About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	7
1 Scope	9
2 Normative references	9
3 Terms and definitions	10
3.1 Measuring systems	10
3.2 Components of a measuring system	11
3.3 Scale factors	12
3.4 Rated values	12
3.5 Terms related to dynamic behaviour	13
3.6 Terms related to uncertainty	17
3.7 Terms related to tests on measuring systems	20
4 Procedures for qualification and use of measuring systems	21
4.1 General principles	21
4.2 Schedule of performance tests	21
4.3 Schedule of performance checks	21
4.4 Requirements for the record of performance	22
4.4.1 Contents of the record of performance	22
4.4.2 Exceptions	22
4.5 Operating conditions	22
4.6 Uncertainty	23
5 Tests and test requirements for an approved measuring system and its components	23
5.1 General requirements	23
5.2 Calibration – Determination of the scale factor	24
5.2.1 Calibration of measuring systems by comparison with a reference measuring system (preferred method)	24
5.2.2 Determination of the scale factor of a measuring system from the scale factors of its components (alternative method)	29
5.3 Linearity test in addition to comparison over the limited voltage range	30
5.3.1 Application	30
5.3.2 Alternative methods in order of suitability	32
5.4 Dynamic behaviour	33
5.4.1 General	33
5.4.2 Determination of the amplitude-frequency response of AC measuring systems	33
5.4.3 Reference method for impulse voltage measuring systems	33
5.5 Short-term stability	34
5.6 Long-term stability	34
5.7 Ambient temperature effect	35
5.8 Proximity effect	35
5.9 Software effect	36
5.10 Uncertainty calculation of the scale factor	36
5.10.1 General	36
5.10.2 Uncertainty of the calibration	37
5.10.3 Uncertainty of measurement using an approved measuring system	37
5.11 Uncertainty calculation of time parameter measurement (impulse voltages only)	38
5.11.1 General	38

5.11.2	Uncertainty of the time parameter calibration	39
5.11.3	Uncertainty of time parameter measurement using an approved measuring system	40
5.12	Interference test (transmission system and instrument for impulse voltage measurements)	41
5.13	Withstand tests for converting device	42
6	Measurement of direct voltage	42
6.1	Requirements for an approved measuring system	42
6.1.1	General	42
6.1.2	Uncertainty contributions	43
6.1.3	Requirements for converting device	43
6.1.4	Dynamic behaviour for measuring voltage changes	43
6.2	Tests on an approved measuring system	43
6.3	Performance check	44
6.3.1	General	44
6.3.2	Comparison with an approved measuring system	44
6.3.3	Check of the scale factors of the components	45
6.4	Measurement of ripple amplitude	45
6.4.1	Requirements	45
6.4.2	Uncertainty contributions	45
6.4.3	Calibrations and tests on an approved ripple voltage measuring system	45
6.4.4	Measurement of the scale factor at the ripple frequency	45
6.4.5	Dynamic behaviour by amplitude-frequency response	46
6.4.6	Performance check for ripple measuring system	46
7	Measurement of alternating voltage	46
7.1	Requirements for an approved measuring system	46
7.1.1	General	46
7.1.2	Uncertainty contributions	46
7.1.3	Dynamic behaviour	46
7.2	Tests on an approved measuring system	50
7.3	Dynamic behaviour test	50
7.4	Performance check	50
7.4.1	General	50
7.4.2	Comparison with an approved measuring system	51
7.4.3	Check of the scale factors of the components	51
8	Measurement of lightning impulse voltage	52
8.1	Requirements for an approved measuring system	52
8.1.1	General	52
8.1.2	Uncertainty contributions	52
8.1.3	Requirements for measuring instrument	52
8.1.4	Dynamic behaviour	52
8.1.5	Connection to the test object	53
8.2	Tests on an approved measuring system	53
8.3	Performance test on measuring systems	54
8.3.1	Reference method (preferred)	54
8.3.2	Alternative method supplemented by a measurement of the step response in accordance with Annex C	54
8.4	Dynamic behaviour test	55
8.4.1	Comparison with a reference measuring system (preferred)	55

8.4.2	Alternative method based on step response parameters (Annex C) and convolution (Annex D)	55
8.5	Performance check	55
8.5.1	Comparison with an approved measuring system.....	55
8.5.2	Check of the scale factors of the components	55
8.5.3	Dynamic behaviour check by reference record at low voltage	56
8.5.4	Dynamic behaviour check by reference record of an impulse voltage.....	56
9	Measurement of switching impulse voltage	56
9.1	Requirements for an approved measuring system	56
9.1.1	General	56
9.1.2	Uncertainty contribution	56
9.1.3	Requirements for the measuring instrument.....	56
9.1.4	Dynamic behaviour	57
9.1.5	Connection to the test object	57
9.2	Tests on an approved measuring system	57
9.3	Performance test on measuring systems	57
9.3.1	Reference method (preferred).....	57
9.3.2	Alternative methods supplemented by a step-response measurement.....	57
9.4	Dynamic behaviour test by comparison	58
9.5	Performance check	58
9.5.1	Scale factor check by comparison with an approved measuring system	58
9.5.2	Check of the scale factors of the components	58
9.5.3	Dynamic behaviour check by reference record	58
10	Measurement of combined voltages.....	59
10.1	Requirements for an approved measuring system	59
10.1.1	General	59
10.1.2	Uncertainty contributions	60
10.1.3	Requirements for measuring systems	60
10.1.4	Connection to the test object	62
10.1.5	Requirements for an approved measuring system.....	62
10.2	Performance checks and tests on measuring systems.....	62
11	Measurement of composite voltages	62
11.1	Requirements for an approved measuring system	62
11.1.1	General	62
11.1.2	Uncertainty contributions	63
11.1.3	Requirements for measuring systems	63
11.1.4	Connection to the test object	64
11.1.5	Combining requirements for an approved measuring system	64
11.2	Performance checks and tests on measuring systems.....	64
12	Reference measuring systems	65
12.1	Requirements for reference measuring systems.....	65
12.1.1	Direct voltage	65
12.1.2	Alternating voltage.....	65
12.1.3	Full and chopped lightning and switching impulse voltages	65
12.2	Calibration of a reference measuring system.....	65
12.2.1	General	65
12.2.2	Reference method: Comparative measurement.....	65
12.2.3	Alternative method for impulse voltages: Measurement of scale factor and evaluation of step response parameters.....	66

12.3	Interval between successive calibrations of reference measuring systems	66
12.4	Use of reference measuring systems	66
Annex A	(informative) Uncertainty of measurement.....	67
A.1	General.....	67
A.2	Model function	67
A.3	Type A evaluation of standard uncertainty	68
A.4	Type B evaluation of standard uncertainty	69
A.5	Combined standard uncertainty.....	71
A.6	Expanded uncertainty	72
A.7	Effective degrees of freedom	72
A.8	Uncertainty budget.....	73
A.9	Statement of the measurement result.....	73
Annex B	(informative) Examples for the calculation of measuring uncertainties in high-voltage measurements	75
B.1	Example 1: Calibration of scale factor of an AC measuring system (comparison method)	84
B.1.1	Description	84
B.1.2	Determination of scale factor and uncertainty contributions	84
B.1.3	Uncertainty budget and expression of result	88
B.2	Example 2: Calibration of scale factor of an impulse voltage measuring system (component method).....	88
B.3	Example 3: Calibration of front time of lightning impulse voltages	90
Annex C	(informative normative) Step-response measurements	94
C.1	General.....	94
C.2	Circuit for step- response measurements.....	94
C.3	Requirements Recommendations for the step response of a component	96
Annex D	(informative normative) Convolution method for the determination of dynamic behaviour from step-response measurements	100
D.1	General.....	100
D.2	Convolution method	100
D.3	Procedure for performing the convolution calculation	101
D.4	Uncertainty contributions	102
D.5	Discussion of the calculated errors of impulse parameters	102
D.5.1	Error in the peak amplitude.....	102
D.5.2	Error in the front time.....	102
D.5.3	Error in the time to half-value.....	103
Bibliography		104
Figure 1	– Amplitude-frequency response with examples for limit frequencies (f_1 ; f_2)	13
Figure 2	– Parameters for the unit step response $g(t)$	15
Figure 3	– Parameters for the step-response integral $T(t)$	16
Figure 4	– Calibration by comparison over the full voltage range, $h=5$	26
Figure 5	– Uncertainty contributions of the for calibration (example with minimum of 5 voltage levels) over five voltage levels.....	27
Figure 6	– Combining calibration by comparison over a limited voltage range, with an additional and linearity test	29
Figure 7	– Linearity test of the measuring system with a linear device in the extended voltage range.....	31
