About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	5
INTRODUCTION.....	8
1 Scope.....	9
2 Normative references	9
3 Terms, definitions and symbols	9
3.1 General terms and definitions	9
3.2 Terms and definitions related to refrigerating system	10
3.3 Compartments and sections.....	11
3.4 Physical aspects and dimensions.....	13
3.5 Terms and definitions relating to performance characteristics	14
3.6 Operating states as shown in Figure 1	17
3.7 Symbols.....	19
4 Classifications	20
5 Marking	20
5.1 Rating information.....	20
5.2 Identification of frozen compartments.....	21
5.3 Load limit lines.....	21
6 Technical and commercial product information	22
6.1 General.....	22
6.2 Determination of linear dimensions	22
7 Instructions.....	23
Annex A (normative) Test room and instrumentation.....	25
A.1 Scope	25
A.2 Instruments, accuracy and precision of measurements	25
A.2.1 General	25
A.2.2 Electrical energy consumption	25
A.2.3 Humidity	25
A.2.4 Length	25
A.2.5 Mass	25
A.2.6 Temperature.....	26
A.2.7 Time	26
A.2.8 Voltage and frequency.....	26
A.3 General test conditions	26
A.3.1 General	26
A.3.2 Ambient temperatures	27
A.3.3 Electricity supply	28
A.3.4 Power supply other than electricity	29
A.3.5 Multiple power supply	29
A.3.6 Humidity	29
A.4 Test room configuration	29
A.4.1 General	29
A.4.2 Platform.....	29
A.4.3 Rear wall or partition	29
A.4.4 Side partitions	29
A.4.5 Sensor location.....	30

A.4.6	Test room general configuration	30
Annex B (normative) Preparation of an appliance for testing and general measurement procedures		32
B.1	Scope	32
B.2	Preparation and set-up of appliance	32
B.2.1	General	32
B.2.2	Running in of new appliances	32
B.2.3	Installation of the appliance in the test room	32
B.2.4	Combined appliances	35
B.2.5	Setting up	35
B.2.6	Automatic ice makers	36
B.2.7	Pre-test condition	37
Annex C (normative) Test packages		38
C.1	Dimensions and tolerances	38
C.2	Composition	38
C.3	M-packages	39
Annex D (normative) Determination of compartment average air temperatures		40
D.1	Scope	40
D.2	Location of sensors	40
D.2.1	General	44
D.2.2	Unfrozen compartments	45
D.2.3	Frozen Compartments	45
D.2.4	Equivalent positions and other requirements for all compartment types	46
D.2.5	Consideration of convenience features	49
D.2.1	General	44
D.2.2	Unfrozen compartments	45
D.2.3	Frozen compartments	45
D.2.4	Equivalent positions and other requirements for all compartment types	46
D.2.5	Consideration of convenience features	49
D.3	Compartment average air temperatures determination	49
D.3.1	General	49
D.3.2	Determination of the average temperature of a sensor over a period	49
D.3.3	Determination of the temperature of a compartment	49
D.3.4	Calculation of temperature average	50
Annex E (normative) Details of identification symbols		72
Annex F (informative) Items to that may be included in the a test report		74
Annex G (normative) Wine storage appliances		89
G.1	Scope	89
G.2	Terms, definitions and symbols	89
G.3	Requirements	89
G.3.1	Required temperature range	89
G.3.2	Maximum temperature fluctuation	89
G.3.3	Vibration	89
G.4	General test conditions	89
G.4.1	General	89
G.4.2	Low ambient temperature	90
G.4.3	Interior parts	90
G.5	Determination of volumes	90

G.5.1	Depth	90
G.5.2	Evaluation of bottle capacity for wine storage compartments	90
G.6	Measurement of storage temperature.....	91
G.7	Determining temperature fluctuation	94
G.8	Final test report	94
G.9	Marking and instructions	94
G.9.1	Technical and commercial product information	94
G.9.2	Instructions.....	94
Bibliography		96

Figure 1 – Illustration of selected definitions typical refrigerator operations.....	19
Figure 2 – Identification symbol for a four-star compartment	21
Figure 3 – Star identification symbols for frozen compartments (except four-star)	21
Figure 4 – Marking of load limit	22
Figure 5 – Linear dimensions (example: top view for upright type)	23
Figure A.1 – Verification of parameters to be kept constant	27
Figure A.2 – Partitions to restrict air circulation and ambient temperatures sensor positions	31
Figure B.1 – Examples of appliances with no spacers where rear clearance is specified	33

~~Figure D.1 – Air temperature measuring points – unfrozen compartments with plate or concealed evaporators and effective height and width examples~~

~~Figure D.2 – Air temperature measuring points – fresh food, chill and cellar compartments – examples of generic compartments with crisper and convenience features~~

~~Figure D.3 – Air temperature measuring points – low height and small compartments~~

~~Figure D.4 – Location of temperature sensors within upright frozen compartments without refrigerated shelves and with height equal to or less than 1 000 mm~~

~~Figure D.5 – Location of temperature sensors within upright frozen compartments without refrigerated shelves and with height greater than 1 000 mm~~

~~Figure D.6 – Location of temperature sensors within upright frozen compartments with refrigerated shelves and with height greater than 1 000 mm~~

~~Figure D.7 – location of temperature sensors within chest freezers (1 of 2)~~

~~Figure D.8 – Location of temperature sensors within drawers and bins~~

~~Figure D.9 – Location of temperature sensors when mirror image is applicable~~

Figure D.1 – Air-temperature measuring points – unfrozen compartments with plate or concealed evaporators and effective height and width examples (all front views).....

Figure D.2 – Air-temperature measuring points – unfrozen compartments.....

Figure D.3 – Air-temperature measuring points – small (sub-)compartments and low-height (sub-)compartments

Figure D.4 – Location of temperature sensors within upright frozen compartments without refrigerated shelves and with height equal to or less than 1 000 mm.....

Figure D.5 – Location of temperature sensors within upright frozen compartments without refrigerated shelves and with height greater than 1 000 mm

Figure D.6 – Location of temperature sensors within upright frozen compartments with refrigerated shelves and with height greater than 1 000 mm

Figure D.7 – Location of temperature sensors within chest freezers

Figure D.8 – Location of temperature sensors within drawers and bins

Figure D.9 – Location of temperature sensors when a mirror image of positions is applicable 71

Figure E.1 – Details of identification symbols for four-star compartments..... 72

Figure E.2 – Details of identification symbols for frozen compartments (except four-star)..... 73

Figure G.1 – Standard bottle for evaluation of bottle capacity 91

Figure G.2 – Temperature Measurement Points (packages)..... 93

INTERNATIONAL ELECTROTECHNICAL COMMISSION

Household refrigerating appliances - Characteristics and test methods -

Part 1: General requirements

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

This consolidated version of the official IEC Standard and its amendments has been prepared for user convenience.

IEC 62552-1 edition 1.2 contains the first edition (2015-02) [documents 59M/61/FDIS and 59M/64/RVD], its amendment 1 (2020-11) [documents 59M/126/FDIS and 59M/132/RVD] and its amendment 2 (2025-09) [documents 59M/186/FDIS and 59M/190/RVD].

In this Redline version, a vertical line in the margin shows where the technical content is modified by amendments 1 and 2. Additions are in green text, deletions are in strikethrough red text. A separate Final version with all changes accepted is available in this publication.
