### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search -

[webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

#### Recherche de publications IEC -

[webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

#### Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications, symboles graphiques et le glossaire. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 500 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 25 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

| 4 Concepts .....                                           | 9  |
| 5 Model .....                                              | 9  |
| 5.1 General .....                                          | 9  |
| 5.2 SemanticsChanged .....                                 | 10 |
| 5.3 Variable Types .....                                   | 10 |
| 5.3.1 DataItem Type .....                                  | 10 |
| 5.3.2 AnalogItem VariableTypes .....                       | 12 |
| 5.3.3 DiscreteItem Type .....                              | 15 |
| 5.3.4 ArrayItem Type .....                                 | 18 |
| 5.4 Address Space model .....                              | 25 |
| 5.5 Attributes of DataItems .....                          | 26 |
| 5.6 DataTypes .....                                        | 27 |
| 5.6.1 Overview .....                                       | 27 |
| 5.6.2 Range .....                                          | 27 |
| 5.6.3 EUInformation .....                                  | 27 |
| 5.6.4 ComplexNumberType .....                              | 30 |
| 5.6.5 DoubleComplexNumberType .....                        | 30 |
| 5.6.6 AxisInformation .....                                | 31 |
| 5.6.7 AxisScaleEnumeration .....                           | 32 |
| 5.6.8 XVType .....                                         | 32 |
| 6 Quantities and Units model .....                         | 33 |
| 6.1 General .....                                          | 33 |
| 6.2 Quantities entry point .....                           | 34 |
| 6.3 Syntax References .....                                | 34 |
| 6.3.1 General .....                                        | 34 |
| 6.3.2 Using Dictionary References .....                    | 35 |
| 6.3.3 Syntax Reference Identifier .....                    | 36 |
| 6.4 ObjectTypes .....                                      | 37 |
| 6.4.1 QuantityType ObjectType definition .....             | 37 |
| 6.4.2 UnitType and subtypes .....                          | 39 |
| 6.4.3 SyntaxReferenceEntryType ObjectType definition ..... | 43 |
| 6.5 References .....                                       | 44 |
| 6.5.1 HasEngineeringUnitDetails .....                      | 44 |
| 6.5.2 HasQuantity .....                                    | 45 |
| 6.6 DataTypes .....                                        | 45 |
| 6.6.1 AnnotationDataType DataType definition .....         | 45 |
| 6.6.2 LinearConversionDataType DataType definition .....   | 46 |
| 6.6.3 ConversionLimitEnum .....                            | 47 |
| 6.6.4 QuantityDimension .....                              | 48 |
| 7 Data Access specific usage of Services .....             | 50 |

|              |                                                                       |    |
|--------------|-----------------------------------------------------------------------|----|
| 7.1          | General.....                                                          | 50 |
| 7.2          | PercentDeadband .....                                                 | 50 |
| 7.3          | Data Access status codes .....                                        | 51 |
| 7.3.1        | Overview .....                                                        | 51 |
| 7.3.2        | Operation level result codes .....                                    | 51 |
| 7.3.3        | LimitBits .....                                                       | 52 |
| Annex A      | (normative) OPC COM DA to UA mapping .....                            | 53 |
| A.1          | Introduction.....                                                     | 53 |
| A.2          | Security Considerations .....                                         | 53 |
| A.3          | COM UA wrapper for OPC DA Server .....                                | 53 |
| A.3.1        | Information Model mapping.....                                        | 53 |
| A.3.2        | Data and error mapping .....                                          | 58 |
| A.3.3        | Read data.....                                                        | 60 |
| A.3.4        | Write Data .....                                                      | 61 |
| A.3.5        | Subscriptions.....                                                    | 62 |
| A.4          | COM UA proxy for DA Client .....                                      | 62 |
| A.4.1        | Guidelines .....                                                      | 62 |
| A.4.2        | Information Model and Address Space mapping .....                     | 63 |
| A.4.3        | Data and error mapping .....                                          | 67 |
| A.4.4        | Read data.....                                                        | 70 |
| A.4.5        | Write data.....                                                       | 71 |
| A.4.6        | Subscriptions.....                                                    | 72 |
| Annex B      | (normative) UCUM Symbols.....                                         | 73 |
| B.1          | Introduction – License .....                                          | 73 |
| B.2          | Representation .....                                                  | 73 |
| B.3          | Tables of terminal symbols .....                                      | 74 |
| B.3.1        | General .....                                                         | 74 |
| B.3.2        | Prefixes .....                                                        | 74 |
| B.3.3        | Base units .....                                                      | 75 |
| B.3.4        | Derived unit atoms.....                                               | 76 |
| B.3.5        | Customary unit atoms .....                                            | 79 |
| B.3.6        | Other legacy units .....                                              | 83 |
| Annex C      | (informative) Outline of syntax references.....                       | 88 |
| C.1          | UCUM syntax reference .....                                           | 88 |
| C.2          | QUDT syntax reference.....                                            | 88 |
| C.3          | UNECE syntax reference .....                                          | 89 |
| C.4          | IEC CDD Syntax Reference .....                                        | 90 |
| C.5          | LATEX_SIUNITX Syntax Reference .....                                  | 91 |
| Bibliography | .....                                                                 | 92 |

# INTERNATIONAL ELECTROTECHNICAL COMMISSION

## **OPC unified architecture - Part 8: Data access**

### **FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 62541-8 has been prepared by subcommittee 65E: Devices and integration in enterprise systems, of IEC technical committee 65: Industrial-process measurement, control and automation. It is an International Standard.

This fourth edition cancels and replaces the third edition published in 2020. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) addition of a "Quantity Model" which can be referenced from EngineeringUnit Properties. The model defines quantities and assigned units. In addition it provides alternative units and the conversion to them.
