About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	5
INTRODUCTION	7
1 Scope	9
2 Normative references	9
3 Terms, definitions, symbols, abbreviated terms and conventions	9
3.1 Terms and definitions	9
3.2 Abbreviated terms	15
3.3 Conventions	15
4 FDT overview	15
4.1 State of the art	15
4.2 Objectives of FDT	16
4.2.1 General features	16
4.2.2 Device and module manufacturer benefits	17
4.2.3 System manufacturer and integrator benefits	18
4.2.4 Other applications	18
4.3 FDT model	18
4.3.1 General	18
4.3.2 Frame Applications	20
4.3.3 Device Type Manager	21
4.3.4 Communication Channel concept	22
4.3.5 Presentation object	24
5 Structure of the IEC 62453 series	24
5.1 Structure overview	24
5.2 Part 2 – Concepts and detailed description	27
5.3 Parts 3xy – Communication profile integration	27
5.3.1 General	27
5.3.2 Communication profile integration – IEC 61784 CPF 1	27
5.3.3 Communication profile integration – IEC 61784 CPF 2	28
5.3.4 Communication profile integration – IEC 61784 CP 3/1 and 3/2	28
5.3.5 Communication profile integration – IEC 61784 CP 3/4, CP 3/5 and 3/6	28
5.3.6 Communication profile integration – IEC 61784 CPF 6	28
5.3.7 Communication profile integration – IEC 61784 CPF 9	28
5.3.8 Communication profile integration – IEC 61784 CPF 15	28
5.4 Parts 4z – Object model integration profiles	28
5.4.1 General	28
5.4.2 Object model integration profile – Common object model (COM)	29
5.4.3 Object model integration profile – Common language infrastructure (CLI)	29
5.4.4 Object model integration profile – CLI and HTML	29
5.5 Parts 51-xy/52-xy/53-xy – Communication profile implementation	29
5.5.1 General	29
5.5.2 Communication profile implementation – IEC 61784 CPF 1	29
5.5.3 Communication profile implementation – IEC 61784 CPF 2	29
5.5.4 Communication profile implementation – IEC 61784 CP 3/1 and 3/2	30
5.5.5 Communication profile implementation – IEC 61784 CP 3/4, CP 3/5 and 3/6	30
5.5.6 Communication profile implementation – IEC 61784 CPF 6	30

5.5.7	Communication profile implementation – IEC 61784 CPF 9	30
5.5.8	Communication profile implementation – IEC 61784 CPF 15.....	30
5.6	Parts 6z – DTM styleguides	30
5.6.1	General	30
5.6.2	Device Type Manager (DTM) styleguide for common object model	30
5.6.3	Field Device Tool (FDT) styleguide for common language infrastructure	30
5.7	Part 71 – OPC UA Information Model for FDT	30
6	Relation of the IEC 62453 series to other standardization activities	31
7	Migration to DTM	36
8	How to read IEC 62453.....	37
8.1	Architecture	37
8.2	Dynamic behaviour	37
8.3	Structured data types.....	38
8.4	Fieldbus communication	38
Annex A	(informative normative) UML notation	39
A.1	Common model elements.....	39
A.1.1	General	39
A.1.2	Note	39
A.2	Class diagram.....	39
A.2.1	General	39
A.2.2	Class	39
A.2.3	Abstract class	40
A.2.4	Association.....	40
A.2.5	Composition	40
A.2.6	Aggregation	40
A.2.7	Dependency	41
A.2.8	Association class	41
A.2.9	Generalization	41
A.2.10	Interface	42
A.2.11	Multiplicity	42
A.2.12	Enumeration class	42
A.3	Component diagram.....	43
A.3.1	General	43
A.3.2	Component.....	43
A.4	Statechart diagram	43
A.4.1	General	43
A.4.2	State	43
A.4.3	Initial state.....	44
A.4.4	Final state	44
A.4.5	Composite state.....	44
A.5	Use case diagram	44
A.5.1	General	44
A.5.2	Actor	45
A.5.3	Use case	45
A.5.4	Inheritance relation.....	45
A.6	Sequence diagram.....	45
A.6.1	General	45
A.6.2	Frame.....	47

A.6.3	Object with life line	47
A.6.4	Method calls	47
A.6.5	State and constraint.....	48
A.6.6	Alternative, optional and repetitive execution sequence	49
A.6.7	Break notation	50
A.6.8	Interaction references	50
A.7	Object diagram	50
Annex B (informative)	Implementation policy.....	51

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Field device tool (FDT) interface specification -
Part 1: Overview and guidance****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

This redline version of the official IEC Standard allows the user to identify the changes made to the previous edition IEC 62453-1:2016. A vertical bar appears in the margin wherever a change has been made. Additions are in green text, deletions are in strikethrough red text.
