About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	3
INTRODUCTION	1
1 Scope	6
2 Normative references	6
3 Terms and definitions	6
4 Requirements for cables construction	7
4.1 General remarks	7
4.2 Cable construction	7
4.2.1 General	7
4.2.2 Conductor	7
4.2.3 Insulation	7
4.2.4 Colour code	7
4.2.5 Drain wire	7
4.2.6 Screening of cable assembly element	7
4.2.7 Cable make-up	7
4.2.8 Screening of the cable core	7
4.2.9 Sheath	8
4.2.10 Colour of sheath	8
4.2.11 Identification	8
4.2.12 Finished cable	8
5 Requirements and test methods	8
5.1 General remarks	8
5.2 Electrical tests	9
5.2.1 Conductor resistance	9
5.2.2 Resistance unbalance	9
5.2.3 Dielectric strength	9
5.2.4 Insulation resistance	9
5.2.5 Mutual capacitance	9
5.2.5 Surface transfer impedance	9
5.2.6 Coupling attenuation	10
5.3 Transmission requirements and tests	10
5.3.1 General	10
5.3.2 Characteristic impedance	10
5.3.3 Return loss	10
5.3.4 Attenuation	10
5.3.5 Propagation delay, inter- element delay pair skew, and intra- element delay pair skew	10
5.3.6 Near-end crosstalk (NEXT)	10
5.3.7 Attenuation to crosstalk ratio far end (ACR-F)	10
5.3.7 Far-end crosstalk (FEXT)	10
5.3.8 Transverse conversion loss (TCL)	10
5.3.8 Differential-mode to common-mode conversion (S_{cd21})	10
5.3.9 Equal level transverse conversion transfer loss (ELTCTL) ($S_{cd21} - S_{dd21}$)	10
5.3.10 Screening attenuation	10
5.4 Mechanical and dimensional requirements and test methods	11

5.4.1	General	11
5.4.2	Measurement of dimensions	11
5.4.3	Elongation at break of the conductor.....	11
5.4.4	Tensile strength of the insulation	11
5.4.5	Elongation at break of the sheath	11
5.4.6	Tensile strength of the sheath.....	11
5.4.7	Crush test of the cable.....	11
5.4.8	Cold impact test of the cable	11
5.4.9	Repeated bending of the cable	11
5.4.10	Tensile performance of the cable	11
5.4.11	Vibration test of the cable	11
5.5	Environmental tests	12
5.5.1	Shrinkage of the insulation	12
5.5.2	Wrapping test of the insulation after thermal ageing	12
5.5.3	Bending test of the insulation at low temperature.....	12
5.5.4	Tensile strength and elongation of the sheath after ageing	12
5.5.5	Sheath pressure test at high temperature	12
5.5.6	Cold bend test of the cable	12
5.5.7	Heat shock test.....	12
5.5.8	Damp heat steady state	12
5.5.9	Salt mist	12
5.5.10	Flame propagation characteristics of a single cable	12
5.5.11	Flame propagation characteristics of bunched cables	12
5.5.12	Smoke generation.....	12
5.5.13	Halogen-free compounds test	13
Annex A (informative)	Supported ISO/IEC/IEEE 8802-3 Ethernet-over-twinax PHYs	14
A.1	General.....	14
A.2	Ethernet-over-twinax PHY transmission specifications	14
Bibliography		15

~~Table 1 – Supported IEEE 802.3 Ethernet over twinax implementations, configurations~~

~~Table 2 – Supported IEEE 802.3 Ethernet over twinax implementations,
transmission requirements~~

Table 1 – Supported ISO/IEC/IEEE 8802-3 Ethernet over twinax PHY link segment specifications.....8

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Twinax cables for digital communications -
Part 2: Family specification -
Cable for Ethernet-over-twinax physical interfaces**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

This redline version of the official IEC Standard allows the user to identify the changes made to the previous edition IEC 62783-2:2019. A vertical bar appears in the margin wherever a change has been made. Additions are in green text, deletions are in strikethrough red text.
