About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	3
INTRODUCTION	5
1 Scope.....	7
2 Normative references.....	7
3 Terms, definitions and abbreviated terms.....	7
3.1 Terms and definitions.....	7
3.2 Abbreviated terms.....	8
4 Inkjet first drop measurement.....	8
4.1 General	8
4.2 Process for printing-based method	8
4.3 Process for high speed camera imaging-based method	9
4.4 Process for single flash imaging based method.....	10
5 Recorded operating parameters for drop speed measurements	11
Annex A (normative) Key considerations for inkjet first drop measurement	12
A.1 Printing measurement	12
A.2 High speed camera based measurement.....	15
A.2.1 General.....	15
A.2.2 Measurement steps using high speed camera	16
A.2.3 Analysis method of acquired images	18
A.2.4 Jetting speed measurement for first drop analysis	20
A.3 First drop measurement using imaging device (CCD camera) with flash light source	22
Bibliography.....	24
Figure A.1 – Typical first drop effect.....	12
Figure A.2 – Jetting speed effects on drop placement	13
Figure A.3 – Patterns for first drop evaluation.....	14
Figure A.4 – Practical guidelines to obtain acceptable printing accuracy	15
Figure A.5 – Vision measurement based on high speed camera	16
Figure A.6 – Trigger based image acquisition and jetting for first drop measurement.	17
Figure A.7 – Non-jetting pause time effects on the first drop jetting speed.....	18
Figure A.8 – Sorted drop images (ink type A)	19
Figure A.9 – Sorted drop images (ink type B)	19
Figure A.10 – Two jetting images of a droplet, to calculate jetting speed	20
Figure A.11 – Jetting speed calculation from the droplet locations at two timings	21
Figure A.12 – Jetting speed behaviour according to non-jetting time	21
Figure A.13 – Timing chart for CCD camera based measurement	23

INTERNATIONAL ELECTROTECHNICAL COMMISSION

PRINTED ELECTRONICS –

Part 302-6: Equipment – Inkjet – First drop measurement

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 62899-302-6 has been prepared by IEC technical committee 119: Printed Electronics. It is an International Standard.

The text of this International Standard is based on the following documents:

Draft	Report on voting
119/534/FDIS	119/543/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.
