About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	4
1 Scope	6
2 Normative references	6
3 Terms, definitions and units	7
3.1 General	7
3.2 Terms and definitions	7
3.3 Units	9
4 Methodology	9
5 Description of installation and operating conditions of power station	11
5.1 General	11
5.2 Site conditions	11
5.3 Hydraulic conditions for plant and design criteria for the units	16
5.4 Electrical conditions for plant operation	18
5.4.1 General	18
5.4.2 The plant is intended to operate in an isolated grid	18
5.4.3 The plant is intended to operate in parallel with a grid which imposes the frequency	19
5.4.4 Energy transport and distribution	19
5.5 Types of regulation and modes of operation (reference can be made to IEC 61362 and IEC 60308)	20
5.5.1 Frequency regulation	20
5.5.2 Power regulation	20
5.5.3 Level control	20
5.5.4 Flow regulation	20
5.5.5 Simplified governing	20
5.6 Automation, telemetry, remote control, alarms	20
6 Equipment specifications	21
6.1 General	21
6.2 Technical requirements	21
6.3 Limits of the supply	21
6.3.1 General	21
6.3.2 For the hydraulic system	21
6.3.3 For the electric system	21
6.3.4 For the auxiliary equipment system	21
6.3.5 Elements not normally included in the supply	21
6.4 Specifications of the elements of the plant	22
6.4.1 General	22
6.4.2 Trashrack and rack cleaner	22
6.4.3 Water-level control	22
6.4.4 Discharge closure devices (see Figure 5)	22
6.4.5 Penstock	24
6.4.6 Turbine (see Figure 6)	25
6.4.7 Generator	29
6.4.8 Automatic control system	31
6.4.9 Main transformers (reference can be made to IEC 60076-1)	33
6.4.10 Auxiliary equipment	34
6.4.11 Spare parts and special tools	35

6.4.12	Mechanical handling.....	35
6.4.13	Corrosion protection.....	36
6.5	Guarantees.....	36
6.5.1	General.....	36
6.5.2	Discharge closure devices	37
6.5.3	Turbine	37
6.5.4	Generator	37
6.5.5	Governor.....	38
6.5.6	Speed increaser.....	38
6.5.7	Excitation equipment.....	38
6.5.8	Comments concerning the complete generating set	38
6.5.9	Main transformer.....	39
6.6	General conditions for tender enquiries and comparison of tenders.....	39
6.6.1	General.....	39
6.6.2	Instructions to tenderers	39
6.6.3	General conditions of contract.....	39
6.6.4	Technical comparison of tenders	39
7	Inspection, delivery, operation and maintenance.....	41
7.1	General	41
7.2	Approval of the design and inspection of the work.....	42
7.2.1	Approval of design documents.....	42
7.2.2	Inspection of materials and sub-assemblies.....	42
7.2.3	Inspection at manufacturer's works	42
7.2.4	Delivery	43
7.2.5	Assembly at site	43
7.3	Commissioning.....	44
7.3.1	General.....	44
7.3.2	Preliminary checks before watering-up.....	44
7.3.3	Watering-up	44
7.3.4	Unit rotation	45
7.3.5	Preliminary checks and electrical load tests.....	46
7.4	Operation.....	46
7.4.1	Trial operation	46
7.4.2	Guarantee period.....	46
7.4.3	Normal operation	48
7.5	Training of personnel	49
7.6	Checking and maintenance.....	49
	Bibliography.....	52

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Electromechanical equipment guidance for
small hydroelectric installations**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 61116 has been prepared by IEC technical committee 4: Hydraulic turbines. It is an International Standard.

This second edition cancels and replaces the first edition published in 1992. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) harmonization of scope with IEC 62006;
- b) introduction of new technical aspects;
- c) overall editorial revision.

The text of this International Standard is based on the following documents:

Draft	Report on voting
4/510/CDV	4/521A/RVC

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.
