About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications, previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC -

webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications, symboles graphiques et le glossaire. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 500 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 25 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Warning! Make sure that you obtained this publication from an authorized distributor.

Attention! Veuillez vous assurer que vous avez obtenu cette publication via un distributeur agréé.

INTRODUCTION	8
1 Scope.....	9
2 Normative references.....	9
3 Terms, definitions and abbreviated terms.....	10
3.1 Terms and definitions.....	10
4 Classification	10
4.13 End-of-life mode of the SPDA	10
4.100 Power system.....	10
4.100.1 AC between 47 Hz and 63 Hz	10
4.100.2 AC other than the range of 47 Hz to 63 Hz	10
5 Void	10
6 Marking and other product information	10
6.2 List of items	10
6.2.100 Markings which are required on the body, or permanently attached to the body, of the SPD	11
6.2.100.1 Markings which shall be visible after installation.....	11
6.2.100.2 Markings which are not required to be visible after installation.....	11
6.2.101 Information to be provided by the manufacturer	11
6.2.102 Information which shall be provided by the manufacturer for type testing, as applicable	11
7 Service conditions	11
7.100 Frequency.....	11
8 Requirements.....	11
8.3 Electrical requirements.....	11
8.3.6.4 Dedicated overstress behaviour	11
8.3.9 Behaviour under temporary overvoltages	12
8.3.9.100 TOVs caused by faults or disturbances in the low voltage system	12
8.3.9.101 TOVs caused by faults in the high (medium) voltage system	12
8.5 Environmental and material requirements.....	12
8.5.5 Ageing behaviour under damp heat	12
8.6.100 Portable SPDs defined as pluggable equipment type A.....	12
9 Tests.....	12
9.1 Type testing procedures	12
9.1.1 General.....	12
9.3 Electrical tests.....	17
9.3.3 Protective conductor current I_{PE}	17
9.3.3.1 Test procedure	17
9.3.5 Operating duty test	17
9.3.5.2 Power source characteristics for the operating duty test	17
9.3.5.2.1 General	17
9.3.5.2.3 SPD's modes of protection with follow current according to Annex B of IEC 61643-01	17
9.3.6 Safety performance of overstressed SPDs	17
9.3.6.2 Thermal protection test	17
9.3.6.2.2 Test settings	17

9.3.6.3 Short-circuit current behaviour test.....	18
9.3.6.3.3 Test at the declared short-circuit current rating.....	18
9.3.6.3.4 Test at low short-circuit current.....	18
9.3.6.4 Dedicated overstress test.....	19
9.3.6.4.100 Sample preparation.....	19
9.3.6.4.101 Test procedure.....	19
9.3.6.4.102 Pass criteria.....	21
9.3.9 Behaviour under temporary overvoltages (TOVs).....	21
9.3.9.100 TOVs caused by faults in the low voltage system.....	21
9.3.9.100.1 General.....	21
9.3.9.100.2 Test procedure.....	21
9.3.9.100.3 Pass criteria.....	23
9.3.9.101 TOVs caused by faults in the high (medium) voltage system.....	23
9.3.9.101.1 General.....	23
9.3.9.101.2 Test procedure.....	23
9.3.9.101.3 Pass criteria.....	25
9.5 Environmental and material tests.....	25
9.5.5 Life test under damp heat.....	25
Annex AA (normative) Application of annexes from IEC 61643-01.....	26
Annex BB (normative) Test voltages for SPDs – U_{test}	27
Annex CC (normative) TOV Ratings.....	33
CC.1 Overview.....	33
CC.2 TOV ratings based on IEC 60364-4-44:2024, Clause 442.....	33
CC.3 Other TOV ratings for specific distribution systems or countries.....	34
CC.3.1 General.....	34
CC.3.2 North American systems.....	34
CC.3.3 Japanese systems.....	35
Annex DD (normative) Reduced test procedures.....	36
Annex EE (normative) Portable SPDs defined as pluggable equipment type A.....	38
EE.1 General.....	38
EE.2 Additional requirements.....	38
EE.3 Modified test requirements.....	39
EE.3.1 Test at low short-circuit current.....	39
EE.3.2 Dedicated overstress test.....	39
EE.3.3 Behaviour under temporary overvoltages (TOVs).....	39
Bibliography.....	41
Figure 100 – Test circuit for the dedicated overstress test.....	20
Figure 101 – Timing diagram for the dedicated overstress test.....	20

INTERNATIONAL ELECTROTECHNICAL COMMISSION

LOW-VOLTAGE SURGE PROTECTIVE DEVICES –**Part 11: Surge protective devices connected to AC low-voltage power systems – Requirements and test methods****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 61643-11 has been prepared by subcommittee 37A: Low-voltage surge protective devices, of IEC technical committee 37: Surge arresters. It is an International Standard.

This second edition cancels and replaces the first edition published in 2011. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) Specific requirements for SPDs for AC applications are now contained in this document, whereas the common requirements for all SPDs are now contained in IEC 61643-01;
- b) Clarification on test application either to a complete SPD, to a "mode of protection", or to a complete "SPD assembly";

- c) Additional measurement of voltage protection level on "combined modes of protection" between live conductors and PE;
- d) Additional duty test for T1 and T2 SPDs with follow current to check variation of the follow current value at lower impulse currents;
- e) Modified and amended short circuit current test requirements to better cover up to date internal SPD disconnecter technologies;
- f) Improved dielectric test requirements for the SPD's main circuits and added dielectric test requirements for "electrically separated circuits";
- g) Additional clearance requirements for "electrically separated circuits".

The requirements of this document supplement, modify or replace certain of the general requirements contained in IEC 61643-01 and shall be read and applied together with the latest edition of IEC 61643-01, as indicated by the undated normative reference in Clause 2 of this document.

Numbering of clauses follows the numbering of IEC 61643-01, but, dependent on the application of clauses from IEC 61643-01, does not necessarily follow sequentially.

If a clause in IEC 61643-01 is not explicitly called up or referred to in this document, then this clause does not apply to SPDs covered by this document. Any instructions in this document calling up clauses from IEC 61643-01 are written in *italic type*.

NOTE In other words, if e.g. Clause 4 is called up in this document all subclauses of Clause 4 of IEC 61643-01 are applied without modification. But, if e.g. some modifications are required on subclauses of Clause 9 of IEC 61643-01, then the relevant second level subclauses of IEC 61643-01 (e.g. 9.3, 9.5 etc.) are called up separately and it is indicated how they are applied.

The numbering of additional subclauses to IEC 61643-01 in this document starts with the number 100 in the last section of the subclause added (see e.g. 4.100). The numbering of additional tables and figures to IEC 61643-01 in this document starts with the number 100.

The text of this International Standard is based on the following documents:

<https://standards.iteh.ai/catalog/standards/iec/6a4fce32-8b41-400a-880a-0ecc388bdfad/iec-61643-11-2025>

Draft	Report on voting
37A/427/FDIS	37A/431/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

A list of all parts in the IEC 61643 series, published under the general title *Low-voltage surge protective devices*, can be found on the IEC website.
