About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

Warning! Make sure that you obtained this publication from an authorized distributor.

CONTENTS

FOREWORD	3
INTRODUCTION	5
1 Scope	6
2 Normative references	6
3 Terms and definitions	6
4 Requirements for cables construction	6
4.1 General remarks	6
4.2 Cable construction	6
4.2.1 General	6
4.2.2 Conductor	7
4.2.3 Insulation	7
4.2.4 Colour code	7
4.2.5 Drain wire	7
4.2.6 Screening of cable element	7
4.2.7 Cable make-up	7
4.2.8 Screening of the cable core	7
4.2.9 Sheath	7
4.2.10 Colour of sheath	8
4.2.11 Identification	8
4.2.12 Finished cable	8
5 Requirements and test methods	8
5.1 General remarks	8
5.2 Electrical tests	8
5.2.1 Conductor resistance	8
5.2.2 Resistance unbalance	8
5.2.3 Dielectric strength	8
5.2.4 Insulation resistance	8
5.2.5 Surface transfer impedance	8
5.2.6 Coupling attenuation	8
5.3 Transmission requirements and tests	9
5.3.1 General	9
5.3.2 Characteristic impedance	9
5.3.3 Return loss	9
5.3.4 Attenuation	9
5.3.5 Propagation delay, inter-pair skew, and intra-pair skew	9
5.3.6 Near-end crosstalk (NEXT)	9
5.3.7 Far-end crosstalk (FEXT)	9
5.3.8 Differential-mode to common-mode conversion (S_{cd21})	9
5.3.9 Equal level transverse conversion transfer loss (ELTCTL) ($S_{cd21} - S_{dd21}$)	9
5.4 Mechanical and dimensional requirements and test methods	9
5.4.1 General	9
5.4.2 Measurement of dimensions	9
5.4.3 Elongation at break of the conductor	10
5.4.4 Tensile strength of the insulation	10
5.4.5 Elongation at break of the sheath	10

5.4.6	Tensile strength of the sheath.....	10
5.4.7	Crush test of the cable.....	10
5.4.8	Cold impact test of the cable	10
5.4.9	Repeated bending of the cable	10
5.4.10	Tensile performance of the cable.....	10
5.4.11	Vibration test of the cable	10
5.5	Environmental tests	10
5.5.1	Shrinkage of the insulation	10
5.5.2	Wrapping test of the insulation after thermal ageing	10
5.5.3	Bending test of the insulation at low temperature.....	10
5.5.4	Tensile strength and elongation of the sheath after ageing	11
5.5.5	Sheath pressure test at high temperature	11
5.5.6	Cold bend test of the cable	11
5.5.7	Heat shock test.....	11
5.5.8	Damp heat steady state	11
5.5.9	Salt mist	11
5.5.10	Flame propagation characteristics of a single cable	11
5.5.11	Flame propagation characteristics of bunched cables	11
5.5.12	Smoke generation.....	11
5.5.13	Halogen-free compounds test	11
Annex A (informative)	Supported ISO/IEC/IEEE 8802-3 Ethernet-over-twinax PHYs	12
A.1	General.....	12
A.2	Ethernet-over-twinax PHY transmission specifications	12
Bibliography		13
Table 1 – Supported ISO/IEC/IEEE 8802-3 Ethernet over twinax PHY link segment specifications		7
Table A.1 – Supported ISO/IEC/IEEE 8802-3 Ethernet-over-twinax PHY transmission specifications		12

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Twinax cables for digital communications -
Part 2: Family specification -
Cable for Ethernet-over-twinax physical interfaces**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 62783-2 has been prepared by subcommittee 46C: Wires and symmetric cables, of IEC technical committee 46: Cables, wires, waveguides, RF connectors, RF and microwave passive components and accessories. It is an International Standard.

This second edition cancels and replaces the first edition published in 2019. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) updating according to the revised generic twinax cable requirements given in IEC 62783-1:2023;
- b) updating according to new twinax link segment specifications recently added to ISO/IEC/IEEE 8802-3 Ethernet physical interfaces.
