About the IEC
The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications
The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform
The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, …). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished
Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc
If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch
Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org
The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD 4
1 Scope 6
2 Normative references 6
3 Terms and definitions 7
4 Design and structure 8
  4.1 General 8
  4.2 Rigid rectangular leaky waveguides 9
    4.2.1 Waveguide tube 9
    4.2.2 The slots in waveguide tube 10
    4.2.3 Sealing layer 10
    4.2.4 Sheath 10
  4.3 Elliptical leaky waveguides 10
    4.3.1 Waveguide tube 10
    4.3.2 The slots in waveguide tube 10
    4.3.3 Sealing layer (when applicable) 10
    4.3.4 Sheath 11
5 Type designation 11
  5.1 Type name 11
  5.2 Variant 11
  5.3 Leaky waveguide marking 12
6 Ratings and characteristics 12
  6.1 Rated temperature range 12
  6.2 Operating frequency 12
7 Identification, marking and labelling 12
  7.1 Identification 12
  7.2 Marking 12
  7.3 Labelling 13
8 Requirements and test methods 13
  8.1 General 13
  8.2 Visual inspection 13
    8.2.1 Requirements 13
    8.2.2 Inspection procedure 13
  8.3 Electrical tests 14
    8.3.1 Withstand voltage or spark test of sheath (for elliptical leaky waveguide) 14
    8.3.2 Attenuation constant 14
    8.3.3 Coupling loss 14
    8.3.4 Return loss 14
  8.4 Mechanical tests 14
    8.4.1 Eccentricity of sheath (for elliptical leaky waveguides) 14
    8.4.2 Mechanical dimensions 14
    8.4.3 Eccentricity (for rigid rectangular leaky waveguides) 15
    8.4.4 Bow (for rigid rectangular leaky waveguides) 15
    8.4.5 Twist 16
    8.4.6 Surface roughness 16
    8.4.7 Internal stress (for rigid rectangular leaky waveguides) 16

8.4.8 Bending (for elliptical leaky waveguides) 16
8.4.9 Crush resistance test (for elliptical leaky waveguides) 17
8.4.10 Tensile strength of waveguide (for elliptical leaky waveguides) 17
8.5 Environmental tests 17
8.5.1 Cold bend (for elliptical leaky waveguides) 17
8.5.2 Climatic sequence 18
8.5.3 UV test 18
8.5.4 Aging test 18
8.6 Combustion performance 19
8.6.1 Requirements 19
8.6.2 Test procedure 19
8.7 Sealing test 19
8.7.1 Requirements 19
8.7.2 Test procedure 19
9 Quality assessment 19
10 Delivery and storage 19
Annex A (normative) Test methods of attenuation constant 20
A.1 Test equipment 20
A.2 Test sample (TS) 20
A.3 Test arrangement 20
A.4 Test frequency 22
A.5 Method A (using VNA) 22
A.5.1 Known insertion loss of waveguide coaxial adapter 22
A.5.2 Unknown insertion of waveguide coaxial adapter IL_{ad} 23
A.6 Method B (using power meters) 24
A.6.1 Known insertion loss of waveguide coaxial adapter 24
A.6.2 Unknown insertion loss of waveguide coaxial adapter 24
A.7 Report 25
Annex B (normative) Test methods of coupling loss 26
B.1 Test equipment 26
B.2 Test sample (TS) 27
B.3 Test arrangement 27
B.3.1 General 27
B.3.2 Free-space method 27
B.3.3 Ground-level method 28
B.4 Test frequency 29
B.5 Test procedure 30
B.6 Precautions 31
B.7 Report 31
Annex C (normative) Test methods of return loss 32
C.1 Test equipment 32
C.2 Test sample (TS) 32
C.3 Test arrangement 32
C.4 Test frequency 33
C.5 Procedure 33
C.6 Report 33

INTERNATIONAL ELECTROTECHNICAL COMMISSION

Leaky waveguides -
Part 1: Generic specification -
General requirements and test methods

FOREWORD

1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.

2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.

3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.

4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.

5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.

6) All users should ensure that they have the latest edition of this publication.

7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.

8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.

9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at https://patents.iec.ch. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 63466-1 has been prepared by IEC technical committee 46: Cables, wires, waveguides, RF connectors, RF and microwave passive components and accessories. It is an International Standard.

The text of this International Standard is based on the following documents:

Draft	Report on voting
46/1065/FDIS	46/1072/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.
