About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	5
INTRODUCTION	1
INTRODUCTION to Amendment 1	1
1 Scope	8
2 Normative references	8
3 Terms and definitions	9
4 Symbols	15
5 Configuration of small stationary fuel cell power system	21
6 Reference conditions	22
7 Heating value base	22
8 Test preparation	22
8.1 General	22
8.2 Uncertainty analysis	22
8.3 Data acquisition plan	23
9 Test set-up	23
10 Instruments and measurement methods	25
10.1 General	27
10.2 Measurement instruments	27
10.3 Measurement points	28
10.4 Minimum required measurement systematic uncertainty	30
11 Test conditions	30
11.1 Laboratory conditions	30
11.2 Installation and operating conditions of the system	31
11.3 Power source conditions	31
11.4 Test fuel	31
12 Operating process	31
13 Test plan	31
14 Type tests on electric and thermal performance	34
14.1 General	34
14.2 Fuel consumption test	34
14.2.1 Gaseous fuel consumption test	34
14.2.2 Liquid fuel consumption test	37
14.3 Electric power output test	39
14.3.1 General	39
14.3.2 Test method	39
14.3.3 Calculation of average net electric power output	39
14.4 Heat recovery test	40
14.4.1 General	40
14.4.2 Test method	40
14.4.3 Calculation of average recovered thermal power	40
14.5 Start-up test	42
14.5.1 General	42
14.5.2 Determination of nominal state of charge of the battery	42
14.5.3 Test method	42
14.5.4 Calculation of results	45

14.6	Ramp-up test	47
14.6.1	General	47
14.6.2	Test method	47
14.6.3	Calculation of results	48
14.7	Storage state test	49
14.7.1	General	49
14.7.2	Test method	49
14.7.3	Calculation of average electric power input in storage state	49
14.8	Electric power output change test	50
14.8.1	General	50
14.8.2	Test method	50
14.8.3	Calculation of electric power output change rate	52
14.9	Shutdown test	53
14.9.1	General	53
14.9.2	Test method	53
14.9.3	Calculation of results	54
14.10	Computation of efficiency	55
14.10.1	General	55
14.10.2	Electrical efficiency	55
14.10.3	Heat recovery efficiency	56
14.10.4	Overall energy efficiency	56
14.11	Rated operation cycle efficiency	56
14.11.1	General	56
14.11.2	Calculation of the operation cycle fuel energy input	57
14.11.3	Calculation of the operation cycle net electric energy output	58
14.11.4	Calculation of the operation cycle electrical efficiency	59
14.12	Electromagnetic compatibility (EMC) test	59
14.12.1	General requirement	59
14.12.2	Electrostatic discharge immunity test	60
14.12.3	Radiated, radio-frequency, electromagnetic field immunity test	60
14.12.4	Electrical fast transient/burst immunity test	60
14.12.5	Surge immunity test	60
14.12.6	Immunity test of conducted disturbances induced by radio-frequency fields	60
14.12.7	Power frequency magnetic field immunity test	60
14.12.8	Voltage dips and voltage interruptions	60
14.12.9	Radiated disturbance (emission) measurement test	60
14.12.10	Conducted disturbance (emission) measurement test	61
14.12.11	Power line harmonics emission measurement test	61
14.13	Estimation of electric and heat recovery efficiency up to ten years of operation	61
14.13.1	General	61
14.13.2	Test method	63
14.13.3	Calculation of estimated electrical efficiency	64
14.13.4	Calculation of estimated heat recovery efficiency	65
14.14	Electric demand-following test	66
14.14.1	General	66
14.14.2	Electric demand profile	66
14.14.3	Test method	67

14.14.4	Calculation of results	67
14.14.5	Calculation of efficiencies	69
15	Type tests on environmental performance	69
15.1	General.....	69
15.2	Noise test	69
15.2.1	General	69
15.2.2	Test conditions	69
15.2.3	Test method	70
15.2.4	Processing of data.....	71
15.3	Exhaust gas test	71
15.3.1	General	71
15.3.2	Components to be measured	71
15.3.3	Test method	72
15.3.4	Processing of data.....	74
15.4	Discharge water test	85
15.4.1	General	85
15.4.2	Test method	85
16	Test reports	86
16.1	General.....	86
16.2	Title page.....	86
16.3	Table of contents	86
16.4	Summary report	86
Annex A (normative)	Heating values for components of natural gas	87
Annex B (informative)	Examples of compositions for natural gas and propane gas	89
Annex C (informative)	Example of a test operation schedule.....	91
Annex D (informative)	Typical exhaust gas components.....	92
Annex E (informative)	Guidelines for the contents of detailed and full reports	93
E.1	General.....	93
E.2	Detailed report.....	93
E.3	Full report	93
Annex F (informative)	Selected duration of rated power operation	94
Bibliography		95
Figure 1	– Symbol diagram	19
Figure 2	– General configuration of small stationary fuel cell power system	21
Figure 3	– Test set-up for small stationary fuel cell power system fed with gaseous fuel which supplies electricity and useful heat.....	25
Figure 4	– Test set-up for small stationary fuel cell power system fed with gaseous fuel which supplies only electricity	27

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Fuel cell technologies -
Part 3-201: Stationary fuel cell power systems -
Performance test methods for small fuel cell power systems**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

This redline version of the official IEC Standard allows the user to identify the changes made to the previous edition IEC 62282-3-201:2017+AMD1:2022 CSV. A vertical bar appears in the margin wherever a change has been made. Additions are in green text, deletions are in strikethrough red text.
