About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	4
1 Scope	6
2 Normative references	6
3 Terms and definitions	6
3.1 General	6
3.2 Voltages	7
3.3 Currents	8
3.4 Power dissipation	10
3.5 Switching characteristics	11
3.6 Mechanical ratings	14
4 Letter symbols	14
4.1 General	14
4.2 List of letter symbols	14
5 Essential ratings and characteristics	16
5.1 General	16
5.2 Ratings (limiting values)	16
5.2.1 Storage temperature (T_{stg})	16
5.2.2 Operating ambient, case, heatsink or junction temperature (T_a , T_c , T_s or T_{vj})	16
5.2.3 Non-repetitive peak reverse voltage (V_{RSM}) (where appropriate)	16
5.2.4 Repetitive peak reverse voltage (V_{RRM})	16
5.2.5 Reverse voltage (V_R) (where appropriate)	16
5.2.6 Forward currents	17
5.2.7 Peak case non-rupture current (I_{RSMC}) (where appropriate)	18
5.2.8 Reverse power (for avalanche rectifier diodes)	18
5.2.9 Mechanical ratings	18
5.3 Characteristics	19
5.3.1 Forward voltages	19
5.3.2 Breakdown voltage ($V_{(BR)}$) (of avalanche rectifier diodes)	19
5.3.3 Reverse current ($I_{R(D)}$)	19
5.3.4 Repetitive peak reverse current (I_{RRM}) (where appropriate)	19
5.3.5 Reverse recovery characteristics (where appropriate)	19
5.3.6 Forward recovery characteristics (where appropriate)	21
5.3.7 Thermal resistance (R_{th})	21
5.3.8 Transient thermal impedance ($Z_{th}(t)$) (where appropriate)	21
6 Measuring methods	21
6.1 General	21
6.2 Verification of ratings (limiting values)	21
6.2.1 Non-repetitive peak reverse voltage (V_{RSM})	21
6.2.2 Non-repetitive surge forward current (I_{FSM})	22
6.2.3 Repetitive peak reverse power (P_{RRM}) or surge reverse power (P_{RSM}) of avalanche rectifier diodes	24
6.2.4 Peak case non-rupture current (I_{RSMC})	28
6.3 Measuring methods for electrical characteristics	30

6.3.1	Forward voltage (V_F)	30
6.3.2	Breakdown voltage ($V_{(BR)}$) of avalanche rectifier diodes	33
6.3.3	Reverse current (I_R)	34
6.3.4	Repetitive peak reverse current (I_{RRM})	35
6.3.5	Recovered charge (Q_r), reverse recovery time (t_{rr}), reverse recovery energy (E_{rr}) and reverse recovery softness factor (S_{rr})	36
6.3.6	Capacitive charge (Q_C)	41
6.3.7	Forward recovery time (t_{fr}) and peak forward recovery voltage (V_{frm})	42
6.4	Measuring methods for thermal properties	44
6.4.1	General	44
6.4.2	Thermal resistance (R_{th}) and transient thermal impedance ($Z_{th}(t)$)	45
7	Requirements for type tests, routine tests, endurance tests and marking	47
7.1	Type tests	47
7.2	Routine tests	47
7.3	Endurance tests	48
7.3.1	General	48
7.3.2	List of endurance tests	48
7.3.3	Conditions for endurance tests	48
7.3.4	Acceptance-defining characteristics and acceptance criteria for endurance tests	48
7.3.5	Acceptance-defining characteristics and acceptance criteria for reliability tests	49
7.4	Measuring and test methods	49
7.5	Marking	49

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Semiconductor devices -
Part 2: Discrete devices - Rectifier diodes**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch> or www.iso.org/patents. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60747-2 has been prepared by subcommittee 47E: Discrete semiconductor devices, of IEC technical committee 47: Semiconductor devices. It is an International Standard.

This fourth edition cancels and replaces the third edition published in 2016. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) the terms and definitions for partial thermal resistance junction-to-case have been added;
- b) Clauses 3, 4, 5, 6 and 7 have been amended with some deletions of information no longer in use and with some necessary additions.

The text of this International Standard is based on the following documents:

Draft	Report on voting
47E/861/FDIS	47E/869/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

This International Standard is to be used in conjunction with IEC 60747-1:2006 and its Amendment 1:2010.

A list of all parts in the IEC 60747 series, published under the general title *Semiconductor devices*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.
