About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	6
INTRODUCTION.....	9
1 Scope.....	10
2 Normative references	11
3 Terms, definitions and abbreviated terms	12
3.1 Terms and definitions.....	12
3.2 Abbreviated terms.....	22
4 Overall framework of this document.....	23
5 Requirements for developing safety-related electronic systems	25
5.1 General.....	25
5.2 The quality management process.....	25
5.3 The safety management process.....	27
5.3.1 General	27
5.3.2 Guideline for structuring documentation.....	27
5.3.3 Safety life cycle	28
5.3.4 Safety organization.....	28
5.3.5 Safety plan	30
5.3.6 Hazard log.....	31
5.3.7 Safety requirements specification	31
5.3.8 System design for safety	31
5.3.9 Safety operation and maintenance plan	32
5.3.10 Safety verification	32
5.3.11 Safety validation	33
5.3.12 Safety qualification tests.....	34
5.3.13 Management of safety-related application conditions	35
5.3.14 Safety justification	36
5.3.15 Independent safety assessment.....	37
6 Requirements for elements following different life cycles	37
6.1 General.....	37
6.2 Use of pre-existing items	38
6.2.1 General	38
6.2.2 Requirements for use of complete pre-existing systems.....	39
6.2.3 Requirements for use of pre-existing equipment	39
6.3 Safety-related tools for electronic systems	40
6.4 Physical security and cybersecurity.....	41
7 The safety case: structure and content	42
7.1 The safety case structure	42
7.2 The technical safety report.....	44
7.3 Generic and specific safety cases	53
7.4 Provisions for the specific application safety case.....	53
7.5 Dependencies between safety cases	54
8 System safety acceptance and subsequent phases	55
8.1 System safety acceptance process	55
8.2 Operation, maintenance and performance monitoring	59
8.3 Modification and retrofit	59
8.4 Decommissioning and disposal	59

Annex A (normative) Safety integrity levels	60
A.1 General.....	60
A.2 Safety requirements.....	60
A.3 Safety integrity.....	61
A.4 Determination of safety integrity requirements	61
A.4.1 General	61
A.4.2 Risk assessment	63
A.4.3 Hazard control	65
A.4.4 Identification and treatment of new hazards arising from design	71
A.5 Allocation of SILs	72
A.5.1 General aspects	72
A.5.2 Relationship between SIL and associated TFFR	73
Annex B (normative) Management of faults for safety-related functions	75
B.1 General.....	75
B.2 General concepts.....	75
B.2.1 Detection and negation times.....	75
B.2.2 Composition of two independent items.....	76
B.3 Effects of faults	77
B.3.1 Effects of single faults	77
B.3.2 Independence of items.....	79
B.3.3 Detection of single faults	84
B.3.4 Action following detection (retention of safe state)	87
B.3.5 Effects of multiple faults	88
B.3.6 Defence against systematic faults.....	91
Annex C (normative) Identification of hardware component failure modes	92
C.1 General.....	92
C.2 General procedure	92
C.3 Procedure for integrated circuits	92
C.4 Procedure for components with inherent physical properties	93
C.5 General provisions concerning component failure modes	93
Annex D (informative) Example of THR/TFFR/FR apportionment and SIL allocation.....	111
Annex E (normative) Techniques and measures for the avoidance of systematic faults and the control of random and systematic faults	113
E.1 General.....	113
E.2 Tables of techniques and measures	115
Annex F (informative) Guidance on User Programmable Integrated Circuits.....	123
F.1 General.....	123
F.1.1 Purpose	123
F.1.2 Terminology and context.....	123
F.2 UPIC life cycle	124
F.2.1 General	124
F.2.2 Organization, roles, responsibilities and personnel competencies	126
F.2.3 UPIC Requirements	126
F.2.4 UPIC Architecture and Design	127
F.2.5 Logic Component Design	128
F.2.6 Logic Component Coding.....	128
F.2.7 Logic Component Verification	128
F.2.8 UPIC Physical Implementation.....	128

F.2.9	UPIC Integration	128
F.2.10	UPIC Validation	128
F.2.11	Requirements for use of pre-existing logic components	128
F.3	Detailed technical requirements for UPIC.....	128
F.3.1	Guidance on safety architecture	128
F.3.2	Protection against random faults – architectural principles.....	129
F.3.3	Protection against systematic faults – techniques and measures	129
Annex G (informative)	Changes in this document compared to IEC 62425:2007.....	138
Bibliography		141
List of comments		143

Figure 1	– Scope of the main IEC and CENELEC railway application standards.....	11

Table E.3 – Safety organization	116
Table E.4 – Architecture of system, subsystem or equipment	117
Table E.5 – Design features	118
Table E.6 – Failure and hazard analysis methods	119
Table E.7 – Design and development of system, subsystem or equipment	120
Table E.8 – Safety verification and validation of the system, subsystem or equipment	121
Table E.9 – Application, operation and maintenance	122
Table F.1 – Example of documentation generated during each phase	126
Table F.2 – Simplified techniques and measures for protection against systematic failures	130
Table F.3 – Design and verification (including all activities before synthesis)	131
Table F.4 – Synthesis	131
Table F.5 – Placement, routing and layout generation	132
Table F.6 – Description of techniques for design	133
Table F.7 – Description of techniques for synthesis	136
Table F.8 – Description of techniques for placement, routing and layout generation	137
Table G.1 – Clauses and subclauses – correspondence with IEC 62425:2007	138
Table G.2 – Figures and tables – correspondence with IEC 62425:2007	140

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**RAILWAY APPLICATIONS –
COMMUNICATION, SIGNALLING AND PROCESSING SYSTEMS –
SAFETY RELATED ELECTRONIC SYSTEMS FOR SIGNALLING****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

This commented version (CMV) of the official standard IEC 62425:2025 edition 2.0 provides the user with comments from IEC TC 9 experts to explain the reasons of the most relevant changes made to the previous IEC 62425:2007 edition 1.0.

Experts' comments are identified by a blue-background number. Mouse over a number to display a pop-up note with the comment.

This publication contains the CMV and the official standard. The full list of comments is available at the end of the CMV.
