About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	4
INTRODUCTION	6
1 Scope.....	7
2 Normative references.....	7
3 Terms, definitions, abbreviated terms, letters and symbols.....	7
3.1 Terms and definitions.....	7
3.2 Abbreviated terms.....	8
3.3 Letters and symbols.....	8
4 Standard measuring equipment.....	9
4.1 General	9
4.2 Equipment	9
4.2.1 Digital pattern generator	9
4.2.2 Imaging LMD	10
5 Standard measuring conditions	11
5.1 Standard measuring environmental conditions	11
5.2 Standard measuring darkroom conditions.....	11
5.3 Measurement locations on the screen.....	11
5.4 Input signal condition	12
6 Display contrast modulation measurement	12
6.1 General	12
6.2 Contrast modulation.....	12
6.3 Measuring method with grille pattern	12
6.4 Spatial resolution evaluation using contrast modulation	15
7 Display MTF measurement	16
7.1 General	16
7.2 MTF concept for sampled imaging systems	17
7.3 Line-based method	17
8 Reporting.....	20
Annex A (informative) Evaluation of spatial resolution	21
Annex B (normative) Edge-based LMD MTF measurement.....	22
Annex C (informative) Precautions for spatial resolution measurement methods	24
C.1 Sampling issues in grille pattern luminance contrast measurement method.....	24
C.2 Constraints of the grille pattern luminance contrast and the line-based MTF measurement methods	24
C.3 Colour evaluation	25
Annex D (informative) Example of line-based MTF evaluation	26
Annex E (informative) Constraints on curved panel evaluation	29
Bibliography.....	30
Figure 1 – Diagram of DUT and measurement system	10
Figure 2 – Example of nine measurement locations on DUT screen	11
Figure 3 – Input signal image for grille pattern.....	13
Figure 4 – Grille pattern examples of signal image on DUT screen	13
Figure 5 – Example of luminance profile	14
Figure 6 – Evaluation of contrast modulation measurement.....	16

Figure 7 – Schematic of the display MTF measurement setup	17
Figure 8 – Intermediate results obtained at different points in the MTF measurement process	19
Figure A.1 – Example image of luminance profile.....	21
Figure B.1 – Schematic of the edge-based LMD MTF measurement setup.....	22
Figure B.2 – Flow diagram of the edge-based LMD MTF measurement process.....	23
Figure C.1 – Examples of display physical sub-pixel arrangements.....	25
Figure D.1 – Computer-generated 200 (W) × 200 (H)-pixel images of a vertical line displayed on the screen with the RGB-stripe array having the MTF of $ \text{sinc}(\xi_{x,\text{LMD}}, \xi_{y,\text{LMD}}) ^3$ for pixel ratios of 2 and 7	26
Figure D.2 – RGB stripe arrangement: Layout of the micro-colour-filter array and vertically averaged luminance profile	26
Figure D.3 – Reference display MTF	27
Figure D.4 – Flowchart of the algorithm for the line-based display MTF measurement	27
Figure D.5 – Slanted line image captured by LMD (left) and obtained LSF (right)	28
Table 1 – Symbols in this document	9

INTERNATIONAL ELECTROTECHNICAL COMMISSION

ELECTRONIC DISPLAYS –

Part 3-6: Evaluation of optical performance – Spatial resolution

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 62977-3-6 has been prepared by IEC technical committee 110: Electronic displays. It is an International Standard.

The text of this International Standard is based on the following documents:

Draft	Report on voting
110/1752/FDIS	110/1769/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.
