### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About the IEEE

IEEE is the world's largest professional association dedicated to advancing technological innovation and excellence for the benefit of humanity. IEEE and its members inspire a global community through its highly cited publications, conferences, technology standards, and professional and educational activities.

### About IEC/IEEE publications

The technical content of IEC/IEEE publications is kept under constant review by the IEC and IEEE. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

**Warning! Make sure that you obtained this publication from an authorized distributor.**

## CONTENTS

FOREWORD .....	5
1 Scope .....	1
2 Normative references .....	8
3 Terms and definitions .....	8
4 Application considerations .....	9
4.1 General.....	9
4.2 Corrosive areas .....	9
4.3 Process temperature accuracy .....	9
4.3.1 Type I .....	9
4.3.2 Type II .....	10
4.3.3 Type III .....	10
4.4 Installation considerations.....	10
5 Thermal insulation .....	10
5.1 General.....	10
5.2 Selection of insulating material .....	11
5.3 Selection of weather barrier (cladding).....	12
5.4 Selection of economical thickness to provide optimum trace heating design .....	12
5.5 Double insulation .....	12
6 System design .....	15
6.1 General.....	15
6.2 Purpose of, and major requirement for, trace heating .....	15
6.3 Training .....	16
6.4 Selection of trace heater .....	16
6.4.1 General .....	16
6.4.2 Site-fabricated trace heaters.....	16
6.4.3 Specific types of trace heating .....	17
6.5 Maximum temperature determination .....	17
6.5.1 General .....	17
6.5.2 PTC characteristic .....	18
6.5.3 Stabilized design .....	18
6.5.4 Controlled design .....	18
6.6 Heat up and cool down considerations .....	19
6.7 Design information .....	19
6.7.1 Design information documentation .....	19
6.7.2 Isometric or trace heater configuration line lists and load charts .....	20
6.8 Power system .....	20
6.9 Earthing requirements.....	21
6.10 Earth fault protection of equipment .....	21
6.11 Start-up at minimum ambient temperatures .....	21
6.12 Long trace heater runs .....	21
6.13 Flow pattern analysis .....	22
6.14 Dead-leg control technique .....	24
6.15 Chimney effect.....	24
6.16 Safety shower and eyewash station design requirements .....	25
7 Control and monitoring .....	25
7.1 General.....	25

7.2	Mechanical controllers .....	26
7.3	Electronic controllers .....	26
7.4	Application suitability .....	26
7.5	Location of controllers.....	26
7.6	Location of sensors.....	27
7.7	Alarm considerations .....	27
7.7.1	General .....	27
7.7.2	Trace heating circuit alarm .....	27
7.7.3	Temperature alarms .....	28
7.7.4	Other alarms.....	28
7.7.5	Integrated control .....	28
8	Recommendations for installation .....	28
8.1	General.....	28
8.2	Preparatory work .....	29
8.2.1	General .....	29
8.2.2	Scheduling and coordination.....	29
8.2.3	Confirmation of equipment.....	29
8.2.4	Receiving materials .....	29
8.2.5	Warehousing and handling .....	29
8.2.6	Personnel aspects .....	29
8.3	Installation of trace heating circuits.....	29
8.3.1	Coordination and equipment verification.....	29
8.3.2	Pre-installation testing and design verification .....	30
8.3.3	Visual examination .....	30
8.3.4	Insulation resistance test .....	30
8.3.5	Component substitution .....	30
8.3.6	Location of power supply .....	31
8.3.7	Installation of trace heaters .....	33
8.3.8	Connections and terminations.....	34
8.4	Installation of control and monitoring equipment .....	36
8.4.1	General .....	36
8.4.2	Verification of equipment suitability .....	36
8.4.3	Temperature controller and monitoring devices.....	36
8.4.4	Sensor considerations .....	36
8.4.5	Controller operation, calibration, and access .....	40
8.4.6	Necessary modifications .....	40
8.5	Installation of thermal insulation system (see also Clause 5).....	40
8.5.1	General .....	40
8.5.2	Preparatory work .....	41
8.5.3	Installation of the thermal insulation materials .....	41
8.5.4	Cladding .....	41
8.5.5	Field (site work) circuit insulation resistance test .....	42
8.5.6	Visual inspection .....	42
8.5.7	Documentation .....	42
8.6	Installation of distribution wiring and coordination with branch circuits .....	42
8.6.1	General .....	42
8.6.2	Earth fault protective device .....	42
8.6.3	Circuit protective device .....	43
8.6.4	Tagging/Identification .....	43

8.7	Commissioning .....	43
8.7.1	Pre-commissioning check .....	43
8.7.2	Functional check and final documentation .....	43
9	Maintenance .....	44
9.1	General .....	44
9.2	Fault location .....	45
9.3	Fault rectification .....	45
10	Repairs .....	45
10.1	General .....	45
10.2	Practicability of repair to electric trace heaters .....	45
10.2.1	Mechanical damage .....	45
10.2.2	Damage due to corrosion .....	46
10.2.3	Damage due to overheating .....	46
10.3	Repair techniques for electrical trace heaters .....	46
10.3.1	General .....	46
10.3.2	In-line splice .....	46
10.3.3	Connection via junction box .....	46
10.4	Earthing .....	46
10.5	Testing .....	46
Annex A	(informative) Example of design data record .....	47
Annex B	(informative) Checklist for installation requirements .....	50
Annex C	(informative) Example of trace heater commissioning record .....	51
Annex D	(informative) Example of maintenance schedule and log record .....	52
Annex E	(informative) Pipe heat loss considerations - Heat loss formula and example calculations .....	53
Annex F	(informative) Vessel heat loss considerations .....	60
F.1	General .....	60
F.2	Insulation heat loss ( $Q_{ins}$ ) .....	60
F.3	Slab surface areas ( $Q_{slab}$ ) .....	61
F.4	Support heat loss ( $Q_{supt}$ ) .....	62
F.5	Manhole heat loss ( $Q_{manhole}$ ) .....	62
F.6	Convection coefficient formulae .....	63
F.6.1	General .....	63
F.6.2	Free convection, nonfluid surface, any orientation ( $h_i$ , $h_{CO}$ , $h_O$ ) .....	63
F.6.3	Forced convection, any orientation ( $h_O$ ) .....	64
F.6.4	Radiation component, all coefficients ( $h_f$ , $h_i$ , $h_{CO}$ , $h_O$ ) .....	64
Annex G	(informative) Heat up and cool down considerations .....	66
G.1	Heat up .....	66
G.2	Cool down .....	67
Annex H	(informative) Method to determine equivalent thicknesses of insulating cements .....	69
Annex I	(informative) Frost heave prevention .....	70
I.1	General .....	70
I.2	Design information .....	70
I.2.1	General .....	70
I.2.2	Construction details of the floor .....	71

1.2.3	Electrical considerations .....	71
1.3	Heat load determination .....	71
1.3.1	General .....	71
1.3.2	Trace heater layout and component mounting .....	73
1.3.3	Electrical design .....	73
1.4	Control and monitoring system design .....	74
1.4.1	Control options .....	74
1.4.2	Monitoring .....	74
1.5	Special design considerations .....	74
1.6	Installation .....	74
1.7	Maintenance .....	75
1.7.1	General .....	75
1.7.2	Training of maintenance personnel .....	75
1.7.3	Frequency of inspection .....	75
1.7.4	Maintenance program documentation .....	75
1.7.5	Visual evaluation .....	76
1.7.6	Electrical evaluation .....	76
1.7.7	Review of the electrical protection system .....	76
1.8	Repair .....	76
	Bibliography .....	77
	Figure 1 – Thermal insulation - Weather-barrier installation .....	13
	Figure 2 – Typical temperature profile .....	14
	Figure 3 – Flow pattern analysis example .....	23
	Figure 4 – Bypass example .....	24
	Figure 5 – Typical installation of control sensor <del>and</del> or sensor for high temperature limiting control limiter .....	38
	Figure 6 – <del>Limiting device</del> High temperature limiter sensor on sheath of trace heater .....	39
	Figure 7 – <del>Limiting device</del> High temperature limiter sensor as artificial hot spot .....	39
	Figure E.1 – Assumed temperature gradients .....	54
	Figure I.1 – Typical frost heave prevention substructure .....	70
	Figure I.2 – Frost heave prevention power requirements .....	73
	Table 1 – Pre-installation checks .....	32
	Table A.1 – Example of design data record .....	47
	Table B.1 – Example of pre-commissioning check and trace heater installation record .....	50
	Table C.1 – Example of trace heater commissioning record .....	51
	Table D.1 – Example of maintenance schedule and log record .....	52

# Explosive atmospheres - Part 30-2: Electrical resistance trace heating - Guidance on application for design, installation and maintenance

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC document(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation.

IEEE Standards documents are developed within IEEE Societies and Standards Coordinating Committees of the IEEE Standards Association (IEEE SA) Standards Board. IEEE develops its standards through a consensus development process, approved by the American National Standards Institute, which brings together volunteers representing varied viewpoints and interests to achieve the final product. Volunteers are not necessarily members of IEEE and serve without compensation. While IEEE administers the process and establishes rules to promote fairness in the consensus development process, IEEE does not independently evaluate, test, or verify the accuracy of any of the information contained in its standards. Use of IEEE Standards documents is wholly voluntary. *IEEE documents are made available for use subject to important notices and legal disclaimers (see <https://standards.ieee.org/ipr/disclaimers.html> for more information).*

IEC collaborates closely with IEEE in accordance with conditions determined by agreement between the two organizations. This Dual Logo International Standard was jointly developed by the IEC and IEEE under the terms of that agreement.

- 2) The formal decisions of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees. The formal decisions of IEEE on technical matters, once consensus within IEEE Societies and Standards Coordinating Committees has been reached, is determined by a balanced ballot of materially interested parties who indicate interest in reviewing the proposed standard. Final approval of the IEEE standards document is given by the IEEE Standards Association (IEEE SA) Standards Board.
- 3) IEC/IEEE Publications have the form of recommendations for international use and are accepted by IEC National Committees/IEEE Societies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC/IEEE Publications is accurate, IEC or IEEE cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications (including IEC/IEEE Publications) transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC/IEEE Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC and IEEE do not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC and IEEE are not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or IEEE or their directors, employees, servants or agents including individual experts and members of technical committees and IEC National Committees, or volunteers of IEEE Societies and the Standards Coordinating Committees of the IEEE Standards Association (IEEE SA) Standards Board, for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC/IEEE Publication or any other IEC or IEEE Publications.
- 8) Attention is drawn to the normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that implementation of this IEC/IEEE Publication may require use of material covered by patent rights. By publication of this standard, no position is taken with respect to the existence or validity of any patent rights in connection therewith. IEC or IEEE shall not be held responsible for identifying Essential Patent Claims for which a license may be required, for conducting inquiries into the legal validity or scope of Patent Claims or determining whether any licensing terms or conditions provided in connection with submission of a Letter of Assurance, if any, or in any licensing agreements are reasonable or non-discriminatory. Users of this standard are expressly advised that determination of the validity of any patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

This redline version of the official IEC Standard allows the user to identify the changes made to the previous edition IEC/IEEE 60079-30-2:2015. A vertical bar appears in the margin wherever a change has been made. Additions are in green text, deletions are in strikethrough red text.
