About the IEC
The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications
The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform
The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, …). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished
Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc
If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch
Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org
The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD 4
INTRODUCTION 6
1 Scope 7
2 Normative references 7
3 Terms and definitions 7
3.1 Terms and definitions 7
3.2 Abbreviated terms 9
4 General 10
5 System-level design aspects of ULCCS technology 12
5.1 Examples of PHY layers for ULCCS 12
5.2 MAC layer aspects 12
5.3 Management aspects 13
6 Medium access control (MAC) layer 13
6.1 General MAC framework 13
6.2 Frame formats 14
6.2.1 General 14
6.2.2 Signaling frame 14
6.2.3 Downlink frame 15
6.2.4 Uplink frame 15
6.2.5 Retransmission frame 15
6.2.6 Slot structure 15
6.3 Message types 15
6.4 Message structure 15
6.5 MAC functions 18
6.5.1 General 18
6.5.2 Schedule generation 18
6.5.3 Data transmissions 21
6.5.4 Retransmission handling 22
6.5.5 Frequency hopping 25
6.6 MAC parameters 25
6.7 Logical channels 26
7 System management 28
7.1 Time synchronization 28
7.1.1 General 28
7.1.2 Multi-hop time synchronization based on synchronous flooding 28
7.1.3 Multi-hop time synchronization based on timestamping 29
7.1.4 Single-hop time synchronization based on IEEE 802.11-2012 30
7.2 Multi-hop operation 30
7.2.1 General 30
7.2.2 Topology generation by the network layer 31
7.2.3 Topology generation by the MAC layer 32
7.3 Parallel operation of multiple domains 33
7.3.1 General 33
7.3.2 Synchronous operation of multiple domains 33
7.3.3 Asynchronous operation of multiple domains 34
7.4 Parallel operation over multiple radios 35

7.5 Security 35
Annex A (informative) Use-cases and reference scenarios 37
A.1 Use-case 1: Multi-sensory wireless teleoperation 37
A.2 Use-case 2: Multi-user VR environment 37
A.3 ULCCS operation over Bluetooth® 5.0 PHY layers 38
Bibliography 40

Figure 1 – System model for multimedia-centric communication and control in local environments 10
Figure 2 – Logical view of the protocol layer model for ULCCS technology 11
Figure 3 – Packet format of ULCCS technology over uncoded Bluetooth® 5.0 PHY layer 12
Figure 4 – MAC layer operation of ULCCS technology and its different phases 13
Figure 5 – Reference example for ULCCS operation 13
Figure 6 – Illustration of the signaling frame 14
Figure 7 – RFR message structure 17
Figure 8 – ASG message structure 17
Figure 9 – DLS message structure for distributed scheduling 18
Figure 10 – DLS message structure for centralized scheduling 18
Figure 11 – Exchange of signaling messages for schedule generation 19
Figure 12 – Structure of retransmitted DLS message for distributed scheduling 21
Figure 13 – Data message structure 21
Figure 14 – Schedule duplication technique 22
Figure 15 – Schedule extrapolation technique 22
Figure 16 – G-NACK message structure 23
Figure 17 – Reference example for illustrating schedule extrapolation 23
Figure 18 – Illustration of schedule extrapolation (Scenario A) 24
Figure 19 – Illustration of schedule extrapolation (Scenario B) 24
Figure 20 – Illustration of the logical channels for ULCCS 26
Figure 21 – Illustration of schedule translation functionality 27
Figure 22 – Illustration of time synchronization via synchronous flooding 28
Figure 23 – Illustration of time synchronization via synchronous flooding 29
Figure 24 – W-DREQ message structure 29
Figure 25 – W-DRES message structure 30
Figure 26 – RC message structure 30
Figure 27 – Illustration of topology generation by network layer 31
Figure 28 – RC-ACK message structure 31
Figure 29 – Illustration of advertising and scanning procedures 32
Figure 30 – Illustration of topology generation via managed flooding 33
Figure 31 – Illustration of synchronous operation of multiple domains 33
Figure 32 – Illustration of the two-tier schedule 34
Figure 33 – Illustration of asynchronous operation of multiple domains 34
Figure 34 – Illustration of multi-radio operation 35

INTERNATIONAL ELECTROTECHNICAL COMMISSION

_____

Low and ultra-low latency communication and control system

FOREWORD

1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
6) All users should ensure that they have the latest edition of this publication.
7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at https://patents.iec.ch. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 63448:2025
https://standards.iteh.ai/catalog/standards/iec/63448-2025

IEC 63448 has been prepared by IEC technical committee TC 100: Audio, video and multimedia systems and equipment. It is an International Standard.

The text of this International Standard is based on the following documents:

Draft	Report on voting
100/4293/CDV	100/4364/RVC

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.
