About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	3
INTRODUCTION.....	5
1 Scope.....	6
2 Normative references	6
3 Terms, definitions, abbreviated terms and acronyms	6
3.1 Terms and definitions	6
3.2 Abbreviated terms and acronyms.....	8
4 From current functional models to the future.....	9
4.1 General.....	9
4.2 Traditional model representation of functional capability architecture.....	10
4.3 Challenges of IIoT within functional model	10
4.3.1 General	10
4.3.2 Hybrid industrial-business systems	12
4.3.3 Zero trust architecture	12
4.4 Example of functional model with IIoT integrated	13
5 Principal roles and how they interact in IIoT	14
6 Integrating IIoT into the asset owner's security program	17
6.1 Overview	17
6.2 Recommendations	17
6.2.1 Risk to IACS	17
6.2.2 Training for personnel	17
6.2.3 Impact on business continuity.....	17
6.2.4 Security policies and procedures	18
6.2.5 Policies and procedures for physical security and physical assets	18
6.2.6 Policies and activities around IIoT	18
6.2.7 Authentication strategy.....	18
6.2.8 Authorization policies and procedures	18
6.2.9 Security program maintenance	19
6.2.10 Information and document management	19
6.2.11 Incident planning and response	19
6.2.12 Defense-in-depth strategy	19
6.2.13 Conformance with the IEC 62443 series	19
7 Risk assessments of IIoT	20
7.1 Overview	20
7.2 Recommendations	20
7.2.1 Identify the SuC	20
7.2.2 Cybersecurity risk assessment	20
7.2.3 Target security levels	20
7.2.4 Logical or physical separation	21
7.2.5 Implications for safety-related zones	21
7.2.6 Impact on essential functions	21
7.2.7 Impact on zone and conduit boundaries.....	21
8 IIoT and foundational requirements	22
8.1 Overview	22
8.2 Recommendations	22
8.2.1 FR 1 – Identification and authentication control.....	22

8.2.2	FR 2 – Use control	22
8.2.3	FR 3 – System integrity	23
8.2.4	FR 4 – Data confidentiality	23
8.2.5	FR 5 – Restricted data flow	24
8.2.6	FR 6 – Timely response to events	24
8.2.7	FR 7 – Resource availability	24
9	Considerations for integration of IIoT with cloud-based functionality into IACS	25
9.1	Overview	25
9.2	Cloud models	25
9.3	Recommendations	27
9.3.1	Risk assessment	27
9.3.2	IIoT CBF and risk	29
9.3.3	Importance of contractual relationships with IIoT CBF	33
	Bibliography	34
	Figure 1 – Example of a functional model with IIoT integration	11
	Figure 2 – Example of hybrid virtualized IACS with IIoT integrated into the PERA architecture	14
	Figure 3 – Alignment of roles across IIoT lifecycle	15
	Figure 4 – Shared responsibilities for SaaS, PaaS and IaaS	26
	Figure 5 – High-level example of zones and conduits in an IACS with IIoT CBF	28
	Table 1 – Roles and relevant documents	16
	Table 2 – Examples of security measures and potential impact of IIoT CBF	30

INTERNATIONAL ELECTROTECHNICAL COMMISSION

Security for industrial automation and control systems - Part 1-6: Application of the 62443 series to the Industrial Internet of Things (IIoT)

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC PAS 62443-1-6 has been prepared by IEC technical committee 65: Industrial-process measurement, control and automation and the liaison ISA99: ISA committee on Security for industrial automation and control systems. It is a Publicly Available Specification.

The text of this Publicly Available Specification is based on the following documents:

Draft	Report on voting
65/1155/DPAS	65/1176/RVDPAS

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Publicly Available Specification is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, [and the ISO/IEC Directives, JTC 1 Supplement] available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

A list of all parts in the IEC 62443 series, published under the general title *Security for industrial automation and control systems*, can be found on the IEC website.

Text in **bold**: Lead recommendations (in Clause 6 to Clause 9).

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

NOTE In accordance with ISO/IEC Directives, Part 1, IEC PASs are automatically withdrawn after 4 years.
