No part may be reproduced or utilized in any form or by any means, electronic or mechanical, including photocopying and microfilm except as authorized by written permission of ETSI.

The content of the PDF version shall not be modified without the written authorization of ETSI.

The copyright and the foregoing restriction extend to reproduction in all media.

Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the [ETSI IPR online database](#).

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

DECT™, **PLUGTESTS™**, **UMTS™** and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. **3GPP™**, **LTE™** and **5G™** logo are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. **oneM2M™** logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. **GSM®** and the GSM logo are trademarks registered and owned by the GSM Association.

Legal Notice

This Technical Specification (TS) has been produced by the ETSI 3rd Generation Partnership Project (3GPP).

The present document may refer to technical specifications or reports using their 3GPP identities. These shall be interpreted as being references to the corresponding ETSI deliverables.

The cross reference between 3GPP and ETSI identities can be found at [3GPP to ETSI numbering cross-referencing](#).

Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

Foreword.....	12
1 Scope	14
1.1 References	15
1.1.1 Normative references.....	15
1.1.2 Informative references	20
1.2 Abbreviations	20
1.3 General comments to references	21
1.4 Conventions on bit ordering	21
2 Identification of mobile subscribers	22
2.1 General	22
2.2 Composition of IMSI.....	22
2.2A Subscription Permanent Identifier (SUPI).....	23
2.2B Subscription Concealed Identifier (SUCI)	23
2.3 Allocation and assignment principles.....	26
2.4 Structure of TMSI	26
2.5 Structure of LMSI	27
2.6 Structure of TLLI	27
2.7 Structure of P-TMSI Signature.....	28
2.8 Globally Unique Temporary UE Identity (GUTI).....	28
2.8.1 Introduction.....	28
2.8.2 Mapping between Temporary and Area Identities for the EUTRAN and the UTRAN/GERAN based systems.....	29
2.8.2.0 Introduction.....	29
2.8.2.1 Mapping from GUTI to RAI, P-TMSI and P-TMSI signature.....	29
2.8.2.1.1 Introduction	29
2.8.2.1.2 Mapping in the UE	29
2.8.2.1.3 Mapping in the old MME	30
2.8.2.2 Mapping from RAI and P-TMSI to GUTI	30
2.8.2.2.1 Introduction	30
2.8.2.2.2 Mapping in the UE	30
2.8.2.2.3 Mapping in the new MME.....	31
2.9 Structure of the S-Temporary Mobile Subscriber Identity (S-TMSI)	31
2.10 5G Globally Unique Temporary UE Identity (5G-GUTI).....	31
2.10.1 Introduction.....	31
2.10.2 Mapping between Temporary Identities for the 5GS and the E-UTRAN.....	32
2.10.2.0 Introduction.....	32
2.10.2.1 Mapping from 5G-GUTI to GUTI.....	32
2.10.2.1.1 Introduction	32
2.10.2.1.2 Mapping in the UE	32
2.10.2.1.3 Mapping in the old AMF	33
2.10.2.2 Mapping from GUTI to 5G-GUTI	33
2.10.2.2.1 Introduction	33
2.10.2.2.2 Mapping in the UE	33
2.10.2.2.3 Mapping in the new AMF	34
2.11 Structure of the 5G-S-Temporary Mobile Subscriber Identity (5G-S-TMSI)	34
2.12 Structure of the Truncated 5G-S-Temporary Mobile Subscriber Identity (Truncated 5G-S-TMSI).....	34
3 Numbering plan for mobile stations	35
3.1 General	35
3.2 Numbering plan requirements	35
3.3 Structure of Mobile Subscriber ISDN number (MSISDN)	35
3.4 Mobile Station Roaming Number (MSRN) for PSTN/ISDN routing.....	36

3.5	Structure of Mobile Station International Data Number	37
3.6	Handover Number	37
3.7	Structure of an IP v4 address	37
3.8	Structure of an IP v6 address	37
4	Identification of location areas and base stations	37
4.1	Composition of the Location Area Identification (LAI)	37
4.2	Composition of the Routing Area Identification (RAI)	38
4.3	Base station identification	38
4.3.1	Cell Identity (CI) and Cell Global Identification (CGI)	38
4.3.2	Base Station Identify Code (BSIC)	39
4.4	Regional Subscription Zone Identity (RSZI)	39
4.5	Location Number	40
4.6	Composition of the Service Area Identification (SAI)	40
4.7	Closed Subscriber Group	40
4.8	HNB Name	40
4.9	CSG Type	41
4.10	HNB Unique Identity	41
4.11	HRNN	41
5	Identification of MSCs, GSNs, location registers and CSSs	41
5.1	Identification for routing purposes	41
5.2	Identification of HLR for HLR restoration application	42
5.3	Identification of the HSS for SMS	42
6	International Mobile Station Equipment Identity, Software Version Number and Permanent Equipment Identifier	42
6.1	General	42
6.2	Composition of IMEI and IMEISV	43
6.2.1	Composition of IMEI	43
6.2.2	Composition of IMEISV	43
6.3	Allocation principles	44
6.4	Permanent Equipment Identifier (PEI)	44
7	Identification of Voice Group Call and Voice Broadcast Call Entities	44
7.1	Group Identities	44
7.2	Group Call Area Identification	45
7.3	Voice Group Call and Voice Broadcast Call References	45
8	SCCP subsystem numbers	45
8.1	Globally standardized subsystem numbers used for GSM/UMTS	46
8.2	National network subsystem numbers used for GSM/UMTS	46
9	Definition of Access Point Name	46
9A	Definition of Data Network Name	47
9.0	General	47
9.1	Structure of APN	47
9.1.1	Format of APN Network Identifier	47
9.1.2	Format of APN Operator Identifier	48
9.2	Definition of the Wild Card APN	49
9.2.1	Coding of the Wild Card APN	49
9.3	Definition of Emergency APN	49
10	Identification of the Cordless Telephony System entities	49
10.1	General description of CTS-MS and CTS-FP Identities	49
10.2	CTS Mobile Subscriber Identities	49
10.2.1	General	49
10.2.2	Composition of the CTSMSI	49
10.2.3	Allocation principles	50
10.2.4	CTSMSI hexadecimal representation	50
10.3	Fixed Part Beacon Identity	50
10.3.1	General	50
10.3.2	Composition of the FPBI	50
10.3.2.1	FPBI general structure	50

10.3.2.2	FPBI class A.....	51
10.3.2.3	FPBI class B.....	51
10.3.3	Allocation principles.....	52
10.4	International Fixed Part Equipment Identity	52
10.4.1	General.....	52
10.4.2	Composition of the IFPEI.....	52
10.4.3	Allocation and assignment principles	52
10.5	International Fixed Part Subscription Identity.....	53
10.5.1	General.....	53
10.5.2	Composition of the IFPSI	53
10.5.3	Allocation and assignment principles	53
11	Identification of Localised Service Area.....	53
12	Identification of PLMN, RNC, Service Area, CN domain and Shared Network Area	54
12.1	PLMN Identifier	54
12.2	CN Domain Identifier.....	54
12.3	CN Identifier	54
12.4	RNC Identifier.....	55
12.5	Service Area Identifier	55
12.6	Shared Network Area Identifier	55
12.7	Stand-Alone Non-Public Network Identifier.....	55
12.7.1	Network Identifier (NID).....	55
12.7.2	NID of assignment mode 0	56
12.7.3	Group ID for Network Selection (GIN).....	56
13	Numbering, addressing and identification within the IP multimedia core network subsystem	57
13.1	Introduction	57
13.2	Home network domain name.....	57
13.3	Private User Identity.....	58
13.4	Public User Identity.....	58
13.4A	Wildcarded Public User Identity	59
13.4B	Temporary Public User Identity	59
13.5	Public Service Identity (PSI).....	60
13.5A	Private Service Identity	60
13.6	Anonymous User Identity	61
13.7	Unavailable User Identity.....	61
13.8	Instance-ID.....	61
13.9	XCAP Root URI.....	61
13.9.1	XCAP Root URI on Ut interface	61
13.9.1.1	General	61
13.9.1.2	Format of XCAP Root URI.....	61
13.10	Default Conference Factory URI for MMTel.....	62
13.11	Unknown User Identity	62
13.12	Default WWSF URI	63
13.12.1	General.....	63
13.12.2	Format of the Default WWSF URI.....	63
13.13	IMEI based identity	63
14	Numbering, addressing and identification for 3GPP System to WLAN Interworking	64
14.1	Introduction	64
14.2	Home network realm.....	64
14.3	Root NAI.....	65
14.4	Decorated NAI	65
14.4A	Fast Re-authentication NAI.....	65
14.5	Temporary identities.....	66
14.6	Alternative NAI.....	66
14.7	W-APN.....	66
14.7.1	Format of W-APN Network Identifier.....	67
14.7.2	Format of W-APN Operator Identifier.....	67
14.7.3	Alternative Format of W-APN Operator Identifier.....	68
14.8	Emergency Realm and Emergency NAI for Emergency Cases.....	68
15	Identification of Multimedia Broadcast/Multicast Service	69

15.1	Introduction	69
15.2	Structure of TMGI.....	69
15.3	Structure of MBMS SAI.....	70
15.4	Home Network Realm.....	70
15.5	Addressing and identification for Bootstrapping MBMS Service Announcement.....	71
16	Numbering, addressing and identification within the GAA subsystem	71
16.1	Introduction	71
16.2	BSF address.....	71
17	Numbering, addressing and identification within the Generic Access Network.....	72
17.1	Introduction	72
17.2	Network Access Identifiers	72
17.2.1	Home network realm	72
17.2.2	Full Authentication NAI	73
17.2.3	Fast Re-authentication NAI	73
17.3	Node Identifiers.....	74
17.3.1	Home network domain name.....	74
17.3.2	Provisioning GANC-SEGW identifier.....	74
17.3.3	Provisioning GANC identifier	75
18	Addressing and Identification for IMS Service Continuity and Single-Radio Voice Call Continuity.....	75
18.1	Introduction	75
18.2	CS Domain Routeing Number (CSRN).....	75
18.3	IP Multimedia Routeing Number (IMRN)	76
18.4	Session Transfer Number (STN).....	76
18.5	Session Transfer Identifier (STI).....	76
18.6	Session Transfer Number for Single Radio Voice Call Continuity (STN-SR).....	76
18.7	Correlation MSISDN	76
18.8	Transfer Identifier for CS to PS Single Radio Voice Call Continuity (STI-rSR).....	76
18.9	Additional MSISDN.....	76
19	Numbering, addressing and identification for the Evolved Packet Core (EPC).....	77
19.1	Introduction	77
19.2	Home Network Realm/Domain	77
19.3	3GPP access to non-3GPP access interworking	77
19.3.1	Introduction.....	77
19.3.2	Root NAI	78
19.3.3	Decorated NAI.....	78
19.3.4	Fast Re-authentication NAI	80
19.3.5	Pseudonym Identities.....	80
19.3.6	Emergency NAI for Limited Service State	81
19.3.7	Alternative NAI	81
19.3.8	Keyname NAI.....	81
19.3.9	IMSI-based Emergency NAI	82
19.3.10	High Priority Access NAI.....	82
19.4	Identifiers for Domain Name System procedures	82
19.4.1	Introduction.....	82
19.4.2	Fully Qualified Domain Names (FQDNs)	83
19.4.2.1	General	83
19.4.2.2	Access Point Name FQDN (APN-FQDN).....	83
19.4.2.2.1	Structure	83
19.4.2.2.2	Void.....	84
19.4.2.2.3	Void.....	84
19.4.2.2.4	Void.....	84
19.4.2.3	Tracking Area Identity (TAI).....	84
19.4.2.4	Mobility Management Entity (MME).....	84
19.4.2.5	Routing Area Identity (RAI) - EPC.....	85
19.4.2.6	Serving GPRS Support Node (SGSN) within SGSN pool.....	85
19.4.2.7	Target RNC-ID for U-TRAN.....	85
19.4.2.8	DNS subdomain for operator usage in EPC.....	86
19.4.2.9	ePDG FQDN and Visited Country FQDN for non-emergency bearer services	86

19.4.2.9.1	General	86
19.4.2.9.2	Operator Identifier based ePDG FQDN	86
19.4.2.9.3	Tracking/Location Area Identity based ePDG FQDN	87
19.4.2.9.4	Visited Country FQDN.....	88
19.4.2.9.5	Replacement field used in DNS-based Discovery of regulatory requirements.....	88
19.4.2.9A	ePDG FQDN for emergency bearer services	89
19.4.2.9A.1	General	89
19.4.2.9A.2	Operator Identifier based Emergency ePDG FQDN	89
19.4.2.9A.3	Tracking/Location Area Identity based Emergency ePDG FQDN.....	89
19.4.2.9A.4	Visited Country Emergency FQDN.....	90
19.4.2.9A.5	Replacement field used in DNS-based Discovery of regulatory requirements for emergency services	90
19.4.2.9A.6	Country based Emergency Numbers FQDN	90
19.4.2.9A.7	Replacement field used in DNS-based Discovery of Emergency Numbers	91
19.4.2.10	Global eNodeB-ID for eNodeB.....	91
19.4.2.11	Local Home Network identifier	91
19.4.2.12	UCMF	92
19.4.2.13	PGW Set FQDN.....	92
19.4.3	Service and Protocol service names for 3GPP.....	92
19.5	Access Network Identity	94
19.6	E-UTRAN Cell Identity (ECI) and E-UTRAN Cell Global Identification (ECGI).....	94
19.6A	NR Cell Identity (NCI) and NR Cell Global Identity (NCGI)	94
19.7	Identifiers for communications with packet data networks and applications	95
19.7.1	Introduction.....	95
19.7.2	External Identifier	95
19.7.3	External Group Identifier.....	95
19.8	TWAN Operator Name	96
19.9	IMSI-Group Identifier	96
19.10	Presence Reporting Area Identifier (PRA ID).....	97
19.11	Dedicated Core Networks Identifier.....	97
20	Addressing and Identification for IMS Centralized Services.....	97
20.1	Introduction	97
20.2	UE based solution.....	98
20.3	Network based solution	98
20.3.1	General.....	98
20.3.2	Home network domain name.....	98
20.3.3	Private User Identity	98
20.3.4	Public User Identity	99
20.3.5	Conference Factory URI	99
21	Addressing and Identification for Dual Stack Mobile IPv6 (DSMIPv6)	99
21.1	Introduction	99
21.2	Home Agent – Access Point Name (HA-APN).....	99
21.2.1	General.....	99
21.2.2	Format of HA-APN Network Identifier.....	100
21.2.3	Format of HA-APN Operator Identifier.....	100
22	Addressing and identification for ANDSF	101
22.1	Introduction	101
22.2	ANDSF Server Name (ANDSF-SN).....	101
22.2.1	General.....	101
22.2.2	Format of ANDSF-SN	101
23	Numbering, addressing and identification for the OAM System	101
23.1	Introduction	101
23.2	OAM System Realm/Domain.....	102
23.3	Identifiers for Domain Name System procedures	102
23.3.1	Introduction.....	102
23.3.2	Fully Qualified Domain Names (FQDNs)	102
23.3.2.1	General	102
23.3.2.2	Relay Node Vendor-Specific OAM System	102
23.3.2.3	Multi-vendor eNodeB Plug-and Play Vendor-Specific OAM System.....	103

23.3.2.3.1	General	103
23.3.2.3.2	Certification Authority server.....	103
23.3.2.3.3	Security Gateway.....	104
23.3.2.3.4	Element Manager.....	104
24	Numbering, addressing and identification for Proximity-based Services (ProSe).....	104
24.1	Introduction	104
24.2	ProSe Application ID	104
24.2.1	General.....	104
24.2.2	Format of ProSe Application ID Name in ProSe Application ID	105
24.2.3	Format of PLMN ID in ProSe Application ID.....	105
24.2.4	Usage of wild cards in place of PLMN ID in ProSe Application ID	106
24.2.5	Informative examples of ProSe Application ID.....	106
24.2.6	Format of SNPN ID in ProSe Application ID.....	106
24.3	ProSe Application Code	107
24.3.1	General.....	107
24.3.2	Format of PLMN ID in ProSe Application Code.....	107
24.3.3	Format of temporary identity in ProSe Application Code	108
24.3A	ProSe Application Code Prefix	108
24.3B	ProSe Application Code Suffix	108
24.4	EPC ProSe User ID	108
24.4.1	General.....	108
24.4.2	Format of EPC ProSe User ID.....	108
24.5	Home PLMN ProSe Function Address	108
24.6	ProSe Restricted Code.....	109
24.7	ProSe Restricted Code Prefix	109
24.8	ProSe Restricted Code Suffix.....	109
24.9	ProSe Query Code.....	109
24.10	ProSe Response Code.....	109
24.11	ProSe Discovery UE ID	110
24.11.1	General.....	110
24.11.2	Format of ProSe Discovery UE ID	110
24.12	ProSe UE ID.....	110
24.13	ProSe Relay UE ID.....	110
24.14	User Info ID	110
24.15	Relay Service Code	110
24.16	Discovery Group ID.....	111
24.17	Service ID.....	111
25	Identification of Online Charging System.....	111
25.1	Introduction	111
25.2	Home network domain name.....	111
26	Numbering, addressing and identification for Mission Critical Services.....	112
26.1	Introduction	112
26.2	Domain name for MC services confidentiality protection of MC services identities.....	112
27	Numbering, addressing and identification for V2X	112
27.1	Introduction	112
27.2	V2X Control Function FQDN	112
27.2.1	General.....	112
27.2.2	Format of V2X Control Function FQDN.....	112
28	Numbering, addressing and identification for 5G System (5GS).....	113
28.1	Introduction	113
28.2	Home Network Domain	113
28.3	Identifiers for Domain Name System procedures	114
28.3.1	Introduction.....	114
28.3.2	Fully Qualified Domain Names (FQDNs).....	114
28.3.2.1	General	114
28.3.2.2	N3IWF FQDN.....	114
28.3.2.2.1	General	114
28.3.2.2.2	Operator Identifier based N3IWF FQDN	115
28.3.2.2.3	Tracking Area Identity based N3IWF FQDN.....	115

28.3.2.2.4	Visited Country FQDN for N3IWF.....	116
28.3.2.2.5	Replacement field used in DNS-based Discovery of regulatory requirements.....	117
28.3.2.2.6	FQDN for SNPN N3IWF	118
28.3.2.2.7	Replacement field used in DNS-based Discovery of SNPN N3IWF for regulatory requirements	120
28.3.2.2.8	Prefixed Operator Identifier based N3IWF FQDN.....	121
28.3.2.2.9	Prefixed Tracking Area Identity based N3IWF FQDN	121
28.3.2.3	PLMN level and Home NF Repository Function (NRF) FQDN.....	122
28.3.2.3.1	General	122
28.3.2.3.2	Format of NRF FQDN.....	122
28.3.2.3.3	NRF URI	122
28.3.2.4	Network Slice Selection Function (NSSF) FQDN	122
28.3.2.4.1	General	122
28.3.2.4.2	Format of NSSF FQDN	123
28.3.2.4.3	NSSF URI.....	123
28.3.2.5	AMF Name	123

Foreword

This Technical Specification has been produced by the 3rd Generation Partnership Project (3GPP).

The contents of the present document are subject to continuing work within the TSG and may change following formal TSG approval. Should the TSG modify the contents of the present document, it will be re-released by the TSG with an identifying change of release date and an increase in version number as follows:

Version x.y.z

where:

- x the first digit:
 - 1 presented to TSG for information;
 - 2 presented to TSG for approval;
 - 3 or greater indicates TSG approved document under change control.
- y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.
- z the third digit is incremented when editorial only changes have been incorporated in the document.

In the present document, modal verbs have the following meanings:

shall indicates a mandatory requirement to do something

shall not indicates an interdiction (prohibition) to do something

The constructions "shall" and "shall not" are confined to the context of normative provisions, and do not appear in Technical Reports.

The constructions "must" and "must not" are not used as substitutes for "shall" and "shall not". Their use is avoided insofar as possible, and they are not used in a normative context except in a direct citation from an external, referenced, non-3GPP document, or so as to maintain continuity of style when extending or modifying the provisions of such a referenced document.

should indicates a recommendation to do something

should not indicates a recommendation not to do something

may indicates permission to do something

need not indicates permission not to do something

The construction "may not" is ambiguous and is not used in normative elements. The unambiguous constructions "might not" or "shall not" are used instead, depending upon the meaning intended.

can indicates that something is possible

cannot indicates that something is impossible

The constructions "can" and "cannot" are not substitutes for "may" and "need not".

will indicates that something is certain or expected to happen as a result of action taken by an agency the behaviour of which is outside the scope of the present document

will not indicates that something is certain or expected not to happen as a result of action taken by an agency the behaviour of which is outside the scope of the present document

might indicates a likelihood that something will happen as a result of action taken by some agency the behaviour of which is outside the scope of the present document

might not indicates a likelihood that something will not happen as a result of action taken by some agency the behaviour of which is outside the scope of the present document

In addition:

is (or any other verb in the indicative mood) indicates a statement of fact

is not (or any other negative verb in the indicative mood) indicates a statement of fact

The constructions "is" and "is not" do not indicate requirements.

1 Scope

The present document defines the principal purpose and use of different naming, numbering, addressing and identification resources (i.e. Identifiers (ID)) within the digital cellular telecommunications system and the 3GPP system.

IDs that are covered by this specification includes both public IDs, private IDs and IDs that are assigned to MSs/UEs. Many of the IDs are used temporary in the networks and are allocated and assigned by the operators and some other IDs are allocated and assigned on either global, regional and national level by an administrator. See ITU-T Recommendation E.101 [122].

NOTE: Allocation means the process of opening a numbering, naming or addressing resource in a plan for the purpose of its use by a telecommunication service under specified conditions. The allocation in itself does not yet give rights for any user, whether an operator, service provider, user or someone else, to use the resource. Assignment means authorization given to an applicant for the right of use of number, naming or addressing resources under specified conditions.

The present document defines:

- 0) the principal purpose and use of International Mobile station Equipment Identities (IMEI) within the digital cellular telecommunications system and the 3GPP system
- a) an identification plan for public networks and subscriptions in the 3GPP systems;
- b) principles of assigning telephone numbers to MSs in the country of registration of the MS;
- c) principles of assigning Mobile Station (MS) roaming numbers to visiting MSs;
- d) an identification plan for location areas, routing areas, and base stations in the GSM system;
- e) an identification plan for MSCs, SGSNs, GGSNs, and location registers in the GSM/UMTS system;
- f) principles of assigning international mobile equipment identities;
- g) principles of assigning zones for regional subscription;
- h) an identification plan for groups of subscribers to the Voice Group Call Service (VGCS) and to the Voice Broadcast Service (VBS); and identification plan for voice group calls and voice broadcast calls; an identification plan for group call areas;
- i) principles for assigning Packet Data Protocol (PDP) addresses to mobile stations;
- j) an identification plan for point-to-multipoint data transmission groups;
- k) an identification plan for CN domain, RNC and service area in the UTRAN system.
- l) an identification plan for mobile subscribers in the WLAN system.
- m) addressing and identification for IMS Service Continuity
- n) an identification plan together with principles of assignment and mapping of identities for the Evolved Packet System; and
- o) addressing and identification for Proximity-based (ProSe) Services.
- p) an identification for Online Charging System (OCS).
- q) an identification plan together with principles of assignment and mapping of identities for the 5G System.

The present document specifies functions, procedures and information which apply to GERAN Iu mode. However, functionality related to GERAN Iu mode is neither maintained nor enhanced.
