About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	4
INTRODUCTION	6
1 Scope	8
2 Normative references	8
3 Terms, definitions, abbreviated terms and conventions	8
3.1 Terms and definitions	8
3.2 Abbreviated terms	13
3.3 Conventions	16
4 Considerations on 5th Generation mobile networking	16
4.1 Overview	16
4.2 Radio access technology and spectrum	18
5 Considerations of 5G in industrial automation applications	19
5.1 General	19
5.2 5G background and challenges	19
5.3 Use cases and requirements	19
5.3.1 Key 5G use cases and requirements	19
5.3.2 A 5G traffic model for industrial use cases	19
5.3.3 5G for automation in industry	20
5.4 5G system network architecture and capabilities	20
5.4.1 Security aspects of 5G for industrial networks	20
5.4.2 5G non-public networks for industrial scenarios	21
5.4.3 Exposure of 5G capabilities for connected industries and automation applications	21
5.5 5G system integration with other technologies	21
5.5.1 Integration of 5G with Time-Sensitive Networking for industrial communications	21
5.5.2 Integration of industrial Ethernet networks with 5G networks	21
5.6 5G system integration with devices	22
5.6.1 5G QoS for industrial automation	22
5.6.2 Industrial 5G devices – architecture and capabilities	22
5.7 Performance agreement and monitoring	22
5.7.1 Selected testing and validation considerations for industrial communication with 5G technologies	22
5.7.2 Performance testing of 5G systems for industrial automation	23
5.7.3 Service-level specifications for 5G technology-enabled connected industries	23
6 Use cases overview	23
6.1 Typical Industrial deployment scenarios	23
6.2 General 5G functional requirements	24
6.3 Performance indicators	26
7 General system architecture	26
7.1 The industrial production system	26
7.2 Technical plant system	27
7.3 Distributed automation system	27
7.3.1 Architecture	27
7.3.2 Device types and data endpoint types	28
7.3.3 Typical data connections and data traffic types	29

7.4	Communication system	32
7.5	Environmental conditions.....	33
8	Conceptual model for 5G systems in industrial automation.....	33
8.1	Conceptual model.....	33
8.2	Reference interface	36
8.3	Parameter concept.....	37
8.3.1	General.....	37
8.3.2	Parameter statements	37
8.3.3	Parameter values.....	38
8.4	Performance parameters	39
8.4.1	General.....	39
8.4.2	Performance parameters related to the application	39
8.4.3	Performance parameters related to the wireless communication solution	40
8.4.4	Performance parameters related to the radio environment.....	40
8.5	Influencing quantity.....	41
8.6	Quality of communication services.....	42
9	Industrial communication infrastructure to be considered	42
9.1	General	42
9.2	Distributed automation system and industrial communication system	42
9.3	Structure of a communication-enabled industrial automation device	42
9.4	Interfaces of industrial communication systems.....	43
9.5	Security requirements and measures	44
9.6	Functional safety requirements and measures	45
10	Key capabilities of 5G technologies for industrial automation.....	46
10.1	General	46
10.2	Network deployment scenarios.....	46
10.3	Structure of 5G devices.....	50
10.4	Interfaces of 5G systems.....	52
10.4.1	General.....	52
10.4.2	User interface to the 5G network terminal.....	52
10.4.3	User interface to the 5G device management.....	53
10.4.4	Enhancements in new 3GPP releases	54
10.5	Quality of service.....	56
10.6	Security.....	57
11	Integration of 5G technologies into industrial automation	59
11.1	General	59
11.2	Industrial 5G network functions	60
11.3	Industrial 5G device functions	61
11.4	Interfaces for industrial 5G systems.....	63
11.5	Integration of quality of service	63
11.6	Integration of Security measures	66
11.7	5G communication in functionally safe applications	66
11.8	The deployment process of industrial 5G system.....	66
Annex A (informative)	5G-ACIA White Papers of interest	68
Bibliography.....		70

Figure 1 – 5G in the context of industrial communication 7

Figure 2 – 5G system network architecture..... 17

Figure 3 – Typical industrial deployment scenarios	24
Figure 4 – The position of the communication system in the context of the industrial production system	27
Figure 5 – Architecture of an automation system with spatially distributed automation functions	28
Figure 6 – Transfer interval in context of a cyclic production process	31
Figure 7 – Access through 5G network	32
Figure 8 – Conceptual model of a distributed automation system using a wireless communication system	34
Figure 9 – Conceptual model of a distributed automation system using an industrial 5G system	35
Figure 10 – Reference interface with gap to the wireless communication functions	37
Figure 11 – Basic structure of a communication-enabled industrial automation device	43

Table A.1 – References to the 5G-ACIA White Papers	69

INTERNATIONAL ELECTROTECHNICAL COMMISSION

Industrial networks - 5G communication technology - General considerations

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 63595 has been prepared by subcommittee 65C: Industrial networks, of IEC technical committee 65: Industrial-process measurement, control and automation. It is a Publicly Available Specification.

The text of this Publicly Available Specification is based on the following documents:

Draft	Report on voting
65C/1354/DPAS	65C/1362/RVDPAS

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Publicly Available Specification is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

A list of all parts in the IEC 63595 series, published under the general title *Industrial networks – 5G communication technology*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

NOTE In accordance with ISO/IEC Directives, Part 1, IEC PASs are automatically withdrawn after 4 years.
