CORRIGENDUM 1

Corrections to the French version appear after the English text.

Les corrections à la version française sont données après le texte anglais.

19.102.3 Assessment to determine tool configuration

Replace the 2nd paragraph of this subclause added by Amendment 1 with the following:

Prior to each measurement, the sample is operated for at least 5 min at no-load. After each 5 min operation period, the measurement shall be started within 20 min.

19.102.4 Test procedure

Replace the 2nd paragraph of this subclause renumbered by Amendment 1 with the following:

Prior to the test, the sample is operated for at least 5 min at no-load. After the 5 min operation period, the test shall be started within 20 min.

K.19.102.3 Assessment to determine tool configuration

Replace the 2nd paragraph of this subclause added by Amendment 1 with the following:

*Prior to each measurement, the sample is operated for at least 5 min at no-load using any suitable **battery**. After each 5 min operation period, the measurement shall be started within 20 min.*
