About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	5
Introduction	7
1 Scope.....	8
2 Normative references	8
3 Terms and definitions	9
4 Classification.....	10
4.1 Classification according to method of operation	10
4.2 Classification according to method of interlocking	10
4.3 Classification according to type of isolation.....	10
4.4 Classification according to the method of mounting.....	11
4.5 Classification according to the type of terminals.....	11
4.6 According to the protection against external influences	11
5 Characteristics of SRCSD (3.3).....	11
5.1 Rated cross-section	11
5.1.1 General	11
5.1.2 Rated maximum connectable cross-section with rigid conductors	11
5.1.3 Rated minimum connectable cross-section with rigid conductors	11
5.1.4 Rated maximum connectable cross-section with flexible conductors	11
5.1.5 Rated minimum connectable cross-section with flexible conductors	11
5.2 Rated leakage current (3.10) I_l	11
5.3 Rated operational voltage.....	12
5.4 Rated frequency.....	12
5.5 Rated short-circuit capability	12
5.5.1 General	12
5.5.2 Short-circuit making capability I_{cm}	12
5.5.3 Short-circuit withstand capability I_{cw}	12
5.6 Switching sequence	13
5.7 Preferred number of operating cycles	13
5.8 Operation type	13
5.9 Operation.....	13
6 Product information	14
6.1 Nature of information.....	14
6.1.1 Identification	14
6.1.2 Classification	14
6.1.3 Characteristics.....	14
6.2 Marking.....	14
7 Standard conditions for operation in service and for installation	14
8 Requirements for construction and operation.....	14
8.1 Mechanical design	14
8.1.1 General	14
8.1.2 Mechanism	14
8.1.3 Clearances, creepage distances and solid insulation.....	15
8.1.4 Screws, current-carrying parts and connections	16
8.1.5 Terminals for external conductors.....	17
8.2 Protection against electric shock	19

8.3	Dielectric properties	19
8.4	Temperature-rise	20
8.5	Mechanical and electrical endurance	20
8.6	Performance at short-circuit currents	20
8.7	Resistance to mechanical shock and impact	20
8.8	Resistance to heat	20
8.9	Resistance to abnormal heat and to fire	20
8.10	Reliability	20
8.11	Electromagnetic compatibility (EMC)	21
9	Tests	21
9.1	General	21
9.2	Test conditions	21
9.3	Test of indelibility of marking	22
9.4	Test of reliability of screws, current-carrying parts and connections	22
9.5	Test of reliability of screw-type terminals for external copper conductors	23
9.6	Verification of protection against electric shock	24
9.7	Test of dielectric properties	25
9.7.1	Resistance to humidity	25
9.7.2	Insulation resistance of the main circuit	25
9.7.3	Dielectric strength of the main circuit	26
9.7.4	Insulation resistance and dielectric strength of auxiliary circuits	26
9.7.5	Capability of control circuits connected to the main circuit withstanding high DC voltages due to insulation measurements	27
9.7.6	Verification of impulse withstand voltages	27
9.7.7	Verification of effective continuity between main contacts	29
9.8	Test of temperature-rise	29
9.8.1	Ambient air temperature	29
9.8.2	Test procedure	29
9.8.3	Measurement of the temperature of parts	30
9.8.4	Temperature-rise of a part	30
9.9	Verification of the operating characteristics	30
9.9.1	Verification of the operation	30
9.9.2	Verification of interlocking function	30
9.10	Verification of mechanical and electrical endurance	32
9.10.1	General test conditions	32
9.10.2	Test procedure	32
9.10.3	Condition of the SRCSD (3.3) after test	32
9.11	Short-circuit tests	33
9.11.1	Short-time withstand current	33
9.11.2	Short-circuit making capacity test	34
9.12	Verification of resistance to mechanical shock and impact	35
9.12.1	Mechanical shock	35
9.12.2	Mechanical impact	36
9.13	Test of resistance to heat	38
9.13.1	Test on complete SRCSD (3.3)	38
9.13.2	Ball pressure test	38
9.14	Test of resistance to abnormal heat and to fire	39
9.15	Verification of reliability	40
9.15.1	Climatic test	40

9.15.2	Test with temperature of 40 °C	42
9.16	Verification of withstand against ageing	42
9.17	Electromagnetic compatibility (EMC).....	43
9.17.1	General	43
9.17.2	Electromagnetic emission	43
9.17.3	Electromagnetic immunity	43
9.18	Test of resistance to rusting	46
Annex A (normative)	Test sequence and number of samples to be submitted for certification purposes	65
A.1	Test sequences	65
A.2	Number of samples to be submitted for full test procedure	66
Annex B (normative)	Determination of clearances and creepage distances	67
B.1	General.....	67
B.2	Orientation and location of a creepage distance.....	67
B.3	Creepage distances where more than one material is used	67
B.4	Creepage distances split by floating conductive part	67
B.5	Measurement of creepage distances and clearances	67
Annex C (informative)	Examples of terminal designs.....	71
Bibliography		74
Figure 1	– Example of grid connected PEI architecture	7
Figure 2	– Operation of an SRCSD (3.3)	13
Figure 3	– Standard test finger.....	55
Figure 4	– Mechanical shock test apparatus	55
Figure 5	– Mechanical impact test apparatus	56
Figure 6	– Striking element for pendulum impact test apparatus	57
Figure 7	– Mounting support for sample for mechanical impact test	58
Figure 8	– Example of mounting an unenclosed SRCSD (3.3) for mechanical impact test	59
Figure 9	– Example of mounting of panel mounting type SRCSD (3.3) for the mechanical impact test	60
Figure 10	– Application of force for mechanical test of rail mounted SRCSD (3.3).....	61
Figure 11	– Ball-pressure test apparatus	61
Figure 12	– Stabilizing period for reliability test.....	62
Figure 13	– Reliability test cycle	63
Figure 14	– Diagrammatic representation for glow-wire test	64
Figure B.1	– Examples of methods of measuring creepage distances and clearances.....	70
Figure C.1	– Examples of pillar terminals.....	71
Figure C.2	– Examples of screw terminals and stud terminals	72
Figure C.3	– Examples of saddle terminals	72
Figure C.4	– Examples of lug terminals.....	73
Table 1	– Immunity tests (overview).....	43
Table 2	– Performance criteria.....	43
Table 3	– Voltage dip test values	44
Table 4	– Short-interruption test values	44

Table 5 – Surge test voltages	44
Table 6 – Fast transient test values	45
Table 7 – Requirements and position for markings and other product information	46
Table 8 – Rated impulse withstand voltage as a function of the nominal voltage of the installation	48
Table 9 – Minimum clearances and creepage distances.....	48
Table 10 – Test voltage of auxiliary circuits	51
Table 11 – Test voltage for verification of rated impulse withstand voltage	51
Table 12 – Test voltage for verifying the suitability for isolation, referred to the rated impulse withstand voltage of the SRCSD (3.3) and the altitude where the test is carried out.....	51
Table 13 – Screw thread diameters and applied torques	51
Table 14 – Pulling forces	52
Table 15 – Temperature-rise values.....	52
Table 16 – Values of influencing quantities	52
Table A.1 – Test sequences.....	65
Table A.2 – Number of samples for full test procedure	66

INTERNATIONAL ELECTROTECHNICAL COMMISSION

System referencing conductor switching device

FOREWORD

1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.

2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.

3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.

4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.

5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.

6) All users should ensure that they have the latest edition of this publication.

7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.

8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.

9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC [had/had not] received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.
