About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	3
INTRODUCTION	6
1 Scope	7
2 Normative references	8
3 Terms and definitions	8
4 Types of Protection	11
4.1 General	11
4.2 Requirements for inherently safe optical radiation "op is"	12
4.2.1 Continuous wave radiation	12
4.2.2 Pulsed radiation	14
4.2.3 Over-power/energy fault protection	15
4.3 Requirements for protected optical radiation "op pr"	16
4.3.1 General	16
4.3.2 Radiation inside optical fibre or cable	16
4.3.3 Radiation entering or leaving enclosures	16
4.4 Optical system with interlock "op sh"	17
5 Type verifications and tests	18
5.1 Optical detector	18
5.2 Optical power	18
5.3 Optical irradiance	19
6 Marking	20
Annex A (informative) Ignition mechanisms	21
Annex B (informative) Typical optical fibre cable design	27
Annex C (informative) Overview for the assessment of pulsed radiation	28
Bibliography	29
Figure 1 – Optical ignition delay times and safe boundary curve with safety factor of 2	17
Figure A.1 – Minimum radiant igniting power with inert absorber target ($\alpha_{1\,064\,nm} = 83\%$, $\alpha_{805\,nm} = 93\%$) and continuous wave-radiation of 1 064 nm	25
Figure A.2 – Minimum radiant igniting power with inert absorber target ($\alpha_{1\,064\,nm} = 83\%$, ($\alpha_{805\,nm} = 93\%$) and continuous wave-radiation (PTB: 1 064 nm, HSL: 805 nm, [19]: 803 nm) for some n-alkanes	26
Figure B.1 – Example Multi-Fibre Optical Cable Design For Heavy Duty Applications	27
Figure B.2 – Typical Single Optical Fibre Cable Design	27
Figure C.1 – Flow diagram for the assessment of pulses according to 4.2.2	28
Table 1 – EPLs achieved by application of Types of Protection for optical systems	12
Table 2 – Safe optical power and irradiance for Group I and II equipment, categorized by Equipment Group and temperature class	13
Table 3 – Safe optical power for Group II equipment for temperature classes T1 to T4	13
Table 4 – Safe optical power and irradiance for Group III equipment	13
Table A.1 – AIT (auto ignition temperature), MESG (maximum experimental safe gap) and measured ignition powers of the chosen combustibles for inert absorbers as the target material ($\alpha_{1\,064\,nm} = 83\%$, $\alpha_{805\,nm} = 93\%$)	23

Table A.2 – Comparison of measured minimum igniting optical pulse energy ($Q_{e,p}^{i,min}$) at 90 μm beam diameter with auto ignition temperatures (AIT) and minimum ignition energies (MIE) from literature [20] at concentrations in percent by volume (ϕ)	26

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Explosive atmospheres -
Part 28: Protection of equipment and transmission
systems using optical radiation**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60079-28 has been prepared by IEC technical committee 31 Equipment for explosive atmospheres. It is an International Standard.

This International Standard is to be used in conjunction with IEC 60079-0.

Users of this document are advised that interpretation sheets clarifying the interpretation of this document can be published. Interpretation sheets are available from the IEC webstore and can be found in the "history" tab of the page for each document.

This third edition cancels and replaces the second edition published in 2015. This edition constitutes a technical revision.
