

INTERNATIONAL STANDARD

COMMENTED VERSION

**Plugs, socket-outlets, vehicle connectors and vehicle inlets - Conductive
charging of electric vehicles -
Part 1: General requirements**

About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	6
INTRODUCTION	8
1 Scope	9
2 Normative references	9
3 Terms and definitions	11
4 General	22
4.1 General requirements	22
4.2 Components	22
4.2.1 Ratings	22
4.2.2 Mechanical assembly	22
4.2.3 Current-carrying parts of incorporated components	23
4.2.4 Electrical connections	23
4.3 General notes on tests	23
5 Ratings	27
5.1 Preferred rated operating voltage ranges	27
5.2 Preferred rated currents	27
5.2.1 General	27
5.2.2 Rated current for signal or control purposes	27
5.2.3 Accessories not suitable for making and breaking an electrical circuit under load	28
5.2.4 Accessories suitable for, or not suitable for, making and breaking an electrical circuit under load	28
6 Connection between the power supply and the electric vehicle	28
6.1 Interfaces	28
6.2 Basic interface	28
6.3 DC interface	28
6.4 Combined interface	28
7 Classification of accessories	28
7.1 According to purpose	28
7.2 According to the method of connecting the conductors	28
7.3 According to serviceability	29
7.4 According to electrical operation	29
7.5 According to interface	29
7.6 According to locking facilities	29
7.7 According to interlock facilities	29
7.8 According to the presence of shutter(s)	29
8 Marking	29
9 Dimensions	32
10 Protection against electric shock	33
10.1 General	33
10.2 Accessories with shutters	33
10.3 Contact sequencing and order of contact insertion and withdrawal	36
10.4 Misassembly	37
11 Size and colour of protective earthing and neutral conductors	37
12 Provisions for earthing	38
13 Terminals	40

13.1	Common requirements	40
13.2	Screw type terminals	42
13.3	Mechanical tests on terminals	44
14	Interlocks	47
14.1	Accessories with interlock	47
14.2	Accessories with integral switching device	55
14.3	Control circuit devices and switching elements	56
14.4	Pilot contacts and auxiliary circuits	56
15	Resistance to ageing of rubber and thermoplastic material	56
16	General construction	56
17	Construction of EV socket-outlets —General	61
18	Construction of EV plugs and vehicle connectors	61
19	Construction of vehicle inlets	62
20	Degrees of protection	63
21	Insulation resistance and dielectric strength	65
22	Breaking capacity	66
23	Normal operation	69
23.1	Mechanical, electrical, and thermal stresses and contaminants	69
23.2	Load endurance test	69
23.3	No-load endurance test	70
23.4	Lid springs	71
24	Temperature rise	71
25	Flexible cables and their connection	74
25.1	Strain relief	74
25.2	Requirements for EV plugs and vehicle connectors	74
25.2.1	Non-rewirable EV plugs and vehicle connectors	74
25.2.2	Rewirable EV plugs and vehicle connectors	74
25.3	EV plugs and vehicle connectors provided with a flexible cable	75
25.4	Cables	76
26	Mechanical strength	76
26.1	General	76
26.2	Ball impact	77
26.3	Drop test	79
26.4	Flexing test	80
26.5	Cable gland test	81
26.6	Shutters	82
26.7	Insulated end caps	82
26.7.1	General	82
26.7.2	Insulated end caps – Change of temperature test	83
26.7.3	Insulated end caps – Pull test	83
27	Screws, current-carrying parts and connections	83
28	Creepage distances, clearances and distances through sealing compound	86
29	Resistance to heat and to fire	87
30	Corrosion and resistance to rusting	88
31	Conditional short-circuit current	89
31.1	General	89

31.2	Ratings and test conditions	89
31.3	Test circuit	90
31.4	Calibration	94
31.5	Test procedure	94
31.6	Behaviour of the equipment under test	94
31.7	Acceptance conditions	94
32	Electromagnetic compatibility	94
32.1	Immunity	94
32.2	Emission	94
33	Vehicle drive over	94
34	Thermal cycling	95
34.1	General	95
34.2	Initial temperature rise test	95
34.3	Thermal cycling test	96
34.4	Final temperature rise test	96
35	Humidity exposure	96
35.1	General	96
35.2	Initial temperature rise test	96
35.3	Humidity test	96
35.4	Final temperature rise test	97
36	Misalignment	97
36.1	General	97
36.2	Samples	97
36.3	Misalignment test	98
37	Contact endurance test	100
37.1	Equipment	100
37.2	Test sequence	101
37.3	Compliance	102
	Annex A (normative) Standard sheets for test gauges in 14.1.9	104
	Annex B (informative) EV accessories directly connected to printed circuit boards (PCBs)	108
	B.1 General	108
	B.2 Terminals	108
	B.2.1 General	108
	B.2.2 Accessories intended to be directly connected to PCBs	108
	B.3 Temperature rise	109
	Bibliography	110
	List of comments	113
	Figure 1 – Diagram showing the use of the accessories	12
	Figure 2 – Lug terminals	16
	Figure 3 – Mantle terminals	16
	Figure 4 – Pillar terminals	17
	Figure 5 – Saddle terminals	19
	Figure 6 – Screw terminals	19
	Figure 7 – Stud terminals	20
	Figure 8 – Test piston	32

Figure 9 – Gauge "A" for checking shutters.....	34
Figure 10 – Gauge "B" for checking shutters.....	35
Figure 11 – Gauges for testing insertability of round unprepared conductors having the maximum specified cross-section.....	43
Figure 12 – Equipment test arrangement	45
Figure 13 – Apparatus for checking the withdrawal force	50
Figure 14 – Verification of the latching device.....	51
Figure 15 – Apparatus for checking the maximum force (F2) exerted by the retaining means.....	53
Figure 16 – Test gauge "vehicle inlet" and test arrangement in mated position for checking retaining means zone	54
Figure 17 – Example of an apparatus for checking the proper functioning of the latching device.....	55
Figure 18 – Nomenclature for a mounted vehicle inlet.....	64
Figure 19 – Circuit diagrams for breaking capacity and normal operation tests	68
Figure 20 – Example of points of measurement for DUT containing pin contacts	73
Figure 21 – Apparatus for testing the cable anchorage	75
Figure 22 – Ball impact test	77
Figure 23 – Arrangement for mechanical strength test for EV plugs and vehicle connectors	79
Figure 24 – Apparatus for flexing test	81
Figure 25 – Diagram of the test circuit for the verification of short-circuit current withstand of two-pole equipment on a single-phase AC or DC.....	91
Figure 26 – Diagram of the test circuit for the verification of short-circuit current withstand of three-pole equipment	92
Figure 27 – Diagram of the test circuit for the verification of short-circuit current withstand of four-pole equipment	93
Figure 28 – Overview of the mechanical load test	98
Figure 29 – Application of external mechanical load (mounted according to Figure 28)	99
Figure 30 – Temperature rise criteria under external mechanical load.....	100
Figure 31 – Forced-air circulating oven	101
Figure 32 – Thermal cycling.....	102
Figure 33 – Pass/fail based on temperature rise criteria.....	103
Table 1 – Test sequence A	25
