About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	3
1 Scope	5
2 Normative references	5
3 Terms and definitions	5
4 Test bed of impact-driven energy harvesting devices	5
4.1 General	5
4.2 Vibrational exciter	6
4.3 Mounting fixture	6
4.4 Function generator	6
4.5 Power amplifier	6
4.6 Accelerometer	6
4.7 Data recorder	6
4.8 Load resistance	7
5 DUT	7
5.1 General	7
5.2 Confirmation of the DUT	7
6 Test conditions	7
6.1 Applied impact forces	7
6.2 Load resistances	7
6.3 Test environment	7
7 Measurement procedures	7
7.1 General	7
7.2 Input impulsive force	8
7.3 Output power	8
8 Test report	9
Annex A (informative) Examples of experimental results using piezoelectric impact-driven energy harvesting device	12
A.1 DUT	12
A.2 Measurement procedure	14
A.3 Output characteristics	14
A.4 Examples of characteristics of actual wearable devices	19
Bibliography	22
Figure 1 – Test bed for impact-driven energy harvesting devices	6
Figure 2 – A definition of sine half-wave acceleration pulses	8
Figure A.1 – Cantilever-type piezoelectric impact-driven energy harvesting device used in the experiment	12
Figure A.2 – Waveforms of input signal of function generator, acceleration, and output voltage (from top to bottom) of cantilever type piezoelectric energy harvester (acceleration $a_i = 90 \text{ m/s}^2$)	16
Figure A.3 – Waveforms of input signal of function generator, acceleration, and output voltage (from top to bottom) of cantilever type piezoelectric energy harvester (acceleration $a_i = 180 \text{ m/s}^2$)	17
Figure A.4 – Duration characteristics (parameter: vibrational excitation accelerations a_i)	18

Figure A.5 – Waveforms of output voltage (upper) and power (lower) of R_{TL} of a cantilever type piezoelectric energy harvester (acceleration $a_i = 90 \text{ m/s}^2$, durations = 1 ms).....	19
Figure A.6 – Examples of foot movements during walking and running [4]	20
Figure A.7 – Configuration of measurement system of the impact acceleration and the output voltage of the DUT on a shoe.....	20
Figure A.8 – Examples of measured waveforms of impact acceleration in a shoe sole	21
Table 1 – Items and parameters required for the mandatory part of the test report.....	10
Table 2 – Items and parameters of the optional part of the test report	11
Table A.1 – Items and parameters of mandatory test report	12
Table A.2 – Items and parameters of optional test report	13
Table A.3 – Total load resistance dependency of output energy.....	19
