About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	6
1 Scope.....	8
2 Normative references	8
3 Terms, definitions and abbreviated terms.....	8
3.1 Terms and definitions.....	8
3.2 Abbreviated terms.....	9
4 Structure of measuring equipment	10
5 Standard measuring conditions.....	10
5.1 Standard measuring environmental conditions	10
5.2 Standard measuring dark room conditions	10
5.3 Standard setup conditions.....	10
5.3.1 General	10
5.3.2 Adjustment of OLED displays	10
5.3.3 Starting conditions of measurements	10
5.3.4 Measuring equipment requirements	11
5.4 Standard locations of measurement field.....	13
5.5 Standard test patterns.....	13
6 Measuring methods for optical parameters	23
6.1 Primary luminance, colour, and uniformity of full-colour high-resolution modules displays	23
6.1.1 Purpose	23
6.1.2 Measuring conditions.....	23
6.1.3 Measuring methods for high-resolution full- colour modules colours.....	23
6.1.4 Maximum luminance of white and RGB primaries.....	25
6.1.5 Average colour of maximum white and RGB primaries	25
6.1.6 Luminance uniformity of white and RGB primaries	26
6.1.7 Colour Chromaticity non-uniformity of maximum white and RGB primaries	27
6.1.8 Colour additivity of maximum white and RGB primaries	27
6.1.9 White correlated colour temperature	27
6.2 Primary luminance, colour chromaticity and uniformity of low-resolution modules displays	28
6.2.1 Purpose	28
6.2.2 Measuring conditions.....	28
6.2.3 Measuring methods for low-resolution- modules displays and segmented displays	28
6.3 Signal loading	29
6.3.1 Purpose	29
6.3.2 Measuring conditions.....	29
6.3.3 Measuring methods	29
6.4 Dark room contrast ratio	30
6.4.1 Purpose.....	30
6.4.2 Measuring conditions.....	30
6.4.3 Measuring method	30
6.5 Display colour gamut, colour gamut area, and colour gamut volume Chromaticity gamut area	31
6.5.1 Purpose	31

6.5.2	Measuring conditions	31
6.5.3	Measuring methods	31
6.5.4	Display colour gamut	31
6.5.5	Display colour gamut area in the CIE 1976 chromaticity diagram	31
6.5.4	Chromaticity gamut area in CIE 1931 chromaticity diagram	33
6.6	Colour gamut volume	34
6.6.1	Purpose	35
6.6.2	Measuring conditions	36
6.6.3	Measuring methods	36
7	Measuring methods for power consumption	39
7.1	Purpose	39
7.2	Measuring conditions	39
7.3	Measuring methods	39
7.3.1	Measuring the power consumption relevant to luminance of the OLED display module without signal decoding process	39
7.3.2	Measuring the power consumption of the OLED display module's embedded video connection terminal with a signal decoding process	40
Annex A (normative)	Response time of passive matrix display panels	43
A.1	Purpose	43
A.2	Measuring conditions	43
A.3	Measuring methods	43
Annex B (normative)	Luminance current efficiency	45
B.1	Purpose	45
B.2	Measuring conditions	45
B.3	Measuring methods	45
Annex C (informative)	Veiling glare frustum	47
Annex D (informative)	Methods to obtain the correlated colour temperature (CCT) from chromaticity coordinates	48
D.1	Method 1: Use of McCamy's approximate formula	48
D.2	Method 2: Use of Javier Hernandez-Andres's approximate formula	48
D.3	Method 3: Graphical determination of correlated colour temperature	49
Annex E (informative)	Measuring performance of modern colour-managed displays and panels	52
E.1	Legacy displays	52
E.2	Modern displays	52
E.3	Results	54
E.4	Conclusion	57
Annex F (informative)	Simple window luminance and colour measurements	58
F.1	Background	58
F.2	Measuring conditions	58
F.3	Maximum full screen luminance	58
F.4	4 % window luminance	58
F.5	Sampled luminance non-uniformity	59
F.6	4 % window centre colour	59
F.7	Sampled colour non-uniformity	60

INTERNATIONAL ELECTROTECHNICAL COMMISSION

ORGANIC LIGHT EMITTING DIODE (OLED) DISPLAYS –

Part 6-1: Measuring methods of optical and electro-optical parameters

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

This commented version (CMV) of the official standard IEC 62341-6-1:2025 edition 4.0 allows the user to identify the changes made to the previous IEC 62341-6-1:2022 edition 3.0. Furthermore, comments from IEC TC 110 experts are provided to explain the reasons of the most relevant changes, or to clarify any part of the content.

A vertical bar appears in the margin wherever a change has been made. Additions are in green text, deletions are in strikethrough red text. Experts' comments are identified by a blue-background number. Mouse over a number to display a pop-up note with the comment.

This publication contains the CMV and the official standard. The full list of comments is available at the end of the CMV.
