About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	3
INTRODUCTION	5
1 Scope	6
2 Normative references	6
3 Terms and definitions	6
3.1 Terms and definitions	6
3.2 Terms and definitions of international lighting vocabulary	7
4 Test setup	7
4.1 Illumination	7
4.2 Measurement environment	8
5 Determination of shade charts	8
5.1 Principles of shade creation	8
5.2 Brown shade charts	9
5.3 Green shade charts	10
6 Measurements	12
6.1 Verification of evenness	12
6.2 Lightness recognition (L^* values)	13
6.2.1 Description of the test samples	13
6.2.2 Procedure	13
6.2.3 Evaluation (requirements and tolerances)	13
6.3 Colour recognition (L^* , a^* , b^* values)	14
6.3.1 Description of the test samples	14
6.3.2 Procedure	14
6.3.3 Evaluation (requirements and tolerances)	14
6.4 Verification of the measurement area	14
6.4.1 General	14
6.4.2 Description of the test samples	14
6.4.3 Procedure	14
6.4.4 Evaluation (requirements and tolerances)	15
6.5 Verification of the resolution	15
6.6 Verification of rectilinear projection	15
6.7 Verification of the 3-dimensional shapes	15
7 Data to be recorded (raw data)	17
7.1 Purpose	17
7.2 LAB	17
7.3 HLC	17
7.4 ΔE_{00} for the test sample	17
7.5 Dimensions (in mm)	17
7.6 Specified measurement areas	17
7.7 Input image colour channel data	17
8 Consideration of tolerances	17
8.1 General	17
8.2 Calculation of differences in colour and its components	17
8.3 Distance information	18
Annex A (normative) Colour-measuring instrument	19
Annex B (informative) Brown shade charts	22

Annex C (informative) Green shade charts	24
Annex D (informative) Evaluation program for determining the deviation in colour rendering	26
Annex E (informative) Examples of shade chart positioning for lightness recognition	27
Bibliography.....	28
 Figure 1 – Cone shape of colour sample	16
Figure 2 – 13 sections of the colour sample	16
Figure A.1 – Colour measuring instrument di:8°	20
Figure A.2 – Colour measuring instrument 45°:0°.....	21
Figure E.1 – Example with an assessment area of 100 mm × 100 mm - 1 position per row and column.....	27
Figure E.2 – Example with an assessment area of 150 mm × 150 mm - 2 positions per row and column.....	27
Figure E.3 – Example with an assessment area of 470 mm × 370 mm - 4 positions per row and column.....	27
 Table 1 – Brown shade charts with class limits	10
Table 2 – Green shade charts.....	11
Table 3 – Maximum CIELAB hue angle distance inside different ΔE^*_{ab} ranges	18
Table A.1 – Colour-measuring instrument specification di:8°	19
Table A.2 – Colour-measuring instrument specification 45°:0° or 0°:45°	20
Table B.1 – CIELAB values for the brown shade charts	22
Table C.1 – CIELAB values for the green shade charts	24

INTERNATIONAL ELECTROTECHNICAL COMMISSION

Household electric appliances - Specification of the properties of a digital system for measuring the performance

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.
