### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search -

[webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Discover our powerful search engine and read freely all the publications, previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

#### Recherche de publications IEC -

[webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

#### Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications, symboles graphiques et le glossaire. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 500 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 25 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

## CONTENTS

FOREWORD .....	4
INTRODUCTION .....	6
1 Scope .....	7
2 Normative references .....	7
3 Terms, definitions and abbreviated terms .....	7
3.1 Terms and definitions .....	7
3.2 Abbreviated terms .....	11
4 Dependability elements of a socio-technical system .....	11
4.1 Overview .....	11
4.2 Task element .....	13
4.3 Human element .....	14
4.3.1 Role of humans in a system .....	14
4.3.2 Dependability characteristics of humans .....	15
4.4 Machine element .....	15
4.5 Organization and team elements .....	16
4.5.1 Overview .....	16
4.5.2 Teamwork and operational environment .....	16
4.5.3 Organizational environment and structure .....	16
4.5.4 Physical environment .....	16
4.5.5 Cultural environment .....	17
4.6 Feedback within the socio-technical system .....	17
5 Human-factors influence on dependability .....	18
5.1 Overview .....	18
5.2 Influence of the human element on dependability .....	19
5.2.1 Overview .....	19
5.2.2 Human strengths and limitations in an operational environment .....	19
5.2.3 Performance shaping factors (human factors) .....	20
5.2.4 External human factors .....	21
5.2.5 Internal human factors .....	21
5.2.6 Information processing .....	22
5.3 Influence of the machine element on dependability .....	22
5.4 Influence of the task element on dependability .....	23
5.4.1 General .....	23
5.4.2 Allocation of tasks to humans versus machines to optimize dependability .....	23
6 Human dependability programme: Identifying the steps to improve human dependability .....	23
6.1 Overview .....	23
6.2 Analysing dependability failures to define countermeasures .....	24
6.2.1 Overview .....	24
6.2.2 Human failures .....	24
6.2.3 Machine failures .....	26
6.2.4 Human – System interaction failures .....	26
6.3 Analysis of dependability data .....	27
6.4 Improving human dependability .....	27
6.4.1 Minimizing risk due to human-related failures .....	27
6.4.2 Human decision-making .....	28

6.5	Improving machine dependability through a human-factors approach .....	28
6.6	Improving socio-technical system dependability .....	29
7	Human dependability at each life-cycle stage .....	29
7.1	Overview of human dependability aspects of life-cycle stages .....	29
7.2	Concept and definition stage.....	30
7.2.1	Concept stage .....	30
7.2.2	Human-centred design planning .....	31
7.2.3	System requirements.....	31
7.2.4	Human-centred design requirements.....	31
7.3	Design and development stage .....	32
7.3.1	Human-centred design principles.....	32
7.3.2	Human-centred design guidelines .....	32
7.3.3	Human-centred design activities .....	34
7.3.4	Integrating human dependability into design and development.....	34
7.3.5	Human dependability analysis in design and development.....	35
7.4	Realization and implementation stage.....	35
7.5	Operations and maintenance stage.....	36
7.6	Enhancement stage .....	37
7.7	Retirement or decommissioning stage.....	37
Annex A (informative)	Examples of human reliability analysis (HRA) methods.....	38
Annex B (informative)	Summary of human-oriented design activities and their impact on system dependability.....	42
B.1	Overview .....	42
B.2	Automation .....	42
B.3	Design for maintainability .....	43
B.4	Human-machine interface.....	43
B.5	Incorporation of displays, controls, and alarm functions .....	44
B.6	Incorporation of input devices.....	44
B.7	Environment.....	45
B.8	Safety.....	45
B.9	Security .....	45
Annex C (informative)	Processes for human-centred design.....	46
Bibliography	.....	53
Figure 1	– Components and interaction of a socio-technical system.....	12
Figure 2	– Performance shaping factors (PSFs) that can influence human dependability.....	21
Figure 3	– Model of typical human information processing .....	22
Figure 4	– Hierarchy of human failures .....	25
Figure 5	– System life cycle.....	30
Figure 6	– Human-centred design activities .....	34
Table 1	– People who influence dependability .....	14
Table A.1	– HRA methods and their application .....	38
Table B.1	– Automation.....	42
Table B.2	– Design for maintainability.....	43

# INTERNATIONAL ELECTROTECHNICAL COMMISSION

## Guidance on human aspects of dependability

### FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 62508 has been prepared by IEC Technical Committee 56: Dependability. It is an International Standard.

This second edition cancels and replaces the first edition published in 2010. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) The emphasis on user-centred design in the previous edition was reduced in favour of a greater emphasis on human dependability in an existing operational environment.
- b) The emphasis on human error and error-rate determination methods was reduced in favour of a greater emphasis on means of providing organizational support for the workforce in their execution of required tasks.
- c) Where appropriate, discussions of human factors in an operational environment were aligned with current theory, terminology and practice.

The text of this International Standard is based on the following documents:

Draft	Report on voting
56/2074/FDIS	56/2096A/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/publications](http://www.iec.ch/publications).

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.
