About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications, previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC -

webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications, symboles graphiques et le glossaire. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 500 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 25 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

FOREWORD	4
INTRODUCTION	6
1 Scope	8
2 Normative references	8
3 Terms and definitions	8
4 General	20
4.1 Quality, security, and risk management	20
4.2 Test grades	20
4.3 Compliance	21
4.4 Testing the radiotherapy treatment planning system installation	21
5 Accompanying documentation	22
5.1 General	22
5.2 Instructions for use	23
6 General requirements for operational safety	23
6.1 Distances and linear and angular dimensions	23
6.2 Coordinate systems, movements, and scales (see Clause A.2)	24
6.3 Radiation quantities	25
6.4 Date and time format	25
6.5 Security	26
6.5.1 Protection against unauthorized use	26
6.5.2 Data backup and recovery	26
6.5.3 Protection against unauthorized activities	27
6.5.4 Change in software versions	27
6.5.5 Installation of radiotherapy treatment planning system	28
6.6 Data limits	28
6.7 Patient identification	29
6.8 Interfaces	29
6.8.1 Correctness of data transfer	29
6.8.2 Data input to the radiotherapy treatment planning system	30
6.8.3 Data output from the radiotherapy treatment planning system	31
7 Approvals and modifications	31
7.1 Approving an item	31
7.2 Modifying an approved item	31
7.3 Deletion of an approved item	32
7.4 History of an approved item	32
8 Algorithms	32
8.1 Algorithms affecting clinical decisions	32
8.2 Absorbed dose calculation	33
8.2.1 Accuracy	33
8.2.2 Absorbed dose calculation algorithm input data	33
8.2.3 Patient specific beam modifying devices calculation	34
8.2.4 Elapsed time calculations in brachytherapy	35
8.2.5 Imaging dose calculation	35
8.3 Radiobiological effect	35
9 Modelling	36
9.1 Equipment modelling	36

9.1.1	General equipment modelling	36
9.1.2	Equipment model approval	37
9.1.3	Radiation modelling	37
9.1.4	Preconfigured model	39
9.1.5	External beam equipment	40
9.1.6	Imaging equipment	41
9.1.7	Immobilization and supporting devices modelling	42
9.1.8	Patient specific beam modifying devices modelling	42
9.2	Patient modelling	42
9.2.1	General patient modelling	42
9.2.2	Patient model identification	43
9.2.3	Regions of interest	43
9.2.4	Image registration	43
9.2.5	Patient model approval	43
9.3	Radiobiological effect modelling	44
9.3.1	General radiobiological effect modelling	44
9.3.2	Radiobiological effect model approval	44
10	Radiation treatment prescription	44
10.1	Display of radiation treatment prescription	44
10.2	Change of radiation treatment prescription	45
10.3	Radiation treatment prescription approval	45
11	Treatment planning	45
11.1	Display of radiation treatment prescription	45
11.2	Treatment plan limits	45
11.3	Patient orientation	45
11.4	Summation of absorbed dose distributions	46
11.5	Evaluation of absorbed dose distribution	46
11.6	Treatment plan identification	46
11.7	Treatment plan approval	47
12	Quality assurance plan	47
13	Treatment plan record	47
13.1	Treatment plan record parameters	47
13.2	Treatment plan record parameters for external beam equipment	48
13.3	Treatment plan record parameters for brachytherapy	49
14	Treatment plan report	49
14.1	Treatment plan report information	49
14.2	Treatment plan report for external beam equipment	50
14.3	Treatment plan report for brachytherapy	50
14.4	Treatment plan report for a treatment plan with unapproved models	50
15	Treatment plan export	50
15.1	Treatment plan export parameters	50
15.2	Treatment plan export parameters for external beam equipment	51
15.3	Treatment plan export parameters for brachytherapy	51
16	Adaptive radiotherapy	52
16.1	Treatment plans correlations	52
16.2	Offline adaptive radiotherapy	52
16.3	Online adaptive radiotherapy	52
16.4	Real-time adaptive radiotherapy	53

INTERNATIONAL ELECTROTECHNICAL COMMISSION

Medical device software - Requirements for the safety of radiotherapy treatment planning systems

FOREWORD

1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.

2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.

3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.

4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.

5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.

6) All users should ensure that they have the latest edition of this publication.

7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.

8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.

9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 62083 has been prepared by IEC subcommittee 62C: Equipment for radiotherapy, nuclear medicine and radiation dosimetry, of IEC technical committee 62: Medical equipment, software, and systems. It is an International Standard.

This third edition cancels and replaces the second edition published in 2009. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- modification of the title from Medical electrical system - Requirements for the safety of radiotherapy treatment planning systems, to Medical device software - Requirements for the safety of radiotherapy treatment planning systems;
- **adaptive radiotherapy** is added in **Clause 16**;
- the title reflects different implementations of **radiotherapy treatment planning systems**.

The text of this document is based on the following documents:

FDIS	Report on voting
62C/957/FDIS	62C/966/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.
