IEC 61189-3-302

Edition 1.0 2025-10

INTERNATIONAL STANDARD

Test methods for electrical materials, printed boards and other interconnection structures and assemblies - Part 3-302: Detection of plating defects in unpopulated circuit boards by computed tomography (CT)

About the IEC
The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications
The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform
The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, …). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished
Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc
If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch
Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org
The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD 3
1 Scope 5
2 Normative references 5
3 Terms and definitions 5
4 Test principle 5
5 Equipment 6
  5.1 X-ray CT scanner 6
    5.1.1 X-ray source system 6
    5.1.2 Mechanical scanning system 6
    5.1.3 Detector system 6
    5.1.4 Shielding facilities 7
  5.2 Software systems 7
6 Test environment 7
7 Test the steps 7
  7.1 Equipment preparation 7
  7.2 Sample clamping 7
  7.3 Parameter settings 8
    7.3.1 X-ray sources 8
    7.3.2 Scanning methods 8
    7.3.3 Scanning the field of view 8
    7.3.4 Number of frames scanned 8
    7.3.5 Scan time 8
  7.4 Scanning 8
  7.5 Image reconstruction 9
    7.5.1 3D reconstruction 9
    7.5.2 Image quality 9
    7.5.3 Visualization 9
    7.5.4 Image analysis and data processing 9
    7.5.5 Image saving 9
8 Reports 9
  8.1 Basic information 9
  8.2 Device information 9
  8.3 Sample information 9
  8.4 Sweep parameters 10
  8.5 Measurement results 10
Annex A (informative) Typical images of plating defects 11
  A.1 Typical image of plating voids 11
  A.2 Typical image of blind via copper filling defects 11
  A.3 Typical image of nodulation 12
  A.4 Typical image of plating folds 12
  A.5 Typical image of interlayer coincidence 13
Annex B (informative) Void identification and statistical analysis 14
  B.1 Void identification 14
    B.1.1 Principle 14
    B.1.2 Via 14

B.1.3 Fill hole ... 15
B.2 Statistical analysis ... 15
B.2.1 Number of voids ... 15
B.2.2 Calculation of the maximum length of the voids/board thickness ratio ... 15
B.2.3 Calculation of filled holes void rate ... 16
Bibliography ... 17

Figure 1 – Typical process of CT analysis ... 5
Figure A.1 – Plating voids ... 11
Figure A.2 – Blind via copper filling defects ... 12
Figure A.3 – Plating nodulation ... 12
Figure A.4 – Plating folds ... 13
Figure A.5 – Interlayer coincidence ... 13
Figure B.1 – Plating holes voids recognition image ... 14
Figure B.2 – Identification of the void along the board thickness direction ... 14
Figure B.3 – Fill holes voids recognition image ... 15
Figure B.4 – Microvia void image ... 15

Table 1 – Reference examples of focal size and spatial resolution correspondence for source focus size ... 6
Table 2 – Reference examples of the imaging resolution of the detector system corresponding to the imaging field of view ... 6
