About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	3
1 Scope	5
2 Normative references	5
3 Terms and definitions	5
4 Mating face and gauge information	5
4.1 Mating face dimensions	5
4.1.1 Connector with pin contact	5
4.1.2 Connector with socket contact	8
4.1.3 Mating face of RF channel	10
4.2 Gauges	11
4.2.1 Gauge for socket centre contact	11
4.2.2 Gauge for L32-5 connector with 5 pin contacts	12
4.2.3 Gauge for L32-4 connector with 4 pin contacts	13
4.2.4 Gauge for L32-5 connector with 5 socket contacts	14
4.2.5 Gauge for L32-4 connector with 4 socket contacts	15
5 Quality assessment procedure	16
5.1 General	16
5.2 Rating and characteristics	16
5.3 Quality assessment	18
5.3.1 General	18
5.3.2 Inspection procedure	18
5.3.3 Lot-by-lot inspection	19
5.3.4 Periodic inspections	20
6 Instructions for preparation of detail specifications	21
6.1 General	21
6.2 Identification of the component	21
6.3 Performance	21
6.4 Marking, ordering information and related matters	22
6.5 Selection of tests, test conditions and severities	22
6.6 Blank Detail Specification pro forma for L32 series circular connector	23
7 Marking	26
7.1 Marking of component	26
7.2 Marking and contents of package	27
Bibliography	28
Figure 1 – L32-5 connector with 5 pin contacts	6
Figure 2 – L32-4 connector with 4 pin contacts	7
Figure 3 – L32-5 connector with 5 socket contacts	8
Figure 4 – L32-4 Connector with 4 socket contacts	9
Figure 5 – Mating face of RF channel	10

INTERNATIONAL ELECTROTECHNICAL COMMISSION

Multi-channel radio-frequency connectors -
Part 4: Sectional specification for type L32-4 and L32-5 circular
connectors

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 63138-4 has been prepared by subcommittee 46F: RF and microwave passive components, of IEC technical committee 46: Cables, wires, waveguides, RF connectors, RF and microwave passive components and accessories. It is an International Standard.

This edition cancels and replaces IEC 61169-59:2017. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to IEC 61169-59:2017:

- a) use of IEC 63138-1:2019 as its generic specification instead of using IEC 61169-1:2013;
- b) all the subclauses and test methods are in line with IEC 63138-1:2019;
- c) dimension "g" in Table 3, Table 4, Table 7 and Table 8 has been changed from "0,00 min. to 0,8 max." to "1,6 min. to 2,1 max.".
