About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About the IEEE

IEEE is the world's largest professional association dedicated to advancing technological innovation and excellence for the benefit of humanity. IEEE and its members inspire a global community through its highly cited publications, conferences, technology standards, and professional and educational activities.

About IEC/IEEE publications

The technical content of IEC/IEEE publications is kept under constant review by the IEC and IEEE. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

Warning! Make sure that you obtained this publication from an authorized distributor.

CONTENTS

FOREWORD	4
INTRODUCTION	6
1 Scope	7
2 Normative references	7
3 Terms and definitions	9
4 General requirements	11
4.1 System description	11
4.2 Distribution system	12
4.2.1 General	12
4.2.2 Equipotential bonding	13
4.3 Compatibility assessment before connection	13
4.4 LVSC system design and operation	13
4.4.1 System design	13
4.4.2 System operation	14
4.5 Personnel safety	14
4.6 Design requirements	14
4.6.1 General	14
4.6.2 Protection against moisture and condensation	14
4.6.3 Location and construction	14
4.6.4 Electrical equipment in hazardous areas	15
4.7 Electrical requirements	15
4.8 System study and calculations	16
4.9 Emergency shutdown including emergency-stop facilities	16
5 LV shore supply system requirements	17
5.1 Voltages and frequencies	17
5.2 Quality of LV shore supply	19
6 Shore-side installation	19
6.1 General	19
6.2 System component requirements	19
6.2.1 Shore-side main circuit-breaker	19
6.2.2 Shore power transformer	20
6.2.3 System earthing methodology	20
6.2.4 Protective earthing	20
6.2.5 Equipotential bonding	20
6.3 Shore-to-ship electrical protection system	21
6.4 LV safety protocol, interlocking and communication	22
6.4.1 General	22
6.4.2 Operating of the low-voltage (LV) circuit-breakers and disconnectors	22
6.5 Shore connection convertor equipment	22
6.5.1 General	22
6.5.2 Cooling	23
6.5.3 Protection	23
7 Ship-to-shore connection and interface equipment	23
7.1 General	23
7.2 Cable management system	24
7.2.1 General	24

7.2.2	Monitoring of cable tension or position	25
7.2.3	Monitoring of the cable length	25
7.3	Ship and shore couplers	26
7.3.1	General	26
7.3.2	Safety loop scheme	27
7.3.3	Pilot contacts	30
7.4	Ship-to-shore connection cable	30
7.5	Storage	30
8	Ship-side installation	30
8.1	General	30
8.2	Ship electrical distribution system	30
8.2.1	Short-circuit protection	30
8.2.2	Earth fault protection, monitoring and alarm	30
8.2.3	Distribution system earthing	31
8.3	Shore connection switchboard	31
8.3.1	General	31
8.3.2	Ship-side main circuit-breaker	31
8.3.3	Instrumentation and protection	31
8.3.4	Operation of the circuit-breaker	32
8.4	Onboard transformer	32
8.5	Onboard main switchboard	33
8.5.1	General	33
8.5.2	Circuit-breaker	33
8.5.3	Instrumentation	33
8.5.4	Protection	34
8.5.5	Operation of the circuit-breaker	35
8.6	Ship power restoration	35
9	LVSC system control and monitoring	35
9.1	General requirements	35
9.2	Load transfer via blackout	35
9.3	Load transfer via automatic synchronization	36
9.3.1	General	36
9.3.2	Protection requirements	36
10	Verification and testing	36
10.1	General	36
10.2	Initial tests of shore-side installation	37
10.2.1	General	37
10.2.2	Tests	37
10.3	Initial tests of ship-side installation	37
10.3.1	General	37
10.3.2	Tests	37
10.4	Tests of the LVSC system at the first call	38
10.4.1	General	38
10.4.2	Tests	38
11	Periodic tests and maintenance	38
11.1	General	38
11.2	Tests and verification of the LVSC system at repeated calls	39
12	Documentation	39

12.1	General	39
12.2	System description	39
Annex A (informative) Shore-to-ship connection cable		40
A.1	General	40
A.2	Rated voltage.....	40
A.3	General design.....	40
A.3.1	General.....	40
A.3.2	Power and earth conductors.....	40
A.3.3	Pilot elements.....	41
A.3.4	Cabling	41
A.3.5	Separator tape.....	41
A.3.6	Outer sheath	42
A.3.7	Markings	42
A.4	Tests on complete cables	42
Annex B (normative) Ship-to-shore cable management and connector		44
B.1	General	44
Bibliography.....		46
Figure 1 – Block diagram of a typical LVSC system.....		12
Figure 2 – Phase sequence rotation – Positive direction		18
Figure 3 – Balanced three-phase variables in time domain.....		18
Figure 4 – Shore connection accessories		25
Figure 5 – Safety circuit		28
Figure A.1 – Bending test arrangement.....		43
Figure B.1 – Contact assignment		44
Table 1 – Number of parallel connections with the use of IEC 60309-5.....		26
Table B.1 – Connector types.....		44

Utility connections in port - Part 3: Low-voltage shore connection (LVSC) systems - General requirements

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation.

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

IEEE Standards documents are developed within IEEE Societies and subcommittees of IEEE Standards Association (IEEE SA) Board of Governors. IEEE develops its standards through an accredited consensus development process, which brings together volunteers representing varied viewpoints and interests to achieve the final product. IEEE standards are documents developed by volunteers with scientific, academic, and industry-based expertise in technical working groups. Volunteers involved in technical working groups are not necessarily members of IEEE or IEEE SA and participate without compensation from IEEE. While IEEE administers the process and establishes rules to promote fairness in the consensus development process, IEEE does not independently evaluate, test, or verify the accuracy of any of the information or the soundness of any judgments contained in its standards.

IEC collaborates closely with ISO and IEEE in accordance with conditions determined by agreement between the organizations. This Triple Logo International Standard was jointly developed by the IEC, ISO and IEEE under the terms of that agreement.

- 2) The formal decisions of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees. In the ISO, Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote. The formal decisions of IEEE on technical matters, once consensus within IEEE Societies and Standards Coordinating Committees has been reached, is determined by a balanced ballot of materially interested parties who indicate interest in reviewing the proposed standard. Final approval of the IEEE Standard document is given by the IEEE Standards Association (IEEE-SA) Standards Board.
- 3) IEC/ISO/IEEE Publications have the form of recommendations for international use and are accepted by IEC National Committees/ISO member bodies /IEEE Societies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC/ISO/IEEE Publications is accurate, IEC, ISO or IEEE cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications (including IEC/ISO/IEEE Publications) transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC/ISO/IEEE Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC, ISO and IEEE do not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC, ISO and IEEE are not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC, ISO or IEEE or their directors, employees, servants or agents including individual experts and members of technical committees and IEC National Committees and ISO member bodies, or volunteers of IEEE Societies and the Standards Coordinating Committees of the IEEE Standards Association (IEEE-SA) Standards Board, for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC/ISO/IEEE Publication or any other IEC, ISO or IEEE Publications.
- 8) Attention is drawn to the normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.

- 9) Attention is drawn to the possibility that implementation of this IEC/ISO/IEEE Publication may require use of material covered by patent rights. By publication of this standard, no position is taken with respect to the existence or validity of any patent rights in connection therewith. IEC, ISO or IEEE shall not be held responsible for identifying Essential Patent Claims for which a license may be required, for conducting inquiries into the legal validity or scope of Patent Claims or determining whether any licensing terms or conditions provided in connection with submission of a Letter of Assurance, if any, or in any licensing agreements are reasonable or non-discriminatory. Users of this standard are expressly advised that determination of the validity of any patent rights, and the risk of infringement of such rights, is entirely their own responsibility. Further information may be obtained from ISO or the IEEE Standards Association.

IEC/IEEE 80005-3 was prepared by IEC technical committee 18: Electrical installations of ships and of mobile and fixed offshore units, in cooperation with

- IEC subcommittee 23H: Plugs, socket-outlets and couplers for industrial and similar applications, and for electric vehicles, of IEC technical committee 23: Electrical accessories;
- ISO Technical Committee 8: Ships and marine technology, subcommittee 3: Piping and machinery;
- IEEE IAS Petroleum and Chemical Industry Committee (PCIC) of the IEEE Industry Applications Society.

This document is published as a triple logo (IEC, ISO and IEEE) standard.

This first edition cancels and replaces IEC PAS 80005-3:2014. This edition constitutes a technical revision.

The text of this International Standard is based on the following IEC documents:

Draft	Report on voting
18/1970/FDIS	18/1993A/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table. In ISO, the standard has been approved by 8 members out of 8 having a cast vote.

The language used for the development of this International Standard is English.

This document was drafted in accordance with the rules given in the ISO/IEC Directives, Part 2, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications/.

A list of all the parts in the IEC 80005 series, published under the general title *Utility connections in port*, can be found on the IEC website.

The IEC Technical Committee and IEEE Technical Committee have decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.
